Thread: [\[Snippet\] Proxy for Webbrowser \[VB.net\]](#)

Ethernal Five - June 9, 2011, 10:13 am

Alot of people were requesting the proxy class for a webbrowser in vb.net, so here it is:

PHP Code

```
<?php
```

```
Public Structure Struct_INTERNET_PROXY_INFO
```

```
Public dwAccessType As Integer
```

```
Public proxy As IntPtr
```

```
Public proxyBypass As IntPtr
```

```
End Structure
```

```
<Runtime.InteropServices.DllImport("wininet.dll", SetLastError:=True)> _
```

```
Private Shared Function InternetSetOption(ByVal hInternet As IntPtr, ByVal dwOption As Integer,  
ByVal lpBuffer As IntPtr, ByVal lpdwBufferLength As Integer) As Boolean
```

```
End Function
```

```
Private Sub PROXYSET(ByVal strProxy As String)
```

```
WebBrowser1.ScriptErrorsSuppressed = True
```

```
Const INTERNET_OPTION_PROXY As Integer = 38
```

```
Const INTERNET_OPEN_TYPE_PROXY As Integer = 3
```

```
Dim struct_IPI As Struct_INTERNET_PROXY_INFO
```

```
struct_IPI.dwAccessType = INTERNET_OPEN_TYPE_PROXY
```

```
struct_IPI.proxy = System.Runtime.InteropServices.Marshal.StringToHGlobalAnsi(strProxy)
```

```
struct_IPI.proxyBypass = System.Runtime.InteropServices.Marshal.StringToHGlobalAnsi("local")
```

```
Dim intptrStruct As IntPtr = System.Runtime.InteropServices.Marshal.AllocCoTaskMem(System.
```

```
Runtime.InteropServices.Marshal.SizeOf(struct_IPI))
```

```
System.Runtime.InteropServices.Marshal.StructureToPtr(struct_IPI, intptrStruct, True)
```

```
Dim iReturn As Boolean = InternetSetOption(IntPtr.Zero, INTERNET_OPTION_PROXY,  
intptrStruct, System.Runtime.InteropServices.Marshal.SizeOf(struct_IPI))
```

```
End Sub
```

And this is how you use it:

PHP Code

```
<?php
```

```
Dim proxy as string = "Insert you're proxy here"
```

```
PROXYSET(proxy)
```

Activate it before you run you're webbrowser, so like this:

PHP Code

```
<?php
```

```
Dim proxy as string = "123.123.123.123:80"
```

```
PROXYSET(proxy)
```

```
Webbrowser1.navigate("https://hackforums.net")
```

Feedback appreciated!

This is not made by me! I'm just sharing it with you guys ?

Tristanpdrec - July 15, 2011, 6:21 am

Thanks! Worked like a charm!

TheBlackMarket - July 15, 2011, 6:32 am

Really nice, thanks for the sharing.

duyan13 - July 15, 2011, 6:49 am

nice but already post here....^^

Ethernal Five - July 15, 2011, 6:55 am

No problem guys ^^ 25 chars :P

HardOwned - July 15, 2011, 8:23 am

Thanks for sharing mate. :)

INFA?OUS - July 15, 2011, 10:37 am

Good share thanks for this.

Ethernal Five - July 15, 2011, 11:27 am

Thanks alot for you're support ^^

Rita Ora - February 13, 2012, 12:07 pm

Thanks for this mate, I have a question:

PHP Code

```
<?php
```

```
Dim proxy as string = "123.123.123.123:80"
```

```
PROXYSET(proxy)
```

```
Webbrowser1.navigate("https://hackforums.net")
```

Instead of "123.123.123.123:80" could you put (Textbox1.Text) and there be a list of proxies in TextBox1? And the equivalent for the link

The MammoTh - February 13, 2012, 12:12 pm

@Kandor of course you can. How to pump a old thread.
