Haunted™ - June 9, 2011, 8:46 am

Post a virus scan on your thread.

2Random4U - June 9, 2011, 8:47 am

Omfg Ty so much :D , Is it Stable? Looking very good :) Ty for the share

Anders - June 9, 2011, 8:49 am

Looks interesting, Downloading now.

@Haunted

Since when can source files be bound with an executable?

limitless - June 9, 2011, 8:49 am

Why post a virus scan it's the source he posted?

StarZ - June 9, 2011, 8:53 am

You can infect a 3rd party control that he may have used. So, It's still desireable.

elmedoc - June 9, 2011, 8:56 am

I scan the vb project or bin ?

PS: For me is useless, if you don't trust me go VM.

2Random4U - June 9, 2011, 8:57 am

The source works , but it's 32 bit only server and i don't have the skills to create something epic from it :P

elmedoc - June 9, 2011, 8:59 am

@2Random4U

I have tested on windows 7 and it's work.

Try build server with builder but don't use "persistence" and extra futures.

SIM-478284 - June 9, 2011, 9:04 am

I saw a important stuff missing. Like Remote desktop, file manager, registry manager etc... Looks good though. What does persistance do in this case? I know it tries to make your RAT more tricky to remove, but with what methods?

Aprilia - June 9, 2011, 10:27 am

I dont find : File Manager , Registry Manager , Remote Desktop

Symbiotic - June 9, 2011, 10:30 am

I like how you have a worm function with a picture of a tic. Anyways looks like a nice program glad you are making it open-source.

Aprilia - June 9, 2011, 10:39 am

yes,the program does works everything works but there is a problem : no remote desktop or file manager :(

elmedoc - June 9, 2011, 11:38 am

@Aprilia

It's the source, so you can add some features if you want =)

Just learn the code =)

Aprilia - June 9, 2011, 11:42 am

well it was good from you if u already made the screen and file manager :),thanks anyway !

0xE9 - June 9, 2011, 12:08 pm

Man dude this looks very sexy, whats "Game Flood" though :/

The-Madness - June 9, 2011, 2:19 pm

Are you serious.. ?

See you on msn we need to speak ;)

You have posted the source without my autorisation...

In the beginning it's my project, you have joined me, you have added somme features, and you post the source..

I stop to work on the projet.. When you have ask me to join me, I have said "the project it's private, don't distribute the source ect..."

The-Madness

hipio - June 9, 2011, 2:32 pm

(Jun 9, 2011 02:19 PM)The-Madness Wrote: [CITE](#) Are you serious.. ?

The-Madness
He got some troublers ?

The-Madness - June 9, 2011, 2:37 pm

I have coded some weeks for make this RAT, and he put the source free... Pff... In the beginning the rat called "The Devil's Eye", I have all source of the advancement of the RAT ;)

Morbid Saint - June 10, 2011, 3:14 am

Thanks for the share mate i'd probably check this out later. :)

Aprilia - June 10, 2011, 3:29 am

it wud be awesome if sum1 cud implent remote desktop or file manager in this

The-Madness - June 10, 2011, 3:31 am

I don't care about reputation, the project was private

elmedoc - June 10, 2011, 6:33 am

Thanks all =)

@The-Madness Do not be jealous. =P
I do not even know you ^^

Speedy007 - June 10, 2011, 7:24 am

The most important function is still there ;) DDoS!

I will give this a try, and report back on your Project ;) Thanks for Sharing through

Deceptive - June 10, 2011, 10:10 am

I love how all the members with > 100 posts, post here saying "This is AMAZINGZX ZFGUYZ THANKZX I GO MAKE RAT NAO".

Banks? - June 10, 2011, 10:40 am

Looks like this guy has a history of ripping. Look at his rep. ?

elmedoc - June 10, 2011, 10:58 am

I'm not ripper....

The-Madness is troll, don't trust.

INFA?OUS - June 10, 2011, 11:21 am

Thanks for the rat.

