Thread: [\[BEGINNERS GUIDE\] The Road to Ratting - Part 1 \[BEGINNERS GUIDE\]](#)

Puissant - June 17, 2011, 3:32 pm

There will be a couple parts to this "Series" at the end of the post I will put a link to Part 2 (when i'm done with it)

Remember if you follow these steps you will successfully be a competent "Ratter"! Good luck!

The Road to "Ratting"

--

- Step 1 -

First ask yourself these questions!

1. Do I want to use this for "Fun" or "Fraudulent" purposes?

Spoiler [\(Click to View\)](#)

If you answered "Fraudulent", Please stop reading this thread, and leave the black hat section of Hack Forums! These tools are or should only be used for Entertainment or Business purposes!

If you answered "Fun", Continue reading! This guide was MADE FOR YOU!

2. Will I severely "Invade" an others privacy?

Spoiler [\(Click to View\)](#)

If you answered "Yes", Please rethink your goals. Remember people have the right to privacy now we don't want to go around breaking the law to the extreme!

If you answered "No", Continue reading! This guide was MADE FOR YOU!

(do remember people do have the right to privacy so don't abuse your newly found powers)

3. Will I try and use my skills against Hack Forums or its community?

Spoiler [\(Click to View\)](#)

If you answered "Yes", I highly suggest you leave Hack Forums now... You are not welcome here!

If you answered "No", Continue reading! This guide was MADE FOR YOU!

4. Will I respect others while using these newly acquired tools and skills?

Spoiler [\(Click to View\)](#)

If you answered "Yes", Continue reading! This guide was MADE FOR YOU!

If you answered "No", Please reconsider your goals! These tools are to be respected along with the people you use them on. With power comes reasonability!

5. Do I have a goal I want to reach?

Spoiler [\(Click to View\)](#)

If you answered "Yes", Continue reading! But make sure your goal is both ethical and logical!

If you answered "No", You've made it this far so scribble one up we can refine it later!

--

- Step 2 -

Analyze your situation!

1. What's your home life like?

Spoiler ([Click to View](#))

If your home life is troubled, Maybe you shouldn't be doing this. You may like the newly found powers a bit too much and start to abuse them!

If your home life is good, This may not be a good idea for you. You may get a bit obsessive!

If your normal like most people, This may be the right thing for you. Doing this is a good release after a hard day!

(correction this is never a good choice lol... you're hacking, its illegal!!!)

2. Who are you looking to target?

Spoiler ([Click to View](#))

If you had any answer other than "Anyone", You should reconsider your goals. Unless you are doing this for personal reasons you shouldn't "Target" a specific person or group. IF you do you might not get the outcome u wanted!

3. How good are you with computers?

Spoiler ([Click to View](#))

If you have basic skills you can achieve your goal of "Ratting" in no time!

4. Do you share your computer?

Spoiler ([Click to View](#))

If you share a computer you should NOT be doing this. ONLY do this on a personal computer!

5. Do you have a family member who works for the government?

Spoiler ([Click to View](#))

If you said yes, I recommend you don't do this. But there are special occasions where you can get away with it! Just like in my situation. My dad works for the government setting up firewalls and classification levels for the govt. He is great with computers and is a Certified Ethical Hacker. But because of my Social Engineering skills (from next question) I am able to hack behind his back ;)

6. Can you Social Engineer?

Spoiler ([Click to View](#))

If you said "Yes", Continue reading this should be easy!

If you said "No". Learn to, then come back! It will make things a lot easier!

--

- Step 3 -

Port Forwarding!

This is simply a MUST HAVE for "Ratting"!

Spoiler ([Click to View](#))

I'm not to avoid in the port forwarding, but there are lots of good Tut's on how to! I'll link you to a few.

If you can port forward read #1, If you cant port forward read #2.

#1. Forward 2 ports of your choice and check them both with both of these links -

Spoiler ([Click to View](#))

<http://www.whatsmyip.org/ports/>

<http://www.canyouseeme.org/>

If they are both open move on to Step 4!

#2. Go download proXPN, Once downloaded and you are signed up. Click connect and move on to Step 4!

--

- Step 4 -

Choosing your Programs!

#1. First were going to choose the RAT client. There are lots of them out there! So its all a matter of personal preference.

