Thread: [\[release\] Team Nexus Client 3.0\[release\]](#)

Calvin Candie - June 19, 2011, 2:39 pm

With all of the drama going on about griefing clients and teams, team nexus has decided to finally sell the client. We have become extremely bored with minecraft griefing and will instead be turning our sights to actually playing the game.

This client was coded by Dr Pres and Jordangentry, but does contain some original source from Blic and GTB3NW. The client has 21 keybinds and 9 commands.

Here is some proof that all of these hacks work on multiplayer servers and are all legit.

Keybinds:

Spoiler [\(Click to View\)](#)

- Fly (F)
- XRay (X)
- FullBright (C)
- Name (N)
- Locate (TAB)
- Instant (J)
- Coords (H)
- Nuker (I)
- Torch (I)
- Flood (\)
- Hide Chat (K)
- Reach (G)
- Sign (Y)
- Speed (B)
- Climb (U)
- FreeCam (O)
- Ghost (P)
- Hide Weather (,)
- Kill (V)
- Sneak (M)

Commands:

Spoiler [\(Click to View\)](#)

- .spam=[Message]=<Times>
- .clear (Resets Locate List)
- .anni [b/r/t/s] <int/int/on:off/int> Sets a specific block, radius, speed, or tool efficiency (Only blocks specific to the tool you are using will be destroyed)
- .up [int]
- .flood=[Message] Sets the flood message
- .Swing [on/off] sets noswing on/off
- .speed [int] sets speed

The client will be sold for \$15 and will include lifetime updates and possibly new mods (unless the client gets released). Also for added incentive, the first ten buyers will receive alt accounts. One alt account for a member, two alts for a l337, and three alts for an ub3r. Post here and Pm me if you are intrested in buying the client. If you really need in game proof pm me your skype name and i will add you and show you in a online server.

Vouch This. Its real and we are selling it.

Earth - June 19, 2011, 2:45 pm

So you are going to play the game normally. If so Im wondering if you want a project which could make some money. Requires java.

We weren't sure what forum because it does involve selling but it does also involve a lot with minecraft. We also have seen other clients for sale posted here.

mothh - June 19, 2011, 2:55 pm

This is obviously fake, you used the speed mod, you saw everything move faster.

Oh really? Join us at server.miningbros.net . I will personally show you that this 100% legit.

Justice Society - June 19, 2011, 3:01 pm

The speed mod turns up the entire timer speed. If the video speed was increased our voices would have been too. We were talking real time and it should be pretty easy to tell that from the extemporaneous style. If however you still need proof of the client, please feel free to give me a server to join u on!

mothh - June 19, 2011, 3:02 pm

I don't want to join your server.

You can just do a voice over.

Jamesf - June 19, 2011, 3:03 pm

99% Bought, im assuming that this client is protected (can't decompile it correctly). Does the

freecam mod return you to where your body is when you turn it off, if so would it be possible to add a teleport keybinding, and would it be possible for me to use my own name tag system (coded it already), and maybe GUI (again, already coded by myself). Amazing client features for amazing price.

I agree, we could have done that, but as i said, the style of voicing is very extemporaneous. Please join me for proof!

Please go away from minecraft section, if you want to sell it, not here pelase.

It just speeds up the timer on your client. The other player was not moving faster unless he had it on to. However the environment does move faster on your screen.

It won't get spreaded if people want updates and new hacks.

Meh. If they want to grief with it they can. Griefing has become just as big of a part of minecraft as building.

We just updated it so that it uses a bit more memory and now you will not lag out alot from nuker. Thanks DR!

Pretty much. Buffer overflow is our problem - memory problems seems to be the users computer.

Well if it gets distributed and I see it then no updates will roll out to anyone which means no new hacks and once 1.7 hits no anything.

Buffer overflow or memory. If it's memory you pc probably doesn't have much of it. Slow down the nuker with .ansi s and make sure mc is top priority. But don't expect the nuker to just keep running.

Buffer overflow is hard to avoid as of now. It's like sending something through a funnel too fast. Eventually it will back up. We are working on fixing it. Just don't hold the nuker down.

Animus. - June 21, 2011, 1:19 pm

Depends on your pc memory but I recommend for a few seconds then move and do it again. Don't run around with it on.

Should've released in the VIP Area. That will lower your chances of getting leaked by 90%! Oh well :(

Flipybitz™ - June 22, 2011, 12:48 am

Big question is, will you give free updates for each minecraft update? Or are you buying the client just for the current version of Minecraft, because that would be kinda stupid.

EDIT: I'm stupid, just finished watching the video...

Xiodine - June 22, 2011, 3:11 am

Very nice client, however;

Nuker can sometimes cause out of memory if you are trying to hit blocks around you with the wrong tool.

If you try to use torch puncher in a protected area it may give end of stream.

After a minute of using noclip you may get end of stream.

You can't change what the signs change to.

Apart from that it's a very nice client that I would recommend people to buy.

The reason we were pressed to sell it is that john /Jboeggs basically begged help from jordan and dr, then with their help in return he was supposed to host jordan's server but in the end he said he wasn't going to. So most of the stuff that is in "his" client that he was selling was ours so we weren't about to let him make money on it. The client will raise in price by 5\$ so its 20\$ for that version at that time. However we agreed to give free updates to our buyers so anyone who buys before the update gets the update free of charge. As long as no spreading happens untill then ;D

It's already explained. T

Unsure if Undeads actually going to keep this going but I'm done selling v3.

My sales got leaked once, and I told Undead to be cautious because some kids were planning on leaking it. I go on Youtube and find three downloads that he sends out within a few hours.

So now if you kids bought it within the past 12 hours - then I'm sorry. We'll try to take care of this the best we can.

Starburst - June 23, 2011, 5:51 am

Well, I want v4. :(I paid for updates!

I haven't bought any of the clients yet, and I'm looking to buy undeads nexus client, as I dont have 5 posts, I can't pm. So I invite you to talk about it on skype...

After reading the posts before mine, I'm sorry to say that I'm much less interested... As I hear it's been leaked and the updates are no longer guarantied. It disappoints me to find this out, and it disappoints me further that people messed up such a nice opportunity! It looks like I'll spend my money else where... I do though congratulate you on your many sales!

Nikbear - June 24, 2011, 8:01 pm

I've Pmed both Amb & Undead asking for purchase details even before the client was leaked. This is upsetting I was never spoken with. Im quite pissed off at the dumbasses ruining what opportunitys they had with the updates that would have been given.
