McAfee Total Protection 2009+PRECRACKED

[img]http://i36.[censored].com/2zz5ms3.jpg[/img]

[img]http://i35.[censored].com/idd6kg.jpg[/img]

Anti-virus

Anti-spyware Anti-spam

Anti-phishing Two-way Firewall

Advanced Web Site Safety Ratings Identity Protection

Parental Controls Data Backup

Total Protection: Get the maximum power of McAfee protection in one powerhouse package. All the security you need.

Features:

Integrated anti-virus, anti-spyware, firewall, anti-spam, anti-phishing, and backup technologies work together to combat today's sophisticated, multi-pronged attacks. Spyware protection detects, blocks, and removes spyware and adware.

Better protection based on new integrated anti-virus, anti-spyware engine. Now also detects and blocks tracking cookies.

New! McAfee® Anti-Theft Protects your personal documents, financial records and other important files from hackers and thieves by storing them in a secure vault. New! McAfee® SiteAdvisor Plus Extends safety ratings to links in emails and instant messages, and actively shields your PC from dangerous websites.

New! Do Not Disturb Mode - Watch movies, slide shows and play games uninterrupted as McAfee security service intelligently defers tasks, updates and alerts when you're in full screen. Backup & Restore saves copies of your most valuable files wherever you want, encrypting and compressing your files on a CD/DVD, or USB, external, or network drive.

Home Network Protection monitors your entire network for security weaknesses, and lets you easily share files and printers. McAfee® Image Analysis enhances content protection by protecting your family from potentially offensive content and pictures.

McAfee® SystemGuards watches your computer for specific behaviors that may signal virus, spyware, or hacker activity. McAfee® X-Ray for Windows detects and kills rootkits and other malicious applications that hide from Windows and other anti-virus programs.

McAfee® SecurityCenter™ makes it simple to review the PC security status, check for updates, and fix potential security issues. McAfee® Network Manager monitors PCs across your network for security weaknesses so you can easily fix security issues from one centralized network map.

Panda Global Protection2009+serial

[img]<http://www.ee77ee.com/vb/imgcache/20417.jpg>[img]

Enjoy optimum security and safeguard your valuable data with Panda Global Protection 2009. It protects you from viruses, spyware, rootkits, hackers, online fraud, identity theft and all other Internet threats. The anti-spam engine will keep your inbox free from junk mail, while the Parental Control feature ensures your children can use the Web safely. You can also back up important files (documents, music, photos, etc.) to a CD/DVD or online and restore them in case of accidental loss or damage. And thanks to the new Collective Intelligence technology, the solution is now much faster than previous versions.

Features :

Anti-Malware Protection

Identity Theft Protection

Safe Internet Browsing

PC Optimization

Scans files in real-time and on-demand.

Scans emails before they reach your inbox, regardless of your email program.

Scans Internet traffic regardless of your browser type.

Scans Instant Messaging traffic in MSN Messenger, Windows Live Messenger, Yahoo Messenger and AOL.

Removes all traces of clutter left by spyware on your PC.

Genetic Heuristic Engine combines advanced <http://www.ee77ee.com/vb/imgcache/20417.jpg>

algorithms to detect new variants of the most dangerous malware families.

TruPrevent Technologies 2.0 silently analyze the behavior of programs, blocking those that try to damage your PC. This last line of defence blocks zero-day targeted attacks and terminates any malicious activity that has evaded traditional protection systems.

Smart auto-configuration allows good programs to run while blocking malicious ones.

Shields your PC from hackers on the Web.

Wireless Monitor protects your wireless network from intruders.

Intrusion prevention blocks known and unknown hacker attacks and vulnerability exploits.

And more...

Platform: Windows 2000, Windows Vista

System Requirements: There is no specific requirements

Language: English, German, French, Italian, Spanish, Swedish, Portuguese, Etc

Zone Alarm Antivirus2009+Firewall+keygen

[img]http://pad3.wikihow.com/images/a/a8/Zonealarm_0.png[/img]

The ZoneAlarm with Antivirus award-winning firewall blocks hackers and other unknown threats, while comprehensive virus protection stops worms and viruses protecting you against emerging viruses before they attack.

Here are some key features of "ZoneAlarm with Antivirus":

- Antivirus

Award-winning antivirus stops, blocks, and removes attacks before they infect your PC.

Advanced Anti-Virus Engine - delivers the broadest and deepest protection that stops malicious software that other systems ignore.

New Scan Modes - run faster, deeper, and provide customization options.

Kernel-Level Virus Prevention - protects at the operating system level.

Fastest Updating Signature List - detects and stops even the most recent viruses that others miss.

