Thread: [\[TUT\]How to earn money from hacking websites, instead of defacing\[/TUT\]](#)

hich - June 15, 2011, 1:15 pm

" I've spent some hours writing this thread, i hope it will save somebody's life ! "

Hello guys,

I've seen about 90% of you posting in this section reporting your epic defacements, BRAVO !

I'm not blaming you, i'm not your father after all, i won't even say it's a bad or a good thing as it's not the subject here, you could do whatever you want, but if you have to chose between wasting your time defacing tons of websites or hack a few ones and earn some money, what will be your choice ?

A : Defacing of course ?

If this is your answer, don't bother yourself reading next lines, Au revoir !

B : I'm tired doing this, I need a better life ?

If you expect to get money from each hacked websites, let me stop you from the begining, what i'll be explaining is a process, you need a little work and some patience, that's all.

The step by step guide :

1- You have to get a hosting : You can start using a Shared hosting, but if you can move to a VPS or a Dedicated Server, don't miss it.

2- A website with something interesting. It may be a blog (Wordpress for instance), an Ebook website, or whatever you can do, but the major clue here is to chose a specific topic. Let's take Travel for instance.

Get an adsence account, or another CPA account like Commission Junction.

I just use my adscene account, and i earn about 300\$ monthly from any website i build. Of course i can improve this, i'm working on.

Set up your ads in your websites, in obvious areas.

3- You need traffic, if you're a SEO, you can take a large benefit from search engines, but as you can hack, it will be enough.

4- You have to get an Email marketing tool : i use Interspire, and i'm very satisfied, but you can use another tool.

5- Hack targeted websites : For this example, get some Travel websites.

6- Extract emails from the hacked websites : you can start but gathering about 20k, learn how things work, and get more.

7- Go to your Interspire (you have to set it up), create a contact list, import you contacts, create a short newsletter (Interspire has templates), and try to fix the sending limit at about 100 emails / hour for a shared hosting, 800 emails / hour for a VPS, and 1.2k emails / hour for a dedicated server.

8- Send your newsletter, expect a good trafic as it's a targeted newsletter to a targeted database, people will surely click on your ads as they're obvious, and you'll earn a lot of bucks.

PS : It's very easy, don't be lazy to miss it. Don't say it's complicated, close this thread and give up, all you need is a week to get all of this set up, you're already wasting months defacing, and get a look at your bank account, how much is in it ? Dude, you can change things now.

I'm here to answer your questions, i know you'll miss something, but with a little practice, you'll see you can improve your skills.

hich

Daenerys Targaryen - June 15, 2011, 1:18 pm

Well, that's interesting. But the mail problem is that I don't find many sites with a lot of members :p. Highest that i found was like 2000. But i want TENS OF THOUSANDS.

nikentic - June 15, 2011, 1:20 pm

I found one with 30000 yesterday. Thanks for the Interspire thingy :)

Water Antelope - June 15, 2011, 1:21 pm

god job on the tut man detailed

hich - June 15, 2011, 1:23 pm

You don't need quantity, but quality dude, and remember that these emails are targeted.

Besides, before hacking a website, check out if he sends a newsletter, this kind of websites has a huge mailing database.

regreg - June 15, 2011, 1:24 pm

We didn't know that thanks A L O T :D

We are not on 4chan here man.

If you can use it it's a good tutorial.

hich - June 16, 2011, 12:35 am

Let him miss this chance, may be he has something important to share with us :)

No??????? - June 16, 2011, 12:53 am

Not including that pic.

Don't be a dick man, this is possibly one of the most productive threads I have seen on the Web Hacking section sites in a long time. I know most of these things are obvious to the more experienced users but I feel they will be very useful to those new to hacking and may decrease the flow of defacement brag threads being made, if only slightly.

I have two suggestions to add, this method can also be enhanced and possibly sped up by:

1. Changing the ad links on a compromised site so their ads redirect to your ads or adf.ly etc.
2. Mass mailing can be accomplished far more efficiently by either making multiple free shared hosting accounts or just sending mail from compromised servers.