-xLeGiiT

Remember... Haters will keep on hating...

Banks? - June 10, 2011, 11:27 am

(Jun 10, 2011 10:58 AM)firedrop Wrote: [\[CITE\]](#) I'm not ripper....

The-Madness is troll, don't trust.

When the rep comes from nathan, who is a trusted member, and is amazing at VB, I cannot help but not believe you.

The-Madness - June 10, 2011, 2:47 pm

I can prove it's me I have coded this ;), I have speak with the original member "firedrop" he says me he was hacked ...

Aprilia - June 10, 2011, 10:21 pm

prove it by adding to this remote desktop,if not than stfu

????? - June 10, 2011, 11:34 pm

(Jun 9, 2011 08:46 AM)Haunted™ Wrote: [\[CITE\]](#) Post a virus scan on your thread.

Lol for a source? Roflcopter.

kingersman - June 11, 2011, 2:58 am

(Jun 10, 2011 10:21 PM)Aprilia Wrote: [\[CITE\]](#) prove it by adding to this remote desktop,if not than stfu

lol fail attempt at getting a free RAT with remote desktop

The-Madness - June 11, 2011, 3:04 am

@Aprilia: I stop to work of the project .. it's now public ..

elmedoc - June 28, 2011, 10:49 pm

NEW Link: <http://www.multiupload.com/0YIG2EAGS0>

Mortalis Piratica - June 28, 2011, 11:01 pm

Well most of the people will ask, is it stable? so?

JAM - June 29, 2011, 4:19 pm

(Jun 9, 2011 08:57 AM)2Random4U Wrote: [\[CITE\]](#) The source works , but it's 32 bit only server and i don't have the skills to create something epic from it :PIt's only 32 bit because of the Gui which you should remove in the references 'Skincrafter.net-vs2005' change every buttonx to just a button then remove 'DevComponents.DotNetBar2' in the reference finally in Form1 find the word hwid() and delete it it should be under form1_load

Now you can run this on a 64bit

Liilcrazy - June 29, 2011, 8:25 pm

Looks Good. But when i downloaded my AVG Detected it as a Trojan.

Evader - June 29, 2011, 8:47 pm

Hmm I don't know if I can trust this. But the GUI and all of the other features look great!

eXero - June 29, 2011, 8:48 pm

The name is similar to BlackShades, but the graphics look amazing. VS scan would be nice, although I am not going to download because port forwarding wont work on my computer.

Evader - June 29, 2011, 8:55 pm

I really like the GUI and features but I am to lazy to download it and take a look at the source code to see if there is any bugs / glitches.

netw0rk tr0jan - June 30, 2011, 5:58 am

Thanks for the rat....try it latter

Panagiota - June 30, 2011, 12:22 pm

Thanks for this mate, seems like a good job.
I will test it on my machines and post feedback later.

infomiho - June 30, 2011, 12:54 pm

Kissie kissie, thanks for this !

IDontNeedAUsername - July 17, 2011, 1:04 pm

Sorry for ing this but avira detected form1.vb as a virus?

The Unknown - July 17, 2011, 1:46 pm

Nice share, it gives me error every time I debug about "skincrafter.net-vs2005.dll" I added it and everything still getting some kind of error that some of this .dll stuff are not running... Never faced such a problem, hope you can tell me what to do here...

no1me - July 17, 2011, 2:00 pm

first remove the missing one

op - you have few nice ideas

SoulZeh - July 17, 2011, 3:31 pm

what theme is this what 3rd party u use? and nice rat btw

cr3dotw - July 17, 2011, 3:55 pm

It generate server of 360 octets and don't work for me.

JIMP - July 17, 2011, 10:44 pm

Thanks for sharing mate.Will try it out later :).

