Thread: [How to make a keygen?](#)

Vendicative21 - June 8, 2011, 1:06 pm

Hi guys,

I need a keygen that makes : "XXXX-XX-XX-XX-XXXX" Where the "X" are random numbers.
Can someone help me with give to me a string?
Cheers ?

Use the motherfucking Search

Vendicative21 - June 8, 2011, 1:09 pm

jeez i've used it.
= 0 result that i need for do this.

Hey thanks for the video man is useful ^^
but i was searching for Random number maker not for Cases that are already setted up (:
Thanks anyway (:

Bigandrewgold - June 8, 2011, 1:38 pm

PHP Code

```
<?php
Private Function RandomNumber(min As Integer, max As Integer) As Integer
    Dim random As New Random()
    Return random.Next(min, max)
End Function 'RandomNumber
```

use that and add in - so like

PHP Code

```
<?php
randomnumber(1000,9999) + "-" + randomnumber(10,99)
```

    Dim random As New Random()
    Return random.Next(min, max)
End Function 'RandomNumber
```

use that and add in - so like

PHP Code

```
<?php
randomnumber(1000,9999) + "-" + randomnumber(10,99)
```

Since "randomnumber" is an integer, you would want to do it like this instead:

PHP Code

```
<?php
randomnumber(1000,9999) & "-" & randomnumber(10,99)
```
