Eight posts and a hacking program already uploaded by this user. Seems safe to me. (Sarcasm)

Quote:Website Offline, No Cached Version Available

The website you are trying to access is currently offline. The most likely causes are the server is down for maintenance, there may be a network problem, or the site may be experiencing excessive load.

I think I'll just wait until the site comes back up. :)

Hi. Download it gives the following error if i want to run it;

"we are sorry but your system settings are not compatible with this product! Please contact an admin for help! Thanks for downloading limehacker."

Is this just scam??

i would system restore your computer and run an av scan, or go to the white hat help section, because yes, its a scam. its obviously a virus. delete it and go to white hat section. its a virus.

Wicked_Rose - June 16, 2011, 4:20 pm

Sounds like someone is about to suffer account deletion for attemptive and semi-successive

infection of other members.

It seems too good to be true, usually something like this too good to be true.

Thewijker - June 16, 2011, 6:10 pm

Hey uhmm...

My avg scan says its a virus...?!

Wicked_Rose - June 16, 2011, 6:22 pm

Are you even reading the posts before you download it? We have already established it is most likely a virus.

Again you are suggested to begin System Restore and run an AV scan, or go to the Whitehat section; because YES it IS, AS FAR AS WE KNOW, a SCAM. if you download it, it is at YOUR risk. ESPECIALLY since you have been WARNED... it could very well just be a spread; but it is still YOUR computer at risk.

Thanks again MoralityBoy for the early warning, please everyone take care and read before you download.

I have proved it is a virus I have downloaded and it gave me some fake ass error (LOL).. so ya DONT DOWNLOAD!!!

AliKasra2 - June 17, 2011, 9:18 am

Nice done, message to short. :D

Muscle Nerd - June 17, 2011, 6:21 pm

This guy needs to quit making fake ass e-mails and accounts.

How do we call for a ban on his IP address? Posting virus' within the community is so f***ed up, like seriously.

Go get laid, have a life outside of the computer, and utilize your time to learn and give back.

If at all, send that dog sh*t to some skid, not real members.