IRC - July 17, 2011, 10:45 pm

Its got a bunch of errors :(

1NV1518L3 - July 18, 2011, 3:46 pm

Good rat but WTF ??

server / stub is backdoored lol xD

your hotmail account : drdarkhack@hotmail.fr
your hotmail password : hacker

IRC - July 18, 2011, 3:53 pm

Its backdoored :(
I'm mad now

Penthos - July 18, 2011, 3:59 pm

oh i was gonna say nice release and thanks but now up urs.. Thought it was a ban to infect other members??

elmedoc - July 19, 2011, 1:22 am

No backdoored, just learn to code x)

The email is used for Steam Stealer in the rat, if you don't change the email i get your steam id...

Is useless because i don't have your password.

You can try, change the email & password, re-build you get only Steam ID.

GtaCrash129 - July 19, 2011, 10:23 am

I become much errors. I added the DLLs but the Images are wrong. And some Errors with importing

lo0ol - July 19, 2011, 10:49 am

it have some errors,how about a lot, but thanks any way

the important here is learn from the code and use it for your goals not just use it like a scriptkiddie,for all people how complain ,this is a hackforum not a scriptkiddieforums ;) sorry and thanks

(° ? °) - July 19, 2011, 11:18 am

So how does this communicate with the controller?

elmedoc - July 19, 2011, 11:38 am

@Subotai

The rat communicate with the server by reverse connection. (like cybergate/darkcomet)

The client send data, and the server run feature, when the data is send by the client =)

GtaCrash129 - July 20, 2011, 12:56 am

I can't start the client or debug it. VB says, the skincrafter tries to load a wrong file... i put the skin.skf file into the debug folder and else i tried to put it on C:\ and write the path in the program but it failed. Can you say me, how do i fix this? Sry for my bad english^^

EDIT: Some GFX are missing...

The Unknown - July 20, 2011, 1:07 am

Lol guys it's not backdored, you donno how to code so you will understand nothing lol

and GtaCrash129 nothing is missing, maybe 1 dll, just go references and search for it and add it...

Propaganda - July 20, 2011, 6:58 am

Really nice RAT

gui is nice too

The Penguin - July 20, 2011, 8:21 am

Your an idiot for sharing that dll!

you fucking moron...

EDIT:

its backdoor'ed...nice try IDIOT

br0ck9 - July 20, 2011, 9:22 am

(Jul 20, 2011 08:21 AM)The Penguin Wrote: [\[CITE\]](#) Your an idiot for sharing that dll!

you fucking moron...

EDIT:

its backdoor'ed...nice try IDIOT

It's not backdoor'ed. It's just not a very good RAT. I've found several things that could be improved.

Kiyongo - July 20, 2011, 9:36 am

Woww this is awesomee. Going to try it. Thanks mate

Stenography - July 20, 2011, 10:04 am

Can I control the webcam too ?

br0ck9 - July 20, 2011, 10:18 am

(Jul 20, 2011 10:04 AM)PolarX Wrote: [\[CITE\]](#) Can I control the webcam too ?

You can't even control their desktop.

Redeemz - July 20, 2011, 10:47 am

I'll start by saying this is a really nice free rat source, I'll finish by saying if it's to good to be true it probably is even if it isn't.

GtaCrash129 - July 21, 2011, 12:13 am

I found the gfx... But i get an error with skincrafter. He didn't find the SkinFile...

EDIT:

The german error:

"Fehler 1 Die Datei oder Assembly "file:///C:/Users/
/Desktop/BlackNess/DLL/skincrafter.net-vs2005.dll" oder eine Abhängigkeit davon wurde nicht
gefunden. Es wurde versucht, eine Datei mit einem falschen Format zu laden. Zeile 485, Position
5. C:\Users**\Desktop\BlackNess\v1.0\Client\Evil1.0a\Form1.resx 485 5 Evil1.0a"

Google Translator:

"Error 1 The file or assembly 'file: / / / C: / Users //
Desktop/BlackNess/DLL/skincrafter.net-vs2005.dll "or one of its dependencies was not found. An
attempt was made to load a file with an incorrect format. Line 485, position 5 C: \ Users \ ** \
Desktop \ blackness \ v1.0l \ Client \ Evil1.0a \ Form1.resx 485 5 Evil1.0a"

(° ? °) - July 21, 2011, 12:49 am

so can this controll or see the remote computer? Like a remote desktop assistant?

