Thread: [Regarding Password Changes](#)

Omniscient - June 25, 2011, 5:04 pm

All l33t/ub3r accounts registered from before this dump (Feb 19) have had their passwords changed. You will need to do a password reset email.

<https://hackforums.net/member.php?action=lostpw>

All secret words are now deleted and for now the plugin is deactivated.

If you do not have access to the email you had on file please use contact form and provide your profile link and an email you have access to. I will check IP to ensure only those with previous account access get changed.

If you are not getting a password reset email please triple check your spam filters. If you have a hotmail, gmail, msn, or yahoo email those work best and our emails do go to these providers uninterrupted. They might be in a filter but overall the emails do arrive. I can check logs to ensure an email is sent and completed.

All new passwords must be 10 characters long and include uppercase, lowercase, and numbers. Example is "As89Ds04bC". Create strong secure passwords and do not use them on any other site. If possible write the password down somewhere secure.

Now please be patient. This can take days. There are thousands of members in the same predicament and I will work as quickly as I can to fix this for everyone. While I know this is a frustrating moment for you. It's also necessary to secure your account and ensure the safety of our community.

I sincerely apologize to all involved.

Gavain788 - June 25, 2011, 5:05 pm

My new password is secure as shit :)

King James - June 25, 2011, 5:05 pm

I've done it. No need to apologize Omni, it's all for the best.

Na, remember he posted a thread a while back that HF got shelled? They downloaded the DB (accounts and stuff, he reckons they wouldn't of downloaded the PM DB since it's so big); and shared/sold it around.. now it seems some people are decrypting the passwords and also recovering peoples email addresses. So ya, you should change your password if you haven't yet and also probably change your attached email address I reckon.

What you're saying is (if I'm thinking this through correctly) is similar to a salt. You'd just be hashing a hash (nothing wrong with that). Sure, it would be more secure. If you don't understand how salts work, here's an example of one scenario:

salt: *&^

dog --> 06d80eb0c50b49a509b49f2424e8c805

plus salt: 06d80eb0c50b49a509b49f2424e8c805*&^ --> 88516b43fa9acc936a5d601d9f875216

And... there's our new encrypted hash. But, what you said is a somewhat similar idea. I hope that this helps.

Cheers!

Sure it is. I bet they'd have your account in no time.

Slenderman - June 26, 2011, 1:29 am

I wasn't expecting my account to be on the list, but sure enough it was.

~exa - June 26, 2011, 1:50 am

Don't forget to change your email password if you were dumb enough to use the same pw as hf there!

VIRUZ™ - June 26, 2011, 1:59 am

Im not leet nor uber but I use a password for hackforums that I do not use anywhere else so its secure :)

iGaz - June 26, 2011, 2:16 am

Lol, what a coincident. Just two days ago, I programmed a "Strong Password Creator" lol

Mr Kewl - June 26, 2011, 2:17 am

I have changed my password. <3

Sex Tape - June 26, 2011, 2:55 am

Changed my password. Thanks <3

IPE_1202 - June 26, 2011, 2:56 am

password changed DONE.

thanks for the report omni.

The whole database was stolen, not just the l33ts and ub3rs.

He's forcing a password changed on the upgraded accounts because they are being targeted first.

Fabric - June 26, 2011, 3:11 am

i joined august i think but i changed my password

Z0z0l3LT - June 26, 2011, 3:12 am

im not ub3r/l33t :/ havent noticed any changes ;P

printshop - June 26, 2011, 3:15 am

I have the SQL list but how do I view it to see I am on the list ???

010100111001 - June 26, 2011, 3:18 am

I was lucky, They didnt manage to get password1234

LMFAO

ZeroCold - June 26, 2011, 3:38 am

Oke, I've change it!

Thanks!

J4mmy - June 26, 2011, 4:03 am

I did reset my password and will change it again soon to something that i can remember.

VIRUZ™ - June 26, 2011, 4:05 am

I would be suprised if they would be able to decrypt my md5 anyways >.<

Happeh - June 26, 2011, 4:18 am

I knew that, I was just saying that Omni wants only L33T and UB3R accounts to change their password.

DemonicEdge - June 26, 2011, 5:19 am

OK changed my password not sure if this applied to me changed password anyway. ?

Sunshine State - June 26, 2011, 5:40 am

Guys I found a way to see what it email

Go to ur usercp and I should tell you under regestation date

mrKaasa - June 26, 2011, 5:47 am

my new password is not 7Erer4345opSert so do not try to enter my acount whit that password

Grieve™ - June 26, 2011, 6:23 am

my password has been changed. thanks for telling us omni!

ra1d - June 26, 2011, 7:00 am

I change my password every week :)
No need to worry for me.

Remarkable - June 26, 2011, 7:09 am

Done it I appreciated the security

50GTB - June 26, 2011, 7:17 am

What is the reason for us to be changing the passwords? have we been dumped or what ?

VIRUZ™ - June 26, 2011, 7:29 am

Use this password as it suits you: "IAMAFUCKINGLAZYGAY".
10+ chars ==> Problem solved.

On-topic: Omni, check the thread in my sig. It should help the members.ahh you see thats only uppercase needs to have lowercase and uppercase and letter this would work
"l4MaFuCkInGL4ZyG4Y" 30 digits with uppercase, lowercase, symbols and numbers strong enough?

Siy? - June 26, 2011, 7:36 am

damn [censored].. alotithink

Forex - June 26, 2011, 7:44 am

Thanks for this. I appreciate you being security conscious and not lazy.

I tough i got hacked ?

Dot. - June 26, 2011, 9:16 am

I've set a reminder up, it'll remind me to change my passes every month :)

Thanks for the info <3

Dr.SLiM - June 26, 2011, 9:25 am

Reset my password with a password similar to ^,YHO"1g\n5bb't=. \ Bc(%j, +??e"
Ain't nobody reverse-engineering that shit

Hydrocodone - June 26, 2011, 9:31 am

Thanks bro it is allways good to have you looking out for us.

iphonejuul - June 26, 2011, 9:36 am

done, Thanks for the heads up omni

ziglet^ - June 26, 2011, 9:51 am

Have Ub3r/l33t users lost a lot PMs too or is it just me??

Brutality3 - June 26, 2011, 10:18 am

I wish I could reset my password but don't remember my email. :(Hopefully Omni works on my account soon because I miss it already.

elitexero - June 26, 2011, 10:27 am

This is why I'm glad I had my password as 'hackforums'. Never use simple insecure passwords like this, but I don't trust databases staying secure on forums like this.

Otherwise I'd be dealing with a fucking fiasco on my end.

Thanks Omni for rolling this out as always :)

Grizz - June 26, 2011, 10:58 am

Sounds like that will be a huge pain in the ass for you, thanks. ?

That's dumb. Just use a unique password.

And I'm working hard to recover as many accounts as I can as fast as I can. It's literally hundreds of members having problems remembering their original email address or simply don't have access to their original one.

After this fiasco I'm going to have to setup something to do reminders every now and then for members to review their information and confirm it's working and valid.

So for now please be patient. I'm working as fast as I can. It could be days before everyone is done.

Elite Hacker 69 - June 26, 2011, 11:33 am

Is there a way in Chrome to hide the bar on the top? Or any way? I keep thinking I have a PM
