Dude, wtf is your problem there is nothing wrong with the shells, it's the hosting I needed to take 10k off so they could all process, I don't have enough memory kid, get account deleted.

**Active** - June 16, 2011, 2:55 pm

Nice IP Address you got there op .

There is nothing wrong with the shells, it is the hosting... Account deleted.  
Example of a shell I picked at random from the list, first one first pick:

<http://www.framedgamers.com/dos/>

Second pick:

<http://sxleton.awardspace.us/>

Third pick:

<http://www.bohemiabijoux.com/images/.sysy/udp.php>

Fourth pick:

<http://feeds2.feedburner.com/alivingtruth/DRwH/>

Fifth pick:

<http://armavir-shop.ru/inde.php>

Happy?

This is closed for the time being, I need new hosting for the 41k shells. The hosting is poor, I probably knocked there whole servers offline by using 1 shell.

Open Tomorrow once it's sorted.
