Thread: [\[TUT\]Graphic Raindrops](#)

LochNess - June 9, 2011, 10:15 am

This is a tutorial about how to make rain drops in photoshop. This is a very easy tutorial made of 7 steps.

1. Open any image that you want to add rain drops too. In order to make this look more realistic, I'm going to use the following image of a green leaf.

[img]<http://shrani.si/f/2U/KW/3Xyd8AvK/green-leaf-veins.jpg>[/img]

2. Create a new layer named Drop1 and select the Elliptical Marquee Tool and make a selection which looks like a drop on the leaf.

[img]<http://shrani.si/f/3R/o7/25FmNfDI/raindrops2.jpg>[/img]

3. Next set press D on your keyboard to set the foreground color to black and the background color to white, or you can do this manually. After resetting these colors, select the Gradient Tool from the Tools Palette. In the tool options bar at the top of the screen, make sure that the first button, linear gradient is selected and that the foreground to background gradient is selected.

[img]<http://shrani.si/f/22/1s/1IayV8b/raindrops3a.jpg>[/img]

Now that the proper Gradient Tool settings have been selected, drag the mouse from the left side of the selected oval to the right.

[img]<http://shrani.si/f/O/fn/4x4L0Lzm/raindrops3b.jpg>[/img]

4. With the Drop 1 layer selected, change this layer's blend mode to Overlay in the Layers Palette.

[img]<http://shrani.si/f/1V/xs/2vF9WqMF/raindrops4.jpg>[/img]

5. Next right-click on the Drop 1 layer and select Blending Options. Apply the following Drop Shadow settings: Opacity 50, Angle 158, Distance 7, Spread 0, and Size 5.

[img]<http://shrani.si/f/26/5S/2tWDW5tr/raindrops5.jpg>[/img]

6. Apply the following Inner Shadow settings: Opacity 75, Angle 158, Distance 5, Spread 0, and Size 5.

[img]<http://shrani.si/f/39/13p/3rNwkQw4/raindrops6.gif>[/img]

7. For the Glow Effect, create a new layer named Glow and set the foreground color to white. Then select the Brush Tool and make a small dot in the drop. For making the curved drops select the Drop 1 layer then go to Filter > Liquify and make appropriate shape and click OK. Here is the final effect:

[img]<http://shrani.si/f/3W/L3/4dpjEIDX/raindropsfinal.jpg>[/img]

Enjoy!

The OP never said he made the tutorial, OP if you could post a link to the original tutorial and give credit. Thanks, also I would remove the Rep thing just sayin

Panda. - June 9, 2011, 8:46 pm

Dont ask for Rep youll just get -reped but nice tut btw

Qua - June 9, 2011, 9:37 pm

Include the link to the original thread.

Remove the rep thing.

Good... Find?

iPixel - June 9, 2011, 10:17 pm

Nice work if it's yours or not, I would have never found it myself.

Thanks.

Superman™ - June 10, 2011, 3:01 am

Superb...water drops looks real !

LochNess - June 10, 2011, 5:10 am

I had no idea who the real maker of this tutorial is, I have founded this tut on many places, and I did not say that I take credits for it right?

And do you have to be the maker to get reps?

All kind of help is help.

Kira999 - June 10, 2011, 4:13 pm

this is copypasta

too shoort?

DGisRIPPIN - September 23, 2011, 10:04 am

It actually looks really legit.

Thanks!

alisamer60 - September 23, 2011, 10:51 am

looks nice man...

i dont care who created it...thanks for sharing ...

Etheryte - September 23, 2011, 12:19 pm

A replica of this tutorial in layer style form can be found [/pm5x12\]over here.](#)
