Thread: Proxy list and combo list

**ScaryMagician** - *June 18, 2011, 12:49 pm*

Okay I am a total newb at this. Would you guys explain to me what a combo list/word list is? And where can I get one, make one...

I have that program C-force and I have dowloaded the proxy list but i can't find a combo list. How can i make one, where can i dowload one? What is the combo list about anyway?

I am sorry if this post aleready exists.
Thank you for your help.

visit proxy websites and create a list in form of txt.

i visit proxy-list.org which has some great elite proxies

it is a list of usernames and passwords

username1:password1
username2:password2
.
.
.

I want to know how can i get combos in a simple way.

To get an easy list of combos for a start you need to know what game/site you want the combos for.

You can download AthenaII Or Staph to leech for Combolist and then use a cracking program to check them