Again, this is mostly common sense, but is useful nonetheless.

A big Thank you for your contribution.

I don't pretend such a humble tutorial can do something against defacing attitude, but i won't hide i'll be glad to see less defacements in this honorable section.

Yes, i agree you can enhance this method, but i won't recommend a Mass mailing, as you can ruin all the business because your servers will be banned for spam, your contacts won't trust you as they will be bothered, i have an experience in this and i highly recommend the fixed rates.

My Respect ?

valentinas25 - June 16, 2011, 2:33 am

8- Send your newsletter, expect a good trafic as it's a targeted newsletter to a targeted database, people will surely click on your ads as they're obvious, and you'll earn a lot of bucks.

So here we need to send them our website url yes? so if i have hacked site with 10k members mabey i will get 100 ads clicked :) because atleast 3k ignore my newsletter, other just won't click on ads...But method is good, thanks

And mabey we can use CPALead to lock site and they must complete offer to open...And mabey we can use free hosting like blogspot we need hosting where we can add adsense code or cpa, and we can send newsletters with hacked site admin account....

hich - June 16, 2011, 7:26 am

@valentinas25 : You have to send a complete newsletter, with text and images, you also need to put links inviting the readers to click on to be redirected to your website, as the ads will be in an obvious area (on the top for instance), some of them will click on surely. If you get CPA programs offering you the possibility to include ads in your newsletter, it will be perfect.

Don't expect everyone will click on, if you get a 2% click rate, you're a master, as i've read articles about newsletters stats and experienced this myself, the rates varies depending to the topic, how you present things and so on.

You can use blogspot for your blog, but you need your own hosting to send the newsletters (you can use some softwares, but they all send to junk, and you need to be in the inbox of course to have good results)

Giga - June 16, 2011, 8:20 am

Very nice, should try it sometimes this summer. Thanks for the tip!

hich - June 17, 2011, 3:26 am

Summer will be hot for you mate :)

one80bysummer - June 17, 2011, 4:59 am

i think this is grey hat hacking correct me if im wrong

hich - June 17, 2011, 10:19 am

I would encourage a gray hacker rather than a defacer :)

hich - June 26, 2011, 6:48 am

I saw a mass defacing threads beeing posted these days, so i just wanted to the thread so more people can see it.

PrestigeWorldwide - July 15, 2011, 6:54 am

Very nice tut for the baddies who keep defacing. You should upload a shell to the server, and use a mass mailer script using their own servers.. Works much better :)

allthingworld - July 15, 2011, 8:07 am

Want to earn from hacked website just hack below websites and i will give you the way to how to earn lots of money within week from these website. These website are working illegal in india they will surely fraud with people but you can fraud with them.

1. www.marketviewonline.com
2. www.ebazarindia.biz
3. www.goldharvests.com
4. WWW.FSMGROUP.IN
5. www.sapphiregroup.in

I won't recommend a mass mailer (i've started using it in the very beginning), but it will demolish everything as it destroys the reputation of the server IP, and after a first mass mailing, everything you'll send will go to the junk (no readers, no clics).

Interspire is just perfect for me.

@allthingworld : May be you should open a thread and invite people to hack these websites, i'm just fine with what i'm doing. Thanks.

SIM-73089 - July 19, 2011, 8:45 am

This is actually a pretty smart Idea. Thanks ?

Will do after I finish reading the Python book I am reading now.
(Core Python Programming by Wesley J. Chun = "The Beast")

Routaruo - July 19, 2011, 10:27 am

Nice guide! I'm new to this and found it very useful!

-zerocool - July 19, 2011, 10:53 am

very nice idea brother..I Like it very much..

LulzSecurity - July 19, 2011, 11:25 am

Good, sell my shells on servers for 20\$.

muesli - July 19, 2011, 11:59 am

Thanks for the idea. Do you actually have to make a legitimate website though? Where do you get the content for your site?

