Thread: [\[MyBB\]\[HELP\] MyBB Template Java Script Problems!! \[HELP\]\[MyBB\]](#)

INJ4CT0R - June 25, 2011, 1:25 pm

okay soo i have a template on my MyBB Forum i payed alot of cash for the design but my template is fuck'd like i have edit button but when i click on it nothing happens... and i have Quote Button but its Multi Quote And I Want only Quote!! but even on this when i click its not working! all most all the buttons are isnt working!

like look at this Quote Code:

```
Code <a href="javascript:Thread.multiQuote({$post['pid']});" style="display: none;"
id="multiquote_link_{$post['pid']}">postbit_multiquote}" title="{ $lang->postbit_multiquote}" id="multiquote_{$post['pid']}"
/></a><script type="text/javascript">//[b]<!--[/b]    $('multiquote_link_{$post['pid']}').style.display = "";//
--></script>
```

is there something wrong?

and how can i make it only Quote not multi quote?!

or the edit code:

```
Code <a href="editpost.php?pid={$post['pid']}" id="edit_post_{$post['pid']}">postbit_edit}" title="{ $lang->postbit_edit}"
/></a><div id="edit_post_{$post['pid']}_popup" class="popup_menu" style="display: none;"><div
class="popup_item_container"><a href="javascript:;" onclick="Thread.quickEdit({$post['pid']});"
class="popup_item">{$lang->postbit_quick_edit}</a></div><div class="popup_item_container"><a
href="editpost.php?pid={$post['pid']}"
class="popup_item">{$lang->postbit_full_edit}</a></div></div><script type="text/javascript">//
[b]<!--[/b]    if(use_xmlhttprequest == "1")    {        new PopupMenu("edit_post_{$post['pid']}");    }//
--></script>
```

thanks alot for all helpers!! in advance!!!
