For my 200th post and being promoted as a L33T member of this forum I decided to make this thread to help members that's having problems in their RAT's

Must have a teamviewer

Doesn't have negative reputation

Must have trust(If you don't know how to trust someone then don't ask for help)

[IMG]http://i1126.photobucket.com/albums/l619/domcrus/cooltext539669286.png[/IMG]
Fist look at "support status" if it says online then send me a PM with your teamvier ID and Password then wait patiently and I'll get to you as fast as I can.. If you see that the "support status" is offline then don't bother because it's either I'm busy with other matters or I'm offline.

Thanks so much HF!

Pming u wid my msn id :) right now

maddaj - June 18, 2011, 3:08 am

this is why i like this forum. people just trying to share knowledge. i have team view. I can see you do something once and remember it all. Unforgettably I'm still new. We are sorry but we require 5 posts to send a PM.

installing msn. my aim is "madd" i can add you if you have aim. or add m4dd@hotmail.com for msn

xXxRay - June 18, 2011, 3:49 am

Vouch for you !! Legit and hardworking member ! Good Luck .

BlackSnake - June 18, 2011, 4:51 am

Vouch for you too!

Thanks for help :P

I am new to RATS and have cyber gate. so could you please help set up my cybergate and port forward. i have teamviewer and msn my msn is: karl.chandler@live.co.uk

if possible could you also test mine after it is set up?

thanks

Collisioned - June 18, 2011, 7:15 am

Alright, I'm working with Dark Comet V2.3 and I seemed to test it on my other pc and it didn't work? Can you possibly test it for me or go on Teamviewer with me to troubleshoot problems?

Thanks, Collision