Inbound and Outbound MailSafe - quarantines suspicious attachments, stops harmful messages before viruses transmit to your computer.

- #1 Firewall

Proactively protects against inbound, outbound, and program attacks while making you invisible to hackers.

Inbound & Outbound - monitors and blocks threat traffic in either direction.

Full Stealth Mode - makes you invisible to hackers.

Kill Controls - instantly disable malicious programs.

Passes Independent Leak Tests - to verify complete blocking, see test results.

- Root & Boot Protection

Keeps YOU in Control of your computer. Guards your operating system from rootkits and other attacks while also providing full protection during startup.

Malwarebytes' Anti-Malware+serial

[img]http://pad2.wikihow.com/images/f/fd/MALWARE_BYTES_218.png[/img]

Have you ever considered what makes an anti-malware application effective? We at Malwarebytes have created an easy-to-use, simple, and effective anti-malware application. Whether you know it or not your computer is always at risk of becoming infected with viruses, worms, trojans, rootkits, dialers, spyware, and malware that are constantly evolving and becoming harder to detect and remove. Only the most sophisticated anti-malware techniques can detect and remove these

malicious programs from your computer.

Malwarebytes' Anti-Malware is considered to be the next step in the detection and removal of malware. In our product we have compiled a number of new technologies that are designed to quickly detect, destroy, and prevent malware. Malwarebytes' Anti-Malware can detect and remove malware that even the most well known anti-virus and anti-malware applications fail to detect. Malwarebytes' Anti-Malware monitors every process and stops malicious processes before they even start. The Realtime Protection Module uses our advanced heuristic scanning technology which monitors your system to keep it safe and secure. In addition, we have implemented a threats center which will allow you to keep up to date with the latest malware threats.

Activating the full version unlocks realtime protection, scheduled scanning, and scheduled updating. For consumers and personal use, it is a one time fee of \$24.95. For corporate and business customers, annual licenses are required, please see our Corporate Licensing program.

Key Features

- Support for Windows 2000, XP, and Vista (32-bit and 64-bit).
- Light speed quick scanning.
- Ability to perform full scans for all drives.
- Malwarebytes' Anti-Malware Protection Module. (requires registration)
- Database updates released daily.
- Quarantine to hold threats and restore them at your convenience.
- Ignore list for both the scanner and Protection Module.
- Settings to enhance your Malwarebytes' Anti-Malware performance.
- A small list of extra utilities to help remove malware manually.
- Multi-lingual support.
- Works together with other anti-malware utilities.
- Command line support for quick scanning.
- Context menu integration to scan files on demand.

Usage

Simply download Malwarebytes' Anti-Malware from the one of the links below. Double click the downloaded file to install the application on your computer. Once the application is installed, double click on the Malwarebytes' Anti-Malware icon to start the program. When the application is open, select Scan and the application will guide you through the remaining steps. Serial included in rar folder!!

Trojan Remover 6.8.1+carck

[img]http://pad3.wikihow.com/images/thumb/6/6c/Trojan_remover_942.png/505px-Trojan_remover_942.png[/img]

Trojan Remover aids in the removal of Malware - Trojan Horses, Worms, Adware, Spyware - when standard anti-virus software either fails to detect them or fails to effectively eliminate them. Standard antivirus programs are good at detecting this Malware, but not always so good at effectively removing it.

Trojan Remover is designed specifically to disable/remove Malware without the user having to manually edit system files or the Registry. The program also removes the additional system

modifications some Malware carries out which are ignored by standard antivirus and trojan scanners.

Features:

Trojan Remover scans ALL the files loaded at boot time for Adware, Spyware, Remote Access Trojans, Internet Worms and other malware. Trojan Remover also checks to see if Windows loads Services which are hidden by Rootkit techniques and warns you if it finds any. For each identified Trojan Horse, Worm, or other malware, Trojan Remover pops up an alert screen which shows the file location and name; it offers to remove the program's reference from the system files and allows you to rename the file to stop its activation.

Trojan Remover writes a detailed logfile every time it performs a scan. This logfile contains information on which programs load at boot-time, and what (if any) actions Trojan Remover carried out. The logfile can be viewed and printed using Notepad.

Trojan Remover is set to automatically scan for Malware every time you start your PC (you can disable this automatic scan if you wish).

Trojan Remover is designed to work on Windows 98/ME/2000/XP/Vista. The program is not, at present, compatible with any 64bit version of Windows.

