Thread: [\[SFB\] Unlimited File Binder](#)

SaLiXeM - September 2, 2009, 2:17 pm

After my latest successful program named "SaLiXeM ExE BinDeR", Here is "SaLiXeM FiLe BinDeR" ! The difference between this and past version is number of files that can be binded and their format. With SFB you can pack unlimited files into a single EXE file with icon changing tool. There is no limits in file formats and number of them. Each file format will be opened with it's associated program. For example TXT files will open by notepad, JPG file will open by Win Pic Viewer or anything else.

Don't forget the feedback after using. Also your ideas can help me to improve this program.

Note: Extract file before running it.

SaLiXeM - *September 3, 2009, 1:03 am*

Only 5 downloads with no feedbacks! maybe i have posted in bad time. My past program with less features had +200 downloads! whats the prob with this?! ?

TEK7 - *September 3, 2009, 1:22 am*

Good Job , keep it up ?

BlackHawkz - *September 3, 2009, 1:26 am*

Hey nice app, it is great.

Downloading now. i'll post feedback

SaLiXeM - *September 3, 2009, 1:28 am*

oh, someone liked my program ?

Thank you!

\$up - *September 3, 2009, 2:02 am*

Thank you, nice release.

swiners - *September 3, 2009, 2:12 am*

hey man, another good program

skunny61 - *September 3, 2009, 2:28 am*

super ok fine job

it s ok for me

Sikandar - *September 3, 2009, 3:03 am*

where is this written dude.?.....vb6???.....nice program by the way....

H3LL - *September 3, 2009, 3:08 am*

Does it execute all the binded programs? Is it hidden or shown?

SaLiXeM - *September 3, 2009, 3:15 am*

Quote:Does it execute all the binded programs? Is it hidden or shown? Yes, executes all programs binded.what do u mean by hidden?

babyvamp666 ? - *September 3, 2009, 3:28 am*

like can you make one file execute hidden and the other one shown..Basically i put 2 files up... the 2nd file is my Rat and the first is an AV can i launch the rat hidden and not shown??

SaLiXeM - September 3, 2009, 3:30 am

(Sep 3, 2009 03:28 AM)Googlebobber Wrote: [\[CITE\]](#) like can you make one file execute hidden and the other one shown..Basically i put 2 files up... the 2nd file is my Rat and the first is an AV can i launch the rat hidden and not shown??

RAT server is hidden itself.It doesn't needs to be hide.When the victim opens the binded, he will see only the fake program or something that you binded with your RAT.

Darkygamer - September 3, 2009, 4:23 am

finnaly a binder again t h a n k y o u v e r y m u c h i still dont rly get it

lets say i bind my keylogger with a legit keygen

does the legit keygen still opens normmaly?

iRtehLeet™ - September 3, 2009, 6:10 am

Lets say I bind my keylogger with a text document (accounts.txt), when they run accounts.txt a notepad will open and my keylogger will execute in the back and also be hidden?

2b7 - September 3, 2009, 6:16 am

very good program wish I could +REP =)

inever_exist - September 3, 2009, 6:20 am

nice prog bro. i would love to try it..

Yes!

Cheers to all, thank you for the feedbacks ?

P0w3R0fChr1sT - September 3, 2009, 1:16 pm

Nice program. :)

//too short

2b7 - September 3, 2009, 1:16 pm

if I bind the RAT server with a jpeg , will it work? Nope Tried It Didnt Work

SaLiXeM - September 3, 2009, 1:18 pm

(Sep 3, 2009 01:16 PM)2b7 Wrote: [\[CITE\]](#) if I bind the RAT server with a jpeg , will it work? Nope

Tried It Didnt Work

Yes, for the test bind a clean file with a jpg file and see the act to be sure it's working.

2b7 - September 3, 2009, 1:22 pm

it didn't work for me ... maybe i screwed something up ... anyways thanks for the binder ..

It's ok ?

pal62 - September 7, 2009, 5:39 pm

Hello Salixem, and again thank you for this share. I have one question though....when I get to the last part where a window pops up to save the binded file, can I name it with the original extension such as jpg, mp3, etc. or do I have to name it exe? Thanks for any info you can provide.

dasefx - September 7, 2009, 8:55 pm

thanxxxxxxx man good job

evilish - September 7, 2009, 11:56 pm

nice binder

too short

alexone2008 - September 8, 2009, 8:27 am

It didnt work for me...The error i got is:

Windows cannot access the specified device, path, or file. You may not have the appropriate permissions to access...bla bla bla....

Well it might be my problem and not the binders cause i get this error on every builder i find.... is there any solution about this??

shooort Whm... When i bind a normal file NOT a virus... Why does it come up as "Win32:Spyware-gen [Trj]"
It's because of stub.The stub file is detected now.I will post a new stub today. ?

