hey!

i try to decrypt that first code with BASE-64 and gives me already "Errors in decoding"

btw

I downloaded crypter + stubs to my vm + my test comp

The server was 250kb after the crypt it was 500kb.

it didnt connect to my server "tried 2 different clients & Servers*

Ok first of all thankyou for the 1st Encryption error, I updated it.

And now i should SAY your a Total Noob, Check the stub Size, its 200kb it contains some junk to reduce detection so obviously when you crypt it with a Server of 250kb it will be around 500kb. ?

This Comment is from a guy who posts a thread asking to crypt is server for money and turns up on the same day posting 2 FUD Crypters, all members who tested it say it was fake.

And now, he has posted a thread with all the free crypters like this one, Legit public crypter, Zero crypter etc without even giving proper credits to his own sharecash link. Such an IDIOT ?

ADmins Please if you read this Check bloodom's threads and i recommend you to take Action.

GamersGodly - June 14, 2011, 6:41 am

how do i do the rev decrypt? i dont see it on crypto :'(

bloodom - June 14, 2011, 7:01 am

well, explain then why your crypter isnt working on

Win 7 DarkComet & CyberGate "Tried running on xp + win7"

XP SAME SAME SAME SAME SAME SAME SAME SAME

"Note other crypters works just fine;)"

Rev = reverse text

too short?

BolikaZ - June 14, 2011, 7:21 am

this one corrupting DarkComet :|

Lol, really??? xD xD its clean dude, if you dont wanna download then dont.

woody565 - June 20, 2011, 12:01 pm

Thanks for the share.

I have downloaded the crypter and extracted but get this error when trying to run
[IMG]http://i28.photobucket.com/albums/c209/danny_re/Untitled.jpg[IMG]

any ideas anyone?

arunbluez - June 20, 2011, 12:54 pm

IN google search For COMDLG32.ocx download. Download the File.

Paste the file at C:/Windows/system32 as well as c:/windows/syswow64

Open cmd. type cd c:/windows/system32
then type regsvr32 COMDLG32.ocx
do the same for syswow64

it will work fine then.

BLANKZ - June 20, 2011, 12:59 pm

Thansk good crypter fud :D

That error is caused BEcause U clicked on the stub. You need to download the Crypter file and place the stub file in the same folder then run the crypter.