Im going to provide the links to the best Free, and Paid RAT clients - (Remember these are my opinions)

Spoiler ([Click to View](#))

Best Paid for RAT Client -

[Blackshades](#)

Best Free RAT Client -

[DarkComet](#)

Once you have you RAT client its time to move to #2!

#2. Now that we have our RAT client its time we find us a good Crypter! I wont suggest any crypters because there are way to many to sift through.

Remember what you're looking for!

Spoiler ([Click to View](#))

Fully Undetected (FUD)

Runtime

No .NET Dependencies

Trusted Seller

Once you have both of those its time to wait for Part 2 ;) (will post soon!)

If you have ANY comments or suggestions let me know i'll add them in if they are good ;)

I would like anyone who is reading this now to please note that this guide is very outdated as it was written in June of 2011.

Thank you.

PiR4cy - June 17, 2011, 4:37 pm

Good tips\tutorial. :)

ts

Thanks just trying to help newbies ;) Ill post Part 2, tomorrow this one took me about 2 hours... and i'm a bit drained.

Mesmaroth - June 17, 2011, 5:36 pm

Nice Tut man well put.
too short

Muscle Nerd - June 17, 2011, 6:09 pm

Nice tutorial.. Very proper and formal run down on the ethics of RATing.

I personally have no experience but would love to test and try. ;)

Puissant - June 19, 2011, 6:54 pm

I will not be continuing this on HF i will be writing an E-Book so that away it's not a series of threads. (Updated main post with this info, when E-Book is done I will link to the thread!)

Govna - June 19, 2011, 7:35 pm

I downloaded the RAT dark comet to my computer and my anti-virus program recognized it as a virus. So I am given the option to "Move it to Vault" or "Ignore." So what option would be the best option for me to chose?

Puissant - June 19, 2011, 8:13 pm

(Jun 19, 2011 07:35 PM)Govna Wrote: [\[CITE\]](#) I downloaded the RAT dark comet to my computer and my anti-virus program recognized it as a virus. So I am given the option to "Move it to Vault" or "Ignore." So what option would be the best option for me to chose?

Ignore, Trust me its not a virus half a hackforums proly uses that exact thing. its just the stub used to create the "Server" is detected by antivirus.

Puissant - January 7, 2012, 1:47 pm

Part 2 will be coming soon, i kind of forgot about this project and i'm restarting it now!

tobbepro - January 7, 2012, 2:12 pm

Nice tutorial, I'm testing this out right now.

CryptServer - January 7, 2012, 2:14 pm

nice tutorial goodluck all qweeaksjkdasd

Ryan_ - January 7, 2012, 3:29 pm

Thanks for this guide! (:

Puissant - January 7, 2012, 4:37 pm

Thanks for the replies! I'm accepting ideas for Part 2!

SIM-553562 - January 7, 2012, 4:46 pm

Good tutorial bro! Keep up the good work!

Priv8 - January 7, 2012, 5:41 pm

Awesome Tutorial Brother Thanks For Help You Are The Best

Puissant - January 7, 2012, 6:44 pm

Thanks for the reply! Still accepting ideas for Part 2!

Burn™ - January 7, 2012, 8:05 pm

Really nice guide, it will help many members out :)

Puissant - January 8, 2012, 11:03 am

I hope it helps! thats why i made it ;)

Wiltman03 - July 5, 2013, 12:50 pm

Thanks I really appreciate you making this. I really needed the help!

Madara-Uchiha - July 5, 2013, 1:38 pm

Nice thread. But I think proXPN free version dont allow you to open your ports...

Puissant - July 5, 2013, 4:37 pm

(Jul 5, 2013 01:38 PM)Madara-Uchiha Wrote: [\[CITE\]](#) Nice thread. But I think proXPN free version dont allow you to open your ports...

I'm not sure what they do now but at the time of me writing this this exact setup worked. However this was written in June of 2011 and it is very outdated so I suggest you use this as more of a vague template. I've updated OP with this an hopefully this won't cause any further confusion. Thank you.

Tarynn - July 5, 2013, 4:42 pm

I have a beginner question I was hoping someone could answer! I setup a Darkcomet RAT and when I open it I get connected, but when someone I send it to opens it, they don't connect to my Darkcomet? Is there anyway to fix this?

Algirdas - September 30, 2015, 12:11 pm

Puissant you are a genius my friend ! Thanks for the great guidance on ratting. Very very helpful !
