How to stop AVIRA detecting your source while working

While I do my work, AVIRA always detects my sources, but the not exes.

So I thought I shall share this quick tip,
simply add your .vb file to the exclude list.

1. Open Avira
2. Press F8, to open the configuration menu
3. Turn the expert mode on.

[img]<http://localhostr.com/files/Wvsrp5n/capture.png>[/img]

4. Now go to Guard>Scan> Exceptions

[img]<http://localhostr.com/files/hFSMeXY/capture.png>[/img]

5. And add your .vb file to the File objects to be omitted by the Guard list

Positive sides of this method ?

- ? Not having to disable the whole antivirus
- ? Working in piece
- ? No Fear AV is going to delete your source [great value to many]

I prefer turning the AV off, or just not having an AV :)
