Hello this is the site I tried to root the site but I m starter and can not understand rooting process.

<http://www.jhcustomhomes.com/admin/login.php>

username : admin
password : 1'or'1'='1

I tried many time to upload the shell but failed.
I hacked this site but can not deface some one deface this.

Go to manage projects and edit there you can upload images etc.
etc and much more you can do .

Thanks and learn me rooting rfi lfi. thanks.
