Thread: [Cool list of projects you can do! \[Longgg List\]](#)

?Demon - June 18, 2011, 5:19 am

I see so many threads asking "What can I do, I'm so bored. :{" so let's compile a list of things you can do with varying difficulties. ^.^

Metronome.

Virtual Instruments.

Program that interacts with iPhone.

SECURE HWID system.

Bruteforcer.

No-portforward RAT (ie, PHP,FTP,etc.)

Live keylogger - no portforward.

Game, ie super Mario

Advanced program such as paint.

Multi-chat system.

Skin Pack transformer.

Windows 7 button changer, theme changer, other design tools,etc.

Good auto-update and messaging system.

Recreate programs such as magnifying glass, etc (Start Menu > Programs > Accessories.)

Start dock, ie Object Dock.

Software to interact with blackberry.

Advanced music player with no windows media player.

Computer optimizer, ie Auslogics bootspeed, Tune Up Utilities.

Windows 7 Gadget.

Figure out how to make an iPhone app.

Cool custom controls, ie, not just a checkbox a sliding button such as on the iPhone screen (slide to unlock).

Graphics program ie, Gimp, Photoshop.

Advanced screen locker and file locker.

Password storer.

Cam spy that sends to email.

Advanced Youtube downloader.

Dj'ing program such as Virtual DJ.

System Tweaker, such as Tweak Me.

Typing tester and tutor.

Random choice maker, ie The Hat.

Swf decompiler.

Program to do with themes, ie a user tile in task bar.

Desktop program, ie Real Desktop (This one's amazing) and Fences (Useful.)

Screen shot program, ie PicPick.

Screen recorder, ie Microsoft Expression Screen Recorder.

Funny Video Retriever/Quote/etc.

Note program, ie IQ Notes.

Image > Icon program.

Hex decimal editor.

Video converter.

Spell check without Microsoft Office.

Windows Explorer.
Icon Changer ADVANCED.
Move mouse with hand, ie Camera Mouse.
Text and pictures hovering next to mouse, ie Keyz V1.
Obfuscation program.
Batch generator/VBS generator.
Source code sharer and you can call it Branch.
Password Recovery.
Cheater on games. [Exes and web games]
.Sol file editor.
Prank Program.
Noob Tutorials.
GDI tutorials.
Fusker Engine, ie PhotoFucket.

This took forever to do and was all from my head and programs, but you don't have to say thank you as long as it helps. xD Suggestions are welcome.

<http://iphoners.org/images/2009/default-lockscreens-wallpaper.png>

He made an on-off, I'm talking about slide to unlock. ^.^ But there's still a lot more to do.

Ethereal - June 18, 2011, 5:45 am

I'm working on a native licensing system.

?Demon - June 18, 2011, 5:47 am

Cool, glad to see people are interested. <3

easy, made a simple one really quick: [SlideBar.exe](#)

Nice thread, I'll make some of these!

?Demon - June 18, 2011, 6:15 am

Thank you and taking a look. ^.^

SIM-701256 - June 18, 2011, 6:22 am

Cool list, im gonna add this to favorites :)

?Demon - June 18, 2011, 6:30 am

Thank you, means a lot. (:

INJ4CT0R - June 18, 2011, 6:32 am

Nice!! added into my favorite list :)

Nice!! added into my favorite list :)

?Demon - June 18, 2011, 6:43 am

Thanks bro. (:

+Too Short+

He made an on-off, I'm talking about slide to unlock. ^.^ But there's still a lot more to do.

What should the slide-to-unlock control do?

Also nice list, i bookmarked the page ^^

?Demon - June 18, 2011, 7:09 am

Look like that, have a few events such as slide start, slide position reached, slide position finished, custom text and images, etc and thank you. xD

WESTi - June 18, 2011, 7:15 am

source code sharer and you can call it branch = xD

?Demon - June 18, 2011, 7:16 am

Well at least I'm original. xD

BlackCap - June 18, 2011, 10:43 am

(Jun 18, 2011 07:15 AM)WESTi Wrote: [\[CITE\]](#) source code sharer and you can call it branch = xD
I lol'd xD

...:ToShort:...

?Demon - June 18, 2011, 10:48 am

Or how about Project Boti?

Y2KTHUG - June 19, 2011, 12:09 am

i have a project for you. We're Sell recharge cards-Airtime Cards (both physical and Virtual-easyload or electronic), diiferent accessories and phones. These cards come in various denominations i.e from Shillings 50 - any amount. The Physical cards can be traced by their serial number. We as dealers or agents for the Telecommunication companies are allocated territories and only allowed to sell cards that belong to us in our territories. If one dealer's cards are caught in another dealer's area, then the errant dealer is penalized. Now the Project should have various (but easy to understand) interfaces for;

- 1- Data entry
- 2- reporting.
- 3- Reporting in different currencies of the world (esp. the Shilling)
- 4- Showing Different Suppliers (Telecom Companies)
- 5- Showing Different Whole Sale Customers (Sub-Dealers)
- 6- It should be able to calculate whole sale discounts from 0.1% to 99%
- 7- It be able to work as a Point of Sale Software especially when it comes to retail selling
- 8- it can also be web based
- 9- Should have different sales points across the country.

The rest you can suggest as we go along. I will understand it if this too much of a challenge to you. Waiting to hear from you soon.

?Demon - June 19, 2011, 12:13 am

I'm not coding majority of these, these are for members who want projects so anyone can take advantage of it, not just me. xD

?Demon - June 19, 2011, 12:19 am

xD, thank you, I say the Dock one is an interesting try but that's just me. =P

Y2KTHUG - June 19, 2011, 12:20 am

So you can't do it???? Do you know anyone who can do it?

?Demon - June 19, 2011, 12:22 am

Post it here and wait for someone to find interest or go to people like 'Smithy' and ask them but they may charge. O:

Ethereal - June 19, 2011, 1:36 am

(Jun 19, 2011 12:19 AM)?Demon Wrote: [\[CITE\]](#) xD, thank you, I say the Dock one is an interesting try but that's just me. =P

There is a project with a C# Paint\DockRing on SourceForge, I believe.

I've downloaded it before. It's pretty cool.

?Demon - June 19, 2011, 1:45 am

I'll take a look I made a VB.Net competition per week, this week's a dock type program so hopefully we'll get some cool entrys. ^.^

boy01991 - October 2, 2011, 1:41 am

thanks again for showing me to this list!

?Demon - October 2, 2011, 1:43 am

No problem, enjoy. ^.^ I think the metronome is an interesting project.

?lassy - December 22, 2011, 3:45 pm

I added it to my favorites! Thanks for the list! ^_^

I hope people don't think I am gravedigging posts :o

?Demon - December 22, 2011, 11:37 pm

Any time, enjoy and good luck with them. ^.^

B3cnoc - December 23, 2011, 2:21 am

Nice list. I will add this to favorites and try to do some of them, when I don't know what to code.

?Demon - December 23, 2011, 2:46 am

Thank you and good luck with them if or when you do them. c:

blackteddy - September 14, 2012, 7:27 pm

Very nice ...!!!! :) i will try some of these !!

?XilluX - December 26, 2013, 11:49 am

There is already a PHP RAT, that I coded, click my Siggy.

gungunfebrianza - December 27, 2013, 6:01 pm

SWF Decompiler is cool if someone could create this app and make it open source ;))
