Well even though the stub is in the .RAR file I think now the stub is detected.

Nice share though.

That was along time ago, forgot to mension

It's 4/32 Right now, i don't intend to make it fud to much kiddies uploading it to virus total

hasoi123 - June 24, 2011, 12:40 am

Works great but i get an empty email from the stealers.

Do you know why?

Loquax - June 24, 2011, 4:33 am

Is there a good Encrypter to encrypt the server.exe?

Turmoil - June 24, 2011, 7:06 am

yeah, it`s already built in so dont worry

Turmoil - June 24, 2011, 3:11 pm

Sickest keylogger yet, no ones noticed yet but this one is the best

-Ebola- - June 24, 2011, 5:04 pm

this is a really fucking great logger thanks

Turmoil - June 24, 2011, 8:13 pm

Thank you, hope you guys enjoy it

Doesn't seem to work for me, whenever i press "build" it scrambles up the gmail email addy i typed and says i have to provide a gmail password although i do.

haxxor5 - June 25, 2011, 1:12 am

I have this logger set up and it seemed to be going smoothly but I don't seem to be getting any logs back... I'm unsure how to test this aside from the gmail test but that seemed to work but I'm unsure. It does have some downloads and I'm doubting my success rate is that low. Any Ideas?

When building dont tick add to start up and dont disable anything name it something in caps so it will be easy to locate in task manager disable av run it on yourself give a few minutes to see if it works then stop it in in task manager

rarely people have that,

ie works with 7 and 8 people just upgrade the ie to download anew browser cuz its so shitty

Stealer's work fine, i'll try to update them later
Filezilla works fine to

Well,

theres a few problems with that

1. Check if your gmail works
2. Check if your gmail has captcha when its required to login
3. Check if when you build your gmail it gets encrypted, not decrypted

like its blank? take a picture,

if you're referring to the stealer's its because they don't have any saved passwords

Hey, I tried your logger out on a victim, sadly it did not work. He kept saying he couldn't find the program or that when he opened it from Skype it said "Could not locate file". And then I tried to get him to dl it from megaupload, he said the dl got interrupted.

I believe his A/V is interrupting this, but I want to make sure that is it. Thanks for making this though, would like it if you could help me out.

When you open the builder, it says unable to connect because my update server is offline - hostrail.com

You should be recieving the logs, make sure you put in ur gmail and password, hit test gmail and

make sure that worked.
also, make sure to open server.exe

Alright looking to hear the results

KUS - July 2, 2011, 8:01 pm

I received many empty logs also but a few of them did have some random stuff like Adobe Flash Player and couple others which I forgot. Maybe this program is not working with the new Firefox version?

Need delete cookies option for logger please!!!

Chaos. - July 2, 2011, 9:05 pm

I'm getting logs but 80% of the logs dont record keystrokes, just shows what program there using lol, whats the point of that?

Turmoil - July 2, 2011, 10:05 pm

Make sure the logs you're reading are the keylogger logs, not the stealer logs.

If you're complaining about the stealer logs not coming in, please USE COMMON SENSE.

Yea you can, use your mouse to select something.

It does record the logs, try it on your self.

Hey turmoil,

Im sorry if u get these questions frequently but im new and and curious and want to learn from mistakes.

I have setup my server.exe , that was easy following your example, i have tested it on myself, and yes it worked. so i made a video on youtube put a download link to my server and it has had 10 downloads. but yet i have had no logs, its set to one minute, and ive got nothing, i tested the server on myself before i uploaded it, and it was fine.

What am i doing wrong? please reply asap.

So if you set the interval to 1

It will activate instantly but send the logs every 1 minute

Okay re-build the server.

It's because of the encryption,
once you build it don't play with the fucked up characters in the textbox.

It's very easy to read.

wqh then 2 back spaces
becomes w then u add hen

so its lowly, and when i type on keyborad

PedroDJ - July 6, 2011, 3:58 pm

Yes it's easy to read but keystrokes are incomplete! :)

Incomplete how ?

