SyN Bigman - June 25, 2011, 11:39 am

SnohomishCo - June 25, 2011, 11:42 am

i saw this booter made by someone else that had over 1k posts and somewhere about 135 rep, why do u have 0 and 20 posts?

But lets test it out anyway :) /registered Everett

Whoever is attacking this and reads this post, you should think about getting a FREE booter that works actually great, and you are trying to attack & hack it, seriously?

some people are mentally distracted thats damn sad.

Yes, im doing my best to get the private shells on again ? HFX Booter Services Restored!

After a lot of problems: attacks, shells offline and problem with the hosting, the services are online again! 100% of the public shells deleted. Now we will use only private shells, also, the security has been fixed, and we have changed our hosting provider (We are DDos protected now)?

Thanks for your time and patience!. MarcosMC ?

repeated booting within 3 minutes will result in ban

repeated booting of same ip will result in ban

some members have been removed and will continue to do so until violators are taken of and the rest of you who use properly can enjoy

how do i donate shells?

25character limit. insert words here/

SnohomishCo - July 2, 2011, 10:13 am

damn those guys who don't respect the tos what-so ever.

see what you did? shell rotation: on

why can't you just wait 180 seconds? won't be so hard trust me, i wait / attack 10 minutes or more
always, so please do the same to all people that abuse it, and read this.
cheers!

Superman719 - July 2, 2011, 11:38 am

nexus, either pm me or marcos and we'll add the shells u pm us so that no1 else can get access to
the shells (as opposed to posting them i mean)

snohomish, thanks for ur efforts and when we continue to ban the abusers we will consider turning
rotation off. 3 members were banned last night alone for abusing the tos severely until they were
caught.

we want this booter to continue and the shells to stay strong so with newly added admin, u can bet
abusers wont be staying long anymore! enjoy everyone else

Marcos MC - July 2, 2011, 1:03 pm

Sorry for all the banned users, but we have to enforce rules, we will not allow any type of abuse to
our services. Thanks for Understanding

Regards.

Marcos MC ?

Superman719 - July 2, 2011, 1:25 pm

im just letting all current and new members know, you are being watched and bans have been dealt
with and will continue to do so.

ur warning is your own abuse; meaning, that when you attack 3 times in 1 one minute, different or
same ip and you do like an individual just did (who was just banned) and try to attack for 180, we
don't care what game you're playing or how badly you're losing, you WILL BE BANNED!

this is free because marcos is a really good guy, not because we're going to be taken advantage of.
continue to enjoy for those who are respecting it. So if you try to sign in and you no longer can, do
not complain as you already knew the rules. last time we'll post on this because you will not be
warned by username on this forum.

rules for all members:

must be an active HF member to gain activation to the booter

meaning you can no longer just make a new account to gain access to booter

i.e. simplest terms, prove ur active on hf which is not complicated then ask to be activated

Idk, something has to be wrong with this program. I clicked on it 3 times yesterday and it said I attacked like 7 times. Haha. And they don't believe me.

I really don't think all these people are purposely abusing the booter. I think the booter is just flawed.

Superman719 - July 4, 2011, 5:42 pm

the booter is coded perfectly and ur the only one claiming to have issues israelite so simply obey the rules.

and pollock u abused the booter pretty seriously and u kno u did... read the thread, heed the warning, obey the TOS or get banned and if u cant follow the tos or r too lazy to read em, then its not our problem

Superman719 - July 4, 2011, 6:03 pm

u dont refresh the page boy wonder. no matter what booter u use when u refresh it resends the damn attack. ur resending the same information u just sent, it requires zero booter knowledge to know what a 12-year old would know when it comes browser refresh.

so maybe before you start ddos'ing and bitching about it, u should learn how the internet works.

refreshing the page resends the information you just sent.

STOP REFRESHING AND WAIT YOUR 3 MINUTES TIL YOUR NEXT BOOT. GET A CLOCK OR A STOPWATCH AND TIME URSELF. too many warnings have been set you guys act like we're here to be jerks. seriously? its a free service, moreover one of the best free services on all of hf and you're complaining about ur screw ups? you want to disrespect the booter that's fine, but it no longer becomes our problem after that.
