Thread: [Chrome 11 is noticeably slower than Chrome 10](#)

linksku - June 13, 2011, 1:44 pm

About a week or two ago, I updated Chrome 10 to Chrome 11 (2D icon). I noticed that it executes Javascript a lot slower than before. Many sites would freeze for 10 seconds while scripts were executed.

Is anyone experiencing this problem?

The Stig - June 13, 2011, 1:45 pm

Chrome 11? I am on chrome 12 :) And i have no problems. But however, it could be JAVA is not updated.

jstine10 - June 13, 2011, 2:06 pm

Chrome 12 just came out its even faster!

linksku - June 13, 2011, 8:13 pm

I downloaded Chrome 12, and it's even worse. I'll try updating Flash and Java and see if that helps.

Chrome is generally just a buggy browser. Switch to a better one like Opera... or internet explorer.

Chrome is one of the best browsers in the world, with internet explorer being one the worst with Opera. Many tech experts say that for general safety and reliability then go with firefox or Chrome.

OT:

I find chrome 12 noticeably faster. Something may have gone wrong when you upgraded, try clear your cache and temp files. And if that doesn't help then just re-install google chrome.

raamee - June 14, 2011, 5:55 am

Cant say opera is worst. Its good.
