Thread: [TextImagifier - Stop kiddies by turning your source into image](#)

BlackCap - June 16, 2011, 9:36 am

So i found [This Thread](#) where dextrey had made a imagifyer. I ready liked the idea, but sadly the result looked like shit :P

So i made my own imagifyer, and since the imagifyer is meant for code, i added line numbers and highlighting things like "Sub" and "Dim", just like VS does :)

And as allways, all my work is open source!

Here is some screenshots:

Main Form:

[img]http://filesmelt.com/dl/img1.PNG[/img]

Display Form:

[img]http://filesmelt.com/dl/img2.PNG[/img]

Result:

[img]http://filesmelt.com/dl/img31.png[/img]

So yeah, nothing fancy, but i tryed to be a little creative x)

Also, if there is any thing that i forgot to highlight or you find bugs, please tell me so that I can fix it, then i will update the post!

Wanna give some creds to bl4ck p34rl for beta testing, and to dextrey for the idea :)

Exe: <http://www.mediafire.com/?4zmd4oifnws3ab>

Source: <http://www.mediafire.com/?rsgj4l5tg50i7gk>

EDIT: There is a newer version of this application available in this thread:

n0pcode - June 16, 2011, 9:43 am

Very nice :D Only thing I'm not keen on is the colouring, I'd go with the classic white background, blue text as it's clearer, and that's what it's meant for - clear copying without struggle.

BlackCap - June 16, 2011, 9:46 am

I like it this way :/

Download the source and simply change the colors? :)

Pos-eidon - June 16, 2011, 9:47 am

Agree with 1steiner, you can download the source and change the colour yourself

hgdfhsdgdgdfgh - June 16, 2011, 9:49 am

I agree it looks better than mines :D Nice job

n0pcode - June 16, 2011, 9:49 am

Don't get me wrong, the blue/black background with the orange text looks smexy, but for sake of simplicity and ease of reading, white/blue would be better, nice of you to make it open source as well :)

Pos-eidon - June 16, 2011, 9:51 am

(Jun 16, 2011 09:49 AM)dextrey Wrote: [\[CITE\]](#) I agree it looks better than mines :D Nice job Lol, I and 1steiner were expecting a fight from you, and it DOES look better than yours

smexy or sexy lol, and we cant simply change the whole thing, it would take a awful amount of changes, you can change the colour of the text in the source to white or something for your personal use.

Deceptive - June 16, 2011, 9:55 am

Thank you for your contribution, will gladly use this in the future.

Kill?Muvz - June 16, 2011, 10:00 am

Love this, VERY interesting :3

?Demon - June 16, 2011, 10:34 am

```
1 Public Class DisplayForm 2 3 4 5 6 7
8
```

```
9 10 11 12 13
```

```
DisplayForm Code
```

```
Private Sub Button1_Click (ByVal sender As System Dim sfd As New SaveFileDialog sfd.Filter =
"Pngz1*.png" If sfd.ShowDialog 0 <> vbOK Then Exit Sub PictureBox1.Image.Save (sfd.FileName,
Imaging End Sub
```

```
Private Sub Button2_Click (ByVal sender As System Close 0 End Sub End Class
```

```
.Object, ByVal e As System.EventArgs) Handles Button1.Click
```

```
.ImageFormat.Png)
```

```
.Object, ByVal e As System.EventArgs) Handles Button2.Click
```

Ocr taking a crack at it.

How did you do that? :/
Also, it's not a catcha you know..

?Demon - June 16, 2011, 10:45 am

There's tons take a look

<http://imgtfy.com/?q=Online+OCR>

And reply on MSN. D: <

Ofcourse we could, it's just to change like 4 lines of code :/

Master Chiefs - June 16, 2011, 10:51 am

very ncie man thanks! keep on posting more a big help to Hf

Cherish Life - June 16, 2011, 11:16 am

Not trying to be mean, but i almost HATE the colors, its just my preference but i hate the way it has halloween colors, i've seen black and blue/red/orange almost everywhere. Just make it simplistic, and i like dex's more to be painstakingly honest.

I think you should let users change the colors them selve's. also it should make the blue text on vb10 glow a different color than the colors.

BlackCap - June 16, 2011, 11:36 am

Yeah i was not trying to be mean, i was only trying to tell you what i think you should have done to make it even better. ?

Coleak - June 16, 2011, 12:39 pm

Pretty nice. Good job, I might actually use.

BlackCap - June 16, 2011, 12:46 pm
