Hi again HF ^__^ I just noticed here in Remote Administration Tools Section that it has so many newbies that creating thread asking for questions but the answer to their question is just actually in the same section they're just too lazy to search. that's why I came up with this idea of making a thread compilation^__^

[IMG]<http://dippic.com/i/00009/4lkswpzo2387.png>[/IMG]

If you're new to RATing thinking "WHAT RAT IS" or just have some questions in your mind about RAT, how to setup, port-forward, crypting and more.

Here is my two HIGHLY RECOMMENDED thread that you should read thoroughly.[\[MUST SEE\] The RAT's Crew \[Tips 'n Tricks \] || Week #1](#) ~ KillaMuvz

[\[MUST SEE\] The RAT's Crew \[Tips 'n Tricks \] || Week #2 \[UPDATED\]](#) ~ KillaMuvz

[IMG]<http://dippic.com/i/00009/dy79zddx5q0k.png>[/IMG]

After Reading the first two threads that I've recommend, then it's time to chose which RAT you're gonna use,

here are some names of well known RATs and their thread on how- to- setup-tutorials.

After reading some tutorials above and you think you're good to go.

You're wrong. Before you unleash your RAT, you have to make your

server fully undetected from anti-virus. and these threads will make it happen^_^

Please if you found something useful in some of these threads please don't just walk away like nothing happened. Please do always give thanks to the thread creators by posting some thanks, rating their threads or give any other means of thanking them. It would not hurt or hard to make one post saying thanks or rating these threads ain't it?
(but I think making these HQ threads IS)

To the thread creators that has been included in this compilation

If you don't like you're thread being here please do pm me and I'll remove you're thread immediately.

To other thread/TUT creator of RAT section

If you like you're thread to be included in this compilation please do pm me with your thread link. And to other readers if you see something that lacks in this thread please feel free to give some comments and suggestions. I would update this from time to time.

All credits to the thread creators

Thanks for reading guys

thnxYup^__^ or just to make sure, check the crypter first if its supports Istealer 6.3 you can usually see it in the crypters thread description ^__^

@all thanks for the feedback^__^

I just hope this will not die like the other compilations :(

spikebites - June 25, 2011, 5:51 pm

this should be sticky-ed. but, dont know why they removed it from this sub-forum. very informative.

Phuziion - June 25, 2011, 8:47 pm

Very well put together. Good job.
