Thread: [Make username click-able - Welcome back, username](#)

Professor 0110 - June 11, 2011, 6:37 pm

Hello, wouldn't it be better to have the username in the Welcome back, username. message click-able? I myself tend to go to the user control panel then click my username to check my stats, with this it will be one click away. :)

This was already suggested a few days ago.

It only takes 10 seconds out of your life to go to the Control Panel, it sounds like a good idea but I don't think it bothers many people.

It only takes 10 more seconds. You can tell your fat if your to lazy to click something

^-^

i jsut hit CTRL+F and type lancer
and after the top it goes to bottom where i can click it.

it is bothersome.

I agree. Pretty nice suggestion, the simple things count.

And, if this is approved why not add a bit fly link to it as-well that way this suggestion actually does something for the community.

It does something actually, when you are in a thread and you haven't posted you can't just CTRL+F yourself.

Seems like it was accepted and added :))
