Last check was about a week ago, all of them checked enjoy them. I gave these away because I have a new list of 60k shells.

Shells Pastebin: <http://pastebin.com/F8cpJf0r>

There are exactly 1000.

Enjoy, please post of them working etc.

Nice share, there's some doubles, but helpful nonetheless.

Marcos MC - June 16, 2011, 2:18 pm

hahaha there are no 1000 shells, there are only some that are repeated a lot, for example, this: b00tles.megabyet.net is repeated 50 times -.-

Yeh there are a couple of doubles but I just took them all from random .txt files on my desktop called shell1.txt etc and some had the same ones, but there are at least 850+.