Because it misspelled keyboard ?

Weird, must of hit the 1 minute interval as you we're typing it.

Peenoise - July 6, 2011, 11:43 pm

Works awesomely i sent to my friend and now he dont know anything xD

von_croy - July 7, 2011, 2:52 am

hi , i'm a noob , i somehow got it to work yesternite on my own pc but could'nt get it running on sumone else's , the reason being their antivirus deletes it the moment it detects is

wat can i do for this ?

also yesterday i was getting full keystrokes while today m not getting any , all the logs are blank.
wat shud i do ?

plus the keylogger lack an imp fetaure of screenshots , they do make the logs heavy but are useful wen ur dealing with sumone who uses the keyboard less & onscreen keyboard more , i hope u get my point.

that apart , the package is mind blowing if perfected...

kudos to you man

dume200 - July 7, 2011, 7:01 am

Really nice program! Keep it up.

winter - July 7, 2011, 10:47 am

im going to be testing this today. i have built a stub and looking to have some fun

KUS - July 7, 2011, 6:01 pm

why is Turmoil account closed? :\

xoxoml1 - July 9, 2011, 1:43 am

first time using a stealer.. any advice for a newbie?

Crazy LoveR - July 9, 2011, 11:02 am

i think that prog not working...!

why the author account has been closed?

this^

also, this keylogger is not FUD and can be removed easier than as stated

Xilence - July 9, 2011, 2:41 pm

Really nice logger, great options. Thanks!

Havetosee - July 14, 2011, 10:11 am

Wow this keylogger is good but the stealres suck shitt

Turmoil - August 6, 2011, 5:42 pm

Thank you lolz, and thank you havetosee

I'm back.

JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

It doesn't seem to still work, because it says invalid username or password for gmail. I am 100% sure that they are both real and working, because I did Copy'n'paste it.

You're doing something wrong than,

Make sure when you do put your gmail user and password before hitting build hit check credentials, do not i repeat do not change ur gmail info after hitting build, it will be encrypted..

Uhm sure, we'll need to go through troubleshooting here

Build a server and make sure you have the cure open, execute the server on your self and go open notepad type in a few sentences and when you receive the log tell me if there are any strokes

dalas - August 11, 2011, 2:41 pm

auto update is down? are you still updating this?

tested it out and it worked great, but had to turn off security essentials

Nah i'm not updating it anymore, don't have time, if i do have the time i'll try to bring in some updates

kamil89 - September 8, 2011, 4:23 am

this works great. thank you

:) ? still? how about now? ok thanks lol

Drunk Jd - September 8, 2011, 8:40 am

i cant build the logger. it comes up with an error and i cant build the turmoil logger or i cant update

the stub with the update stub button

bbbaf10r - September 8, 2011, 11:59 am

Test with my AV.Lets see then.Thanks.

Darktheif - September 8, 2011, 10:55 pm

Humm i wonder if it still works... Will be testing

kamil89 - September 9, 2011, 11:09 pm

i like this alot, i just want to know what does it mean for USB SPREAD, and the ANTIS

SpheX07 - September 10, 2011, 2:06 pm

thanks for this powerful keylogger !

Floppa - November 9, 2011, 11:56 am

I'm still using this logger, works very well

ICHIJAVA - November 12, 2011, 2:09 am

wow this is a sick keylogger working perfect 100% good job

im in love with this keylogger thank you very much for sharing!!

augustine99 - May 11, 2015, 1:06 am

The logger is accurate,and it works very well,but i think is will be more perfectly when convert to PDF,OR JPL,EXCEL,DOC.

Any RAT,or keylogger in those file will be okay for me.yessssss.

XionHacks - May 12, 2015, 12:33 pm

I dont recommend downloading because it connects to a remote server it just failed.

I have a screenshot but of course 25 post and everything

Snjall - May 14, 2015, 1:14 pm

Can you maybe upload a proof ? maybe port and Ip where it connects to?

okure - February 22, 2016, 9:15 am