Glitched - July 19, 2011, 12:16 pm

Just replace the urls with adf.ly links and add CPAlead to the page you hacked. Then mass mail from that server to get people to visit it. After your money is earned, get a new server.

CyberM@X - July 19, 2011, 1:16 pm

Well I like the idea ... but I have problems with getting traffic delivered to my website although .. cause I need more clicks & views at my adsense account -. I got like 0 \$ at it instead of my adWords ... I got a few around 35\$..

I will get into this as soon as I get back from crete :)!

hich - July 19, 2011, 4:43 pm

Thank you guys for your comments, i'm really glad you liked it.

(Jul 19, 2011 11:59 AM)muesli Wrote: [\[CITE\]](#) Thanks for the idea. Do you actually have to make a legitimate website though? Where do you get the content for your site?

Yes of course, and for the content it's easy. Think about a topic, search for an interesting ebook, and create a blog (wordpress will be fine as you can find many templates dedicated to AdSense) ;)

(Jul 19, 2011 12:16 PM)Glitched Wrote: [\[CITE\]](#) Just replace the urls with adf.ly links and add

CPAlead to the page you hacked. Then mass mail from that server to get people to visit it. After your money is earned, get a new server.

May be adf.ly will work for a while, but you need to act like a pro if you want long term revenue, but if you need the money just to get a server and after this you'll change your tactic, yeah this can be a good idea :)

(Jul 19, 2011 01:16 PM)0x3a-Maximus Wrote: [\[CITE\]](#) Well I like the idea ... but I have problems with getting traffic delivered to my website although .. cause I need more clicks & views at my adsense account -. I got like 0 \$ at it instead of my adWords ... I got a few around 35\$..

I will get into this as soon as I get back from crete :)!

All the webmasters have the same problem : TRAFIC.

But we as hackers can do much more than SEO, and this thread is an example.

Have a nice trip, too bad i haven't planed to visit it this summer :)

muesli - July 19, 2011, 9:35 pm

So when I'm making a blog I should basically just steal other people's stuff off the internet? Also what's a CPA I could get into easily? Thanks for your help mate.

ptujskinorcek - July 20, 2011, 2:05 am

Wow, that was interesting. I guess I will start learning how to hack websites now :D

hich - July 20, 2011, 4:34 am

Free ebooks exist. I'm using Adsense, and it's okay for me. Other CPA programs are almost about leads, you can use them but they may discourage you.

mayee.28 - July 20, 2011, 4:48 am

Nice one mate !!!

Keep going !!!

Have a happy hacking !!!

???

Stage6 - July 20, 2011, 5:26 am

Simply awesome tut bro :) !

Thanks

hich - July 21, 2011, 11:18 am

I'm very glad you've enjoyed it guys.

atthebull - July 29, 2011, 1:58 am

or alternatively, you can sell the emails~, or a step further...

hich - August 12, 2011, 8:34 am

Yeah, why not if you get a buyer .

PS : I'm starting getting 400 Euros / month.

cheddarcheese - November 8, 2012, 3:14 pm

Nice thread. I've just started hacking sites so this is something to work towards :)

Schitzl0 - November 8, 2012, 4:25 pm

Hehe nice, then i have something more from owning sites... no deface just earning money =)

Gee4rce - November 8, 2012, 6:10 pm

Nice Tutorial, very Constructive and HQ!

My 60k and a 4.5 million DB could come in Handy there ;)

Even if it's not in my interest at the moment, i will shurely keep this in mind ?

Thanks & Greetings, Gee.

sylarjones - November 11, 2012, 12:46 am

I'm trying to assemble a team (already have few guys) to get into one of my competitor's DB, there's a lot of money to be made (\$1k-\$5k). If this sounds interesting, PM me your IM info.

cyberdog - November 11, 2012, 2:21 am

ok now listen you are only getting traffic from that emails that dnt worth much i have my own ways :)
