Thread: [How to bypass clearlock and similar protection applications](#)

Riddick - June 22, 2011, 11:42 am

Bypass third-party password software on RDPs

So you've successfully gained access to a machine that has RDP enabled, but you've encountered something similar to this:

[img]http://cache.gawkerassets.com/assets/images/17/2011/01/clearlock.png[/img]

You give up, right? Wrong!

Follow these simple steps to bypass that annoying software.

1. Open Remote Desktop Protocol and click the options button located at the bottom left:

[img]http://img824.imageshack.us/img824/9750/63712148.jpg[/img]

2. Check the box that says 'Start the following programs on connection' and enter this into the text box:

[img]http://img692.imageshack.us/img692/6782/37049962.jpg[/img]

3. Click connect and log on to the RDP you have had trouble accessing and you should see a command prompt.

Type TASKLIST and press enter and you should see something similar to this:

[img]http://thebackroomtech.files.wordpress.com/2007/07/tasklist.jpg[/img]

4. Look through the process list until you think you've found the one that belongs to the protective software (it could be something like password.exe, lock.exe or similar) and type TASKKILL /F /IM processname.exe (processname is the one you found in the list)

Then go back to options, uncheck the box, disconnect from the RDP and reconnect and hopefully you've got full access.

I hope this works as well for you as it did for me and my apologies if this is old news, I'm only trying to help. ?

AAA+ - June 22, 2011, 1:54 pm

worked !!!

i had like 40 rdp all locked

this work with the first 5 ones le me see if it works with the others !

Inactive - June 22, 2011, 2:48 pm

Worked for me too thanks!

Riddick - June 23, 2011, 1:07 am

I'm glad you found this helpful :)

aBo.X - June 23, 2011, 1:55 am

Keep up the good work bro Excellent POST :)

dakunzb - January 3, 2017, 6:09 am

I tried using this method but after the rdp connects, it will suddenly disappear. what should I do?

What suddenly disappears? The RDP window or the operating system (explorer.exe)? Do you see the command prompt at all? Also, this thread is very old, kek.

dakunzb - January 3, 2017, 12:45 pm

The RDP windows disappears, I didn't see any command prompt at all, please I need help can you update me on this, Thank you

Check your PMs, bro.

dakunzb - January 3, 2017, 1:29 pm

I finally worked for me, thanks a lot guyz

Gradient - January 3, 2017, 1:30 pm

THIS actually worked. Thank you so much dude.

Holy fuck how old is this thread? kek.

LouisXIII - March 20, 2017, 10:06 pm

good info love the tut seems to work for lots of people ill give this a try

Riddick - March 22, 2017, 8:26 am

I wish people would stop digging this thread up, the images are now obsolete and everything. If a mod reads this, please close the thread it's pointless.
