"Password Decryption= PlainText---base64---feron74---ezip64

Looks too easy if everyone can simply PM him, and asking for rep will result in an infraction i suggest you remove it..

Ok so i would use caution when downloading this and would run in sandbox or something first.. base on threads from 4 months ago such as "If i put Keylogger in School Computer,will it send information to my email? "

I don't know for sure but just telling people be careful with this as it seems very fishy..

Thread from two days ago "I have Appolyes Keylogger private i have successfully tested mail and created a keylogger Namely VCMF hack and uploaded to mediafire,a user downlaod it and run it,as the Fake msg he had gotten it but in my Gmail id no logs r coming Y? "

Dosen't sound like someone who could code, and FUD crypt a keylogger like this.

Andrew Downsend - June 20, 2011, 8:46 pm

Rapzo with dif. background, gfto skid.

asad3man - June 20, 2011, 10:12 pm

Eclipse - June 20, 2011, 11:16 pm

You do know, that wanting rep for your work isnt allowed right, even if it is YOUR work, its how people think of you. You cant just ask for reputation. And Nice C&P.

Thanks! I tried it out and it works!

P.S. I recommend making a new email for this so you don't get spammed, that's what I did. :)

Sorry if this double posted, it won't show my last comment. Anyway, I was just going to say that it works great, and thanks for sharing!
