Thread: [?Guide: Custom GUI's?](#)

.Astro - June 13, 2011, 9:04 pm

This is just a quick directory of all the custom made themes found on this forum. It also includes DotNetBar, and other applications like it.

Compilation of AeonHack's themes

<https://hackforums.net/showthread.php?tid=721264>

How to Install the Themes

- 1.) Create or open an existing VB application.
- 2.) Add a new class to your project.
- 3.) Replace all of the code inside the new document with the appropriate code.
- 4.) Build your project; if you don't build the controls they won't be in your toolbox.
- 5.) Drag n' drop!

Credits to AeonHack for the small tutorial.

DotNetBar

DotNetBar is a Visual Studios component that allows you to customize your form the way you want it with their given components. You can use themes such as the ones presented in Microsoft Word 2010, and other programs like it.

Is this software paid? Yes, it is paid. However there are cracks for it. But I will not go in full detail about that.

Is it easy to use? Yes, and no. It depends on how well you can find things out on your own, but there are TONS of tutorials on [Google](#) for this.

You can download a trial version of DotNetBar [here](#).

Banks? - June 13, 2011, 9:05 pm

You should use [img][/img] tags for the pics. ?

.Astro - June 13, 2011, 9:06 pm

It won't let me since there is more than 10 images on the post.

Kousha - June 13, 2011, 9:14 pm

Thanks for this list, I won't use this, but appreciate you contributing :)

.Astro - June 13, 2011, 9:17 pm

To be honest, I probably won't use it either, but it's always a nifty resource to have around.

And thanks for the comment.

Hydrogen - June 13, 2011, 9:25 pm

Nice list. Glad to see my themes up there too. :)

.Astro - June 13, 2011, 9:27 pm

Thanks for the comment, Hydrogen.~

MaxPain - June 13, 2011, 10:25 pm

Yeah , thanks I need to have all themes in just one thread!! , I want to add that is funny that all themes are based on AeonHack Whatever haha

.Astro - June 13, 2011, 10:27 pm

I don't see how that's funny .. ?

From what I know of, AeonHack is one of the only people who knew how to design GUI's in GDI.
Until he made that Youtube video, everyone has mostly been changing colors, etc.
And by the way, a majority of them are, not all of them.

The MammoTh - June 13, 2011, 10:28 pm

Good job, looks really good.

Coleak - June 14, 2011, 2:42 am

Some of these are pretty cool, not that I would use them, but nonetheless someone should find it helpful.

hipio - June 14, 2011, 3:44 am

Going to use some of them, I think.

Maybe combinate them xD

We will see

Cody8295 - June 14, 2011, 3:46 am

Protip: put those images in a [img] tag.

hipio - June 14, 2011, 3:50 am

(Jun 14, 2011 03:46 AM)Cody8295 Wrote: [\[CITE\]](#) Protip: put those images in a [img] tag.

He already explained why he didn't do that.

There is of a max of 10 Pictures in 1 post.

So he couldn't do that ^^

.Astro - June 14, 2011, 3:52 am

Yeah, as said above, there is a max limit of how many images can be in a post.

idb. - June 14, 2011, 4:03 am

(Jun 14, 2011 04:03 AM)idb Wrote: [\[CITE\]](#) Theres a way around that. Just saying. :x

I know, but he didn't use it soo

ra1d - June 14, 2011, 4:49 am

Just use this tag when you reached 10 images Code [hr] and then put the rest after the Code [hr]...
Easy as that ;)

Morbid Saint - June 14, 2011, 7:16 am

Thanks a lot for the share bro. :)

Ph03.nix - June 15, 2011, 6:24 am

Hey, nice collection bro.

Try to keep it up-to-date, cuz it gives a very good overview.

Big Thanks for this!

Here is the fixed version with links to the images.

ants2795 - June 15, 2011, 12:28 pm

Thank you for putting mine up, put it cannot compete with these for it is, shit xD

You forgot one:

<https://hackforums.net/showthread.php?tid=1309177>

Add some things like:

GUI making services.

How to code your own.

How to draw your own and apply it.

Then it will be A+

.Astro - June 15, 2011, 12:35 pm

There's a tutorial already on how to apply it.

This is a guide for finding custom themes, not making your own.
