Thread: [\[Givin' Help\] Helping Newbies to RATing \[Helping\]](#)

zenawenliang - June 16, 2011, 9:01 pm

Hello New Hackers!

I'm sure since you have been on the forums you have seen alot of hacking techniques and tools, and you are pretty confused on where to start. Well, I had the same problem, but I know can help with you guys! So to begin, I chose to begin RATING, a RAT is a Remote Administration Tool. These are programs such as Cybergate, Darkcomet, and Blackshades. My first question was, "Isn't it illegal?" Well, a technical answer would be no, but it the way you use it could be illegal. For example, if the person you gave it too doesn't know that you are watching there desktop, or looking at them through their webcam, or listening to them, then yes, it is illegal, but there are ways on not to get caught. Next, I will be covering why, you should start by RATING.

Advantages...

1. It is a good way to practice SE (Social Engineering)
2. You learn many ways to spread your viruses
3. It is pretty damn fun!

Now to start giving you some starting Points!

I recommend Cybergate RAT, because it is stable, and very easy to use, with all of the essential tools you will need.

Link to a TUT for Cybergate on how to setup:<https://hackforums.net/showthread.php?tid=545871>
BEST

Darkcomet, a RAT for Mac/Linux, but not very stable, harder to use.

And here is a TUT:

<https://hackforums.net/showthread.php?tid=840619>

Blackshades costs 40\$, so I advise you not too use it yet...

Support!

If you need help Portforwarding, or just setting up the RAT just PM me and I will be glad to help!

Feedback.

If this helped you at all, please comment and give me some feedback. for example, tell me my strengths or weaknesses, since this is my FIRST guide!

Killer12 - June 17, 2011, 6:10 am

nice tutorial but theres tons of them out there
try to be more unique to get more feedback
not bad for a first tut though :D

zenawenliang - June 17, 2011, 1:39 pm

Thanks,try to tell me more about what would make it more unique,for example, should I do a vid on both of them, to show them the advantages of both?