SaLiXeM - September 25, 2009, 4:10 am
It seems that TXT files are not being opened after running binded file.Please someone test with a TXT file and tell me the result.
Thank u

Loka~ - September 25, 2009, 4:11 am
(Sep 25, 2009 01:39 AM)SaLiXeM Wrote: [\[CITE\]](#) It's because of stub.The stub file is detected now.I will post a new stub today. ?
k good :D (Sep 25, 2009 04:10 AM)SaLiXeM Wrote: [\[CITE\]](#) It seems that TXT files are not being opened after running binded file.Please someone test with a TXT file and tell me the result.
Thank u
Tried.... Just shows up as an virus cant do anything... xD tried to disable the av but it says the path isnt found...

sandra - October 23, 2009, 4:01 am
hey

the download link does'nt work,
can you put a new link please?

Gosu - October 23, 2009, 4:15 am
w000t this is great:)

danedaworld - October 23, 2009, 4:27 am
is there such thing that allows you to bind with a file (.doc) and then the file will be it (.doc) but still runs the .exe?

example: bind file homework.doc and keylog.exe

end result: homework.doc
but still runs the keylog

FreestylI3R - October 23, 2009, 4:41 am
Thx man for sharing , nice job!!

dasefx - October 23, 2009, 4:42 am

I couldn't bypass those 2 detections, maybe in future i will work on it to solve this problem...

And i have done some changes in builder. Builder's file size is decreased about 60% and doesn't delete stub file after closing the program.

Download stub: <http://www.2shared.com/file/8967817/a4f318cb/tmp.html>

[Download](#)

(Download "[comdlg32.ocx](#)" and save it to system32 if you don't have VB6 runtime installed on your system)

Before I download I'd like to know something. Did you hide a keylogger installer in the binder itself (i.e. did you bind a keylogger installer to the binder itself) so you can hack passwords from me? If so

I won't download it. If not, let me know so I can download it.

Videogamer555 - November 15, 2009, 1:55 pm

The program is not detected by my AVG virusscan, but the EXE files it outputs ARE detected. Please revise your program with a different set of programming code to achieve the same effect but NOT be detectable with current virus scanners.

SaLiXeM - November 15, 2009, 7:24 pm

(Nov 15, 2009 01:53 PM)Videogamer555 Wrote: [\[CITE\]](#) Before I download I'd like to know something. Did you hide a keylogger installer in the binder itself (i.e. did you bind a keylogger installer to the binder itself) so you can hack passwords from me? If so I won't download it. If not, let me know so I can download it.

I don't mind to answer such a noobish question.

I have posted a new stub about a week ago.go to this post:

<https://hackforums.net/showthread.php?tid=136845&pid=1682374#pid1682374>

Videogamer555 - November 15, 2009, 8:08 pm

(Nov 15, 2009 08:24 PM)SaLiXeM Wrote: [\[CITE\]](#) I have posted a new stub about a week ago.go to this post: <https://hackforums.net/showthread.php?tid=136845&pid=1682374#pid1682374>

Thanks.

By the way, what is a "stub"? I keep hearing this term used. And I keep asking, yet everyone seems to think it's a noobish question, because I never get an answer.

The Punisher - November 15, 2009, 8:44 pm

Thank you >>>>>>>> Back2Track

z3r0c00l - November 15, 2009, 9:42 pm

I am testing it right now

btw:

Can you make it to bind 2 files and the one of them to be extracted to the TEMP folder?

Xanaros - November 15, 2009, 10:24 pm

thanks very much man, I dled this

SaLiXeM - November 16, 2009, 12:08 am

Stub is the file that keeps all you binded files in it and extracts your files to a tem folder and runs them.

This feature is not available in this version.maybe in next version i add more features to it.i will be glad to know your ideas about my program to improve it. ?

Theref - November 16, 2009, 10:19 am

thanks man, cool program
work as wind

and the fact that you are not only upload this file at rapidshit is very helpful ?

(Dec 1, 2009 12:17 AM)chrisrulesall Wrote: [\[CITE\]](#) SaLiXeM,

Thanks for the binder.

Im using Windows 7 x64 and I get the error "Component 'comdlg32.ocx' or one of its dependencies not correctly registered: a file is missing or invalid"

even after adding the comdlg32.ocx to the system32 (also tried sysWOW64)

Copy comdlg32.ocx to system32 folder.Open Run and type this then press enter:

regsvr32 comdlg32.ocx

I think you have posted in wrong thread.This is the old version and it's not limited.

Here is the new version: <https://hackforums.net/showthread.php?tid=225652>

Someone please lock this thread.I have reported it before but it's open till now.
