I do both website design and graphical work. I prefer to do banners, advertisements or other similar forms. I am not very good with signatures however I can do some pretty awesome text signatures.

I have done thread graphics for a number of popular HF users, one of them being Carbon.

This is not all of my work, however more can be viewed [here](#).

Depending on the work load involved and the way my work will be put to use is how I will charge you. EX: If it's for a HF usergroup I'll consider doing it for free as you will not be profiting from it, however if its for a product in the marketplace you will be charged.

Please post all requests in this format.

Sorry for that,
Can you do signature?
for Hf's FB group? It's non profit.