GtaCrash129 - July 21, 2011, 1:04 am

@Subotai:

No

Pls help me with my question (Page 7 the last)

Lucky83 - October 31, 2011, 7:09 pm

"Error 1 The file or assembly 'file: / / / C: / Users // Desktop/BlackNess/DLL/skincrafter.net-vs2005.dll
"or one of its dependencies was not found. An attempt was made to load a file with an incorrect
format. Line 485, position 5 C: \ Users \ ** \ Desktop \ blackness \ v1.0l \ Client \ Evil1.0a \
Form1.resx 485 5 Evil1.0a"

help me pls

Slagle96 - October 31, 2011, 7:32 pm

no to flame but this looks like dark rat a lot man :/

M0D3M - November 19, 2011, 2:49 pm

Nice contribution. I look forward to reading over the code, I might fix up a lot of things, and add some stuff, then release the source again.

Loser Douche Bag #35 - November 19, 2011, 4:16 pm

Too much errors. I might take my time soon to fix this. Nice release.

lol-cats - December 18, 2011, 11:21 am

Have been looking for something like this for a long time!! thanks :D

zenfar76 - December 26, 2011, 12:21 pm

Thanks for the rat....try it latter

TorKS - January 1, 2012, 3:24 am

Thanks for this.

But the victim don't go into the "client" ...
So the RAT don't run.

NetDotNet - January 2, 2012, 3:39 pm

gui looks cool, i am downloading it now..

elmedoc - January 3, 2012, 11:18 am

@Torks Yes, you need maybe learn really langage and don't rip ?

MUT4NT - January 3, 2012, 12:58 pm

to download! and testing! I look good :)

3 olaH - January 16, 2012, 6:24 pm

thanks for the source, nice share ;)

varadsarpole - January 17, 2012, 3:12 am

Nice1 like it very much :P NIICCEE__

elmedoc - January 20, 2012, 7:27 am

Thanks varadsarpole, i am happy to help other guy ;)

MDSN - January 20, 2012, 9:20 am

Is it normal that my nod 32 blocked this download??

VOLTAGE - January 20, 2012, 9:22 am

Hopefully FYI doesn't see this thread or they will have a rat coming out soon. Good job though man. Nice release.

elmedoc - January 20, 2012, 9:58 am

@MDSN The rat have be write a long time ago, so antivirus can be detected the file because is a RAT.

Arrowmax08 - March 9, 2012, 1:38 pm

The link is down...

Can you please re-upload the download link

Vamprrr - March 9, 2012, 10:07 pm

this looks really good bro, downloading now!

Clutch - March 9, 2012, 10:12 pm

MU is down and has been for a while. Please re-upload.

?WhiskeyPete - March 9, 2012, 11:16 pm

Wow this looks amazing! Thanks for sharing the source.

Adolf Hipster - March 10, 2012, 3:33 am

Damn I love it!

Good job! Keep it up!

HopeSaraiva - March 10, 2012, 4:14 am

Link off Reupload again please

HopeSaraiva ;)

elmedoc - March 11, 2012, 11:46 am

Sorry but i don't think i have any copy of the source in my HDD.

no1me - March 11, 2012, 12:06 pm

<http://www.mediafire.com/?h0k63wxxtiii320>

msgtoshort

elmedoc - March 12, 2012, 10:42 am

<http://adf.ly/6EYQe> = New Link thanks to no1me

Percocet - March 12, 2012, 1:21 pm

This is ripped from something. Why? Because I have the exact same source.

xXx pR0 h4X0r xXx - March 12, 2012, 1:29 pm

Thnx 4 the share man !

I'll try this out as soon as I can :)

camcamcode08 - March 13, 2012, 1:37 am

i'll try this later thanks in advance more powers to you bro. :D

elmedoc - March 13, 2012, 4:50 am

@killermanjaro65

BlackNess 1.6 have be making 1 year and 5 month ago.

