Thread: [\[TUT\] How to fabricate a hand written note. \[TUT\] \[NOOB FRIENDLY\]](#)

Riggs - June 10, 2011, 5:03 am

Ok, so I know how everyone in the E-Whoring section loves pretending to be women. And how frequently everyone fails at it. Especially when your obese, bearded, Star Trek fan victims request a picture of your sexy man-titties with a tangible handwritten sign next to them.

Luckily for you, I just put Red Bull into my coffee machine and now I can visually see all the pleading noises you fuckers make when you need a 5 star tutorial.

So I'm going to make this...

<http://k.min.us/jdq46k.jpg>

Into this...

<http://k.min.us/idrliK.png>

Step 1:

<http://k.min.us/idv9Vq.jpg>

Step 2:

<http://k.min.us/ibdZRO.jpg>

Step 3:

<http://k.min.us/ibeiyu.jpg>

Step 4:

<http://k.min.us/ibajlw.jpg>

Step 5:

Navigate to Edit > Transform > Warp.

Step 6:

<http://k.min.us/ibarHS.jpg>

Step 7:

<http://k.min.us/ibeG4y.jpg>

Step 7:

This is optional. But if you have a Grunge brush, you can use it as an eraser with a high Opacity and a low Flow value to make the pen look like it's partially worn away.

This tutorial is simple as fuck, so if you have any questions don't PM me because I wont answer. I'm far too wasted to revise any of what I just said. If this helps you make bank send me a donation.

Riggs out, fuckers.

Boo. - June 10, 2011, 5:07 am

Wow. I never thought of it being so easy haha! :P How did you warp it? I'm a PS newb!

ChocolateBear - June 10, 2011, 5:08 am

Excellent.. This is a brilliant way to convince people that we're "real".

Thanks for this, repped.

I'm assuming you're deviating from my tutorial and using a text font instead of hand-writing it with the brush yourself. You need to 'rasterize' that layer first in order to transform it. To do this, navigate to Layer > Rasterize > Layer.

I didn't use any font. I wrote it myself with a graphics tablet. But it's just as easy to do with an optical mouse, you just need to zoom in to the picture to get accurate and swift movements.

No, he used mine. I did this to a couple of pictures for him prior to his tutorial surfacing because he asked for my help and said he would pay me. I helped and he didn't pay me. Then he used my efforts as a foundation for his own tutorial and did a shit job of it.

That's why I made this and neg repped him, because he tried to rip my work and did a shit job of it.

Unbelievable how much BS you're talking.

1. I didn't even know how you were doing it except with the graphic tablet. I used the technique Anonique gave me here <https://hackforums.net/showthread.php?tid=1361390> and made my own tests with it.

2. You are bad at lying. I said as soon as I'd get my l33t I'd vouch for you, which I still will, because you did a good job. But nowhere in my PM's I ever spoke about paying you. And remember the

saying "I don't ask for payments?" The only one I said was the second one where I said if I get him I'll give you money, but as you should know he will receive the picture next week, so I didn't get any money yet.

3. I didn't use any of your efforts as said above, I used Anonique's hints to do it. And I did the tutorial because there wasn't a tutorial about that in the forum anywhere, so I thought why not do it for the community, you knew the technique way before me and could have made one ;)

Hurr durr, you said you'll give me money if you get 'that one'.

I've already sent you 'that one'. So you've already got 'that one'.

So you'll give me some money next week or something? Cool story bro.

Spa0 - June 11, 2011, 4:02 am

Okay, now I get your point. You thought the "that one" was relating to the picture. What I ment was if I get that one, the slave, I'll give you the money. Otherwise I wouldn't have said "if", I'll talk to the slave and see how I go.

Thanks for the help & the Tut Riggs,

Here's my result:

[IMG]<http://img151.imageshack.us/img151/418/writingf.jpg>[/IMG]

Also a Tip for others on a Netbook or Mini..

The minimum resolution required for PS cs5 is 1024x768 but minis max at 1024x600.... so the "Save as" Dialog box wont work..

There isn't a "real" solution to fix this, but the work around is to change your layout to portrait and turn the mini sideways lol....

Silly but it worked :P

hope that helps

Riggs - June 11, 2011, 11:06 am

extreem, I'm happy to see you're using my tutorial, but I can see you're using a text font, instead of a brush to hand-write it yourself. So I would recommend warping the text a little more, as the exclamation marks in your note wouldn't keep such a straight line on the side of the breast if the note was genuinely hand-written. If you need help, let me know.

I tried to warp it with what I could figure out.... I only see "preset" warp choices in the drop down, it's different than what you show in your sample, like:

If you navigate to Edit > Transform > Warp, the box in the top left should automatically preset itself to Custom. You should then be able to warp the text the exact same way I did.

If the warp effect doesn't allow you to select Custom as the preset, it's simply because you haven't 'Rasterized' the text layer yet. To Rasterize it, you should select the text layer and then navigate to Layer > Rasterize > Layer.

Don't worry about noob'ness bro, we all started somewhere at some point and you seem like a pretty fluent beginner to me. Let me know if you have any problems.

Dark Purple, Dark Blue, Dark Red all work well. You can experiment with changing the Fill value of the selected layer to see what works best with the texture the layer is sitting on.

I actually use a Graphic Tablet to write mine, which makes it quick and convenient. If you don't yet have one, a tablet makes for a good graphics investment asset. If you prefer to save your money, you can get almost the exact same precise effect over a longer period of time by zooming in very far

and using a standard mouse.

(Jun 10, 2011 05:03 AM)Riggs Wrote: [\[CITE\]](#) Ok, so I know how everyone in this section loves

pretending to be women. And how frequently everyone fails at it. Especially when your obese, bearded, Star Trek fan victims request a picture of your sexy man-titties with a tangible handwritten sign next to them.

Luckily for you, I just put Red Bull into my coffee machine and now I can visually see all the pleading noises you fuckers make when you need a 5 star tutorial.

So I'm going to make this...

Step 3:

Navigate to Edit > Transform > Warp.

Step 6:

Step 7:

This is optional. But if you have a Grunge brush, you can use it as an eraser with a high Opacity and a low Flow value to make the pen look like it's partially worn away.

This tutorial is simple as fuck, so if you have any questions don't PM me because I wont answer. I'm far too wasted to revise any of what I just said. If this helps you make bank send me a donation.

Riggs out, fuckers.

Instructions weren't clear enough, got my dick caught in a ceiling fan.

Jokes, very nice guide Riggs.
