Thread: [How To Suspend Youtube Accounts](#)

Methane - June 15, 2011, 3:55 pm

Here is my suspending tutorial. Before I begin, I want to say I take no responsibility for anything that may happen to you, your youtube accounts, or the accounts you suspend.

This tutorial is for educational purposes only, anything else done is not my responsibility. Also note this tutorial is not Guranteed to work, but I and many other people have used this and it has worked every time. Works best on people with under 15,000 subscribers.

Now let's start. :)

First, find your target. It is much easier to suspend people who have under 15,000 subscribers and who aren't a partner.

Next, you must do the following things:

- 1) Comment and thumbs down one of his recent video. The comment should say something like. "You're so mean)."
- 2) Go to Flag Video > Hateful or Abusive Content > Bullying
- 3) Send him a Private Message saying. "You have been warned" Or something along the lines of that.

Then, go to this website:

http://www.youtube.com/copyright_complaint_form

Fill out the form in this order:

Copyright infringement (Someone copied my creation) > I am! > Type in the URL of the video you flagged/commented > My Artwork > Then, under "Tell us about yourself" type in any dox that you have or just find information on google. (Do not use your real information.) Then just select everything it says and click "Submit Complaint"

Next, go to this website:

<http://www.google.com/support/youtube/bin/answer.py?answer=142443&hl=en>

Wait the 15 seconds and select "I have read the about information"

Select "I have contacted the uploader via YouTube's private messaging feature"

Select "I have reviewed the Community Guidelines"

Select "I am being harassed by another user on the site"

Select 'Harassment' for "What is the issue?"

Select 'Myself, child, or person whom I am legal guardian' For "Who is it for?"

Select "One of the following:"

Type in their Username.

Select "*** has created a video to harass me."

Select a recent video they uploaded. (DO NOT use the video you flagged and commented.)

Block the user and press continue.

Then submit the form on the confirm page.

Now, repeat these steps 3-4 more times.

Each time, do the steps while you're logged in on a different account.

Also, each time you do, select a different video then you did before.

After 24-72 hours, the user should be suspended.
So check back often.