He is coded by me and friend coder ;)
That's all.

daGazaman - March 13, 2012, 4:56 am

Thanks for sharing the source bro. Its appreciated.

Mr.Nemesis - March 13, 2012, 6:32 am

Thanks m8 for sharing this..
It will be very helpfull for me!!!!

elmedoc - March 16, 2012, 1:14 pm

If the link is down again PM me.
But i think the link is up for long time :)

Percocet - March 16, 2012, 2:51 pm

(Mar 13, 2012 04:50 AM)An0x Wrote: [\[CITE\]](#) @killermanjaro65

BlackNess 1.6 have be making 1 year and 5 month ago.
He is coded by me and friend coder ;)
That's all.
Really? The source I have looks EXACTLY like your project. Right down to the fuckin contextmenu.
Stop trying to put this off as a scratch coded RAT, when I know it's not.

elmedoc - March 17, 2012, 1:56 am

<https://hackforums.net/showthread.php?tid=2238300>

I don't think is good to steal my work and sell ?
Fps Creator Stealing is coded by me 100% you can't find in the web because it's private and the software is unknow
You fail...

Dr.Coder ? - March 18, 2012, 8:23 am

Looks good, downloading now.

Thanks for the release.

TheBarret - March 18, 2012, 10:02 am

Some coded looks nice but i lol'd on the SYN attack code, the basic principle of this attack is to open and maintain these connections with bogus/false retour info in the packet so the connection would stay open , repeating that process.

your code:

```
Code Thread.Sleep(100)
For num = 0 To Me.SynSockets - 1
If Me.Sock(num).Connected Then
Me.Sock(num).Disconnect(False)
End If
Me.Sock(num).Close()
Me.Sock(num) = Nothing
Next
```

That does not do the trick im afraid ;)

elmedoc - March 18, 2012, 10:23 am

The code is crap for DDOS Attack.
But the UDP work good ;)

You can always use/code your class and use it :)

Soarzeh - March 18, 2012, 11:47 am

This is so sick! thankyou very much sir:D

BlackDragon_HS - December 31, 2012, 7:07 am

Thank you mate, it will be really helpful! :)

Xyzo - December 31, 2012, 7:32 am

Thanks this source really helps! :D

iSevere - December 31, 2012, 7:38 am

I thought you have said you code this project on delphi .

<https://hackforums.net/showthread.php?tid=2881674>

elmedoc - January 2, 2013, 3:36 am

@iSevere

BlackNix != BlackNess

BlackNess was coded something like 6 year ago now and it's write in .NET

BlackNix was coded 6 Month ago (but i have used some part of my other project in delphi written before), blacknix use Delphi & ASM.

I hope you have understand ;)

OfficialTrauma - January 5, 2013, 7:56 pm

Do not download guys.. the uploader is going to give you alittle surprise with a trojanhorse! xD

Detroit Tigers - January 5, 2013, 9:09 pm

(Jan 5, 2013 08:56 PM)OfficialTrauma Wrote: [\[CITE\]](#) Do not download guys.. the uploader is going to give you alittle surprise with a trojanhorse! xDLol, You must be retarded right? It is a RAT there is the .exe in the bin file of course it will come up as a virus. It is a SOURCE CODE! Open VB then open the project.

cutegirl05 - January 6, 2013, 5:01 am

Looks Great & Professional , An Excellent Job .

