Thread: www.softnyx.co.kr [Blind SQL]

Kampenny - June 20, 2011, 2:28 am

Never posted one of my sites I've exploited on here before, so here's one.

If you didn't know, Softnyx is the company that manages Rakion, Gunbound and Wolfteam.

I was bored one day, decided to check out some of Softnyx's websites.

The injection type is blind, so have fun pulling anything out ;D

(I sent an email to them just under a month ago outlining the vulnerability, they still haven't fixed it.)