Quote:http://uploading.com/files/F79UXC9W/Trojan.Remover.v6.8.1.2587_CRKEXE-FFF.rar/ Spy Hunter+crack

[img]<http://www.enigmasoftware.com/wp-content/themes/default/images/products-img/spyhunter-big.jpg>[/img]

Trojans, Adware, and Spyware are programs that are installed on your computer without your knowledge. They allow companies to monitor your Internet browsing patterns, and even allow companies to inundate you with those annoying "pop up" ads! Most people are familiar with freeware, shareware, cookies, media players, interactive content, video codecs and peer-to-peer (P2P) file sharing. What they may not realize is that some of the aforementioned may contain code or components that allow the developers of these applications and tools to actually collect and disseminate information about those using them.

spybot search and destroy 1.6.2(No need to crack)

[img]http://www.wikihow.com/images/9/91/Spy_bot_sarch_and_destroy_27.png[/img]

Spybot - Search & Destroy detects and removes spyware, a relatively new kind of threat not yet covered by common anti-virus applications. Spyware silently tracks your surfing behaviour to create a marketing profile for you that is transmitted without your knowledge to the compilers and sold to advertising companies. If you see new toolbars in your Internet Explorer that you haven't intentionally installed, if your browser crashes inexplicably, or if your home page has been "hijacked" (or changed without your knowledge), your computer is most probably infected with spyware. Even if you don't see the symptoms, your computer may be infected, because more and more spyware is emerging. Spybot-S&D is free, so there's no harm giving it a try to see if something has invaded your computer.

Spybot-S&D can also clean usage tracks, an interesting function if you share your computer with other users and don't want them to see what you have been working on. And for professional users, Spybot-S&D allows you to fix some registry inconsistencies and extended reports. A list of all the application's features is als

can you post on another side beside that?

max600 - September 3, 2009, 9:47 pm

yes,why not brother i,ll post it! tell me which one you want!!

texeon - September 4, 2009, 4:39 am

Hi good post...

BUT!!!

Spy hunter is a hoax program, it tricks the user into thinking that there are threats on their computer, if you install spybot on your computer with it, it will tell you its a liar.

If you do go through deleting the threats (after buying it, you could be giving your credit card details away) your actually deleteing the malicous classes that microsoft have made to protect you from visiting dangerous websites, just go into reg edit and look for the classes you will see the sites, apparently spyhunter finds zlob all over your computer in 1000's of threats<<<<<<<LIE!!!

Please tell me if i'm so wrong and that you will swear your life to it.

But listen first

When our computer was dying from viruses and spyware and so on, i downloaded spyhunter from a site called bleeping computer, it found 1000's of bad things name Zlob.video trojan and Zlob.Adult.Pass and more variants, and was located under files called Classes

When i downloaded and installed spybot it removed it without me confirming and told me it was bad, after it was gone, i had less problems, and the computer survived.

Please take this into mind.

If you don't believe what i'm saying, or think it is not entirely correct give it a go.

AND DON'T START INSULTING ME IF YOU THINK I'M WRONG.

thanks for reading.

thanks for reading.NO no its ok,that's your opinion and i appreciate it and thanks for this!!

Both progarms like SPYBOT and SPYHUNTER already Installed in my computer and perosonally I don't have any problem,If you see deeply SPYHUNTER reveals your wrong software REGISTRIES where SPYBOT search only TROJAN or any other harmful REGISTRIES!!! So basically SPYHUTER showes a LOTS OF error where SPYBOT didn't!!!Now before making any step you should see the erros ,and thats make the differen't!!

still there lots of option left you can choose your's thanx for you comment!!!!

Yeah bro this is true and its nothing spectacular...

Almost every AV company is offering either a online scan where they detect "1000" viruses on your comp or they let you download their tool and after a free scan they bomb you some major report with thousand infection ...

Its a old trick so do not take it to serius because who is buying those shit anymore...get a cracked and trusted tool from a trusted member like this poster is and enjoy the shit !!

Anyway very nice post i can not give you rep but i will rate the thread 5 stars ?

(Dec 2, 2009 03:13 PM)Coders Central Wrote: [\[CITE\]](#) where the fuck you find all these lol, ok nice upload :DLOL,nice qutn,Thanks :)?
(Dec 4, 2009 12:46 AM)ProPiers Wrote: [\[CITE\]](#) McAfee is seriously bad. How can it even be on the 'Mega List'

First of all the RAM usage is terrible (even though I have 4GB)
2nd of all the CPU Usage is terrible.
sorry but others find it useful,Thanks ?
Third of all the site adviser lies? (Dec 4, 2009 01:37 AM)markllego Wrote: [\[CITE\]](#) im not trusting all the files here...Trust as others also did,Thanks ? (Dec 3, 2009 06:54 AM)ThyRazor Wrote: [\[CITE\]](#)
Hope you didn't steal the Zonealarm link from my thread and reuploaded it. Checking if you did.
Have some scene,I made this Thread before you LMAO ?
