Thread: [delete a facebook Account Guaranteed](#)

I have tried this and it worked

Here is a method to delete any facebook profile or account. It works 100%. But its just for educational purpose. So don't use it on anyone. Once Deleted Profile can never be recovered. Use wisely.

WHAT ALL U NEED ?

1. slave's profile link (you can get it easily)
2. His/Her Email which he/she uses to sign in
3. His/Her birth date which he/she has used in the profile
4. Make an Email ID on gmail or yahoo with the first name and last name same as on slave's facebook profile.

HOW TO DO THIS:

1. Go to this page:

Code <http://www.facebook.com/hacked/>

2. Enter details. In the place of ' email address where you can be contacted ' enter the fake email u created.

3. you will get a mail on that ID in which facebook people will ask your problem. Reply to them that you are XYZ(slave's name) and you cant access your facebook account. Also you have lost access to your Email Address associated with the account. You dont know what to do now. The hacker is coming online regularly and using your account. If the slave is a girl also write ' I am a girl and it poses threat to my social life ' and write anything you want that could make them take action. (no need though in 100 % cases they delete the account)

4. After 2-3 days you will get a reply. They will again ask you that you have access to your associated Email or not? Reply them that you still don't have access to it. And repeat what all you wrote in first mail.

5. Next Day or Same Day you will get an Email that your account is disabled.

Enjoy

try this and tell me if it works for you

Is it permanent? Or just enough time to "get your account back"

vikhyat1996 - June 17, 2011, 1:15 am

the Slave's account is Disabled..this means he can enable the account.But with some tricks you can hack into it

Or you can just login with nVPN as I do and it instantly blocks the account because it detects tha you are going to connect from a strange location

Could be usefull but do they check your IP?

huntingforbillions - July 7, 2011, 6:02 am

just curious, when i delete my account, what does facebook do with my personal info? can they sell it?

vikhyat1996 - July 18, 2011, 9:43 pm

no...they can't sell your personal info..

WTF que is this?

ajasa4link - July 19, 2011, 6:28 am

Must i know d slave's year of birth because most facebookers always hide this leaving only their day and month of birth visible