Downloading..

elmedoc - April 7, 2013, 5:27 am

New links for 2013:

<http://www.multiupload.nl/L6UFBSUOQ6>

<http://www13.zippyshare.com/v/42439810/file.html>

ARGOS-SOFT - April 7, 2013, 6:06 am

Thanks for this, i will take a look at the Source !

elmedoc - April 7, 2013, 6:59 am

No problem :)

I hope you can learn something from it

METALSLUG - April 7, 2013, 7:06 am

Looking good! skid question though: whats a hwid?

kugeldusch - April 7, 2013, 7:11 am

(Apr 7, 2013 07:06 AM)UBERHAX0RSAM Wrote: [\[CITE\]](#) Looking good! skid question though: whats a hwid?

its the short term for hardware id

you can use it in a licensing system f.e. to identify a computer

elmedoc - April 7, 2013, 9:47 am

@UBERHAX0RSAM

The description of hwid by Kugeldusch is right :)

METALSLUG - April 7, 2013, 1:03 pm

(Apr 7, 2013 07:11 AM)kugeldusch Wrote: [\[CITE\]](#) its the short term for hardware id you can use it in a licensing system f.e. to identify a computer

ooh I see, thanks for the reply :-)

The description of hwid by Kugeldusch is right :)ah OK thanks! ;)

elmedoc - April 12, 2013, 10:56 am

No problem :)

If you like it share it ;)

shroomkidhacker - July 29, 2013, 4:36 pm

Thanks for this its a nice source to start your own rat off i already added Remote desktop file manager , keylogger , google chrome and fire fox password stealer

MrAlicard - July 31, 2013, 3:55 pm

Not included in the server sideonly the client part.

The client source is also in the server directory. You uploaded it badly. Please fix the source files. :)

shroomkidhacker - August 4, 2013, 3:11 am

I see that my source code of what i added is been reuploaded good job!!

Or not im just being paranoid since ive been hacked and hacker steals my source codes sorry for that

getkilled22 - August 5, 2013, 1:27 pm

Thanks for the great share, i might fiddle around with it! :D

?XilluX - August 5, 2013, 2:09 pm

Thanks for this, mate, I will give it a look :)

CaptainJake - August 5, 2013, 6:38 pm

There are tons of errors in the source. :/

JamesMysteryBond007 - August 6, 2013, 9:56 am

Wow great, i really want to learn how to make a RAT in Visual Basic 2010... VB6 is outdated :p does this have reverse connection? I dont know how to work with sockets very well, i hope this helps

gandy3451 - August 6, 2013, 1:01 pm

why not calling persistent a registry adder would make it simpler and it does require admin if im not wrong... otherwise thanks for sharing helped me whit my project

elmedoc - August 6, 2013, 2:06 pm

Some link for keep the source.

http://multiupload.biz/ss_opod501c4van

<http://www.sendspace.com/file/ywbai2>

@CaptainJake.

Just learn a little and search. It's too easy to fix the error ;)

And so the source help only people which want Learn & work. If you can't fix the error. You can't build Mod of this RAT.

@JamesMysteryBond007

Yes it's reverse connection.

Psychotiic - August 11, 2013, 2:29 pm

i was wondering if there something wrong with the sever because i cant get the bot to run on my machine it says its not compatable with 64 bit machines. If that is the case there wouldnt be any infections of the 64 bits correct? or am i doing something wrong

oxivhack - August 15, 2013, 10:51 am

Thank you for sharing, it's nice :)

Unknown Coder - December 1, 2013, 11:22 am

upade links please multiupload.com = dead :(

pardon it's multiupload.nl sorry :D

Hannibal Rising - December 1, 2013, 11:29 am

Seems very nice!

Thanks a lot for the share OP.

Makabra666 - December 5, 2013, 7:36 am

Hey, can you reupload this ? All links are Dead ;/

Thanks..

?XilluX - December 5, 2013, 8:55 am

Thanks for sharing the Source, I am gonna check that out ! :)

elmedoc - December 5, 2013, 9:35 am

@Xillux

Yes first rat make a long time ago.

Honestly it's garbage but some people can still learn about TCP Client/Server.

iMalware - December 5, 2013, 11:05 am

BunkerBox can you reupload Shadow NET?

Ultimate Keyboard Master - December 14, 2013, 7:52 pm

Can i get the source code to the password cracker please?

sohil66 - December 25, 2013, 12:42 am

Thank you, I test it and it work powerful!
