Thread: [CyberGate Official Tutorial + Open Port Tutorial + Tested \[Video & Worded\]](#)

Sneaky™ - June 25, 2011, 8:56 pm

Here is my Tutorial, This took a long time to make & to make Video so please Rate this post and comment below

Step 1:

-Disable any Virus Protection you have.

Step 2:

-Open up CyberGate (Wait 20 Seconds then hit "Accept")

Image: Spoiler [\(Click to View\)](#)

Step 3:

-When CyberGate is open, Click "Control Center" then hit "Start" (You will get a pop up saying "Listening ports list")

Image: Spoiler [\(Click to View\)](#)

Step 4:

-Go to Start Menu, then go to "Run" (or search box at the very bottom) and type in cmd

Image: Spoiler [\(Click to View\)](#)

Step 5:

-In cmd, type in IPCONFIG

Image: Spoiler [\(Click to View\)](#)

Step 6:

-After you typed IPCONFIG, hit Enter on your keyboard, then find where it says "Default Gateway" and write that number down.

Image: Spoiler [\(Click to View\)](#)

Step 7:

-Type the Default Gateway into your web browser and sign into your Router.

Step 8:

-Go to Application & Gaming (Could be Different for You) Then in Single Port Forwarding (Could be Different for You) Type in any port you want (I used 3099), and make sure your ip address matches. Then Save Changes

Image: Spoiler [\(Click to View\)](#)

Step 9:

-Go back to CyberGate & Enter the port you used in the box, then hit the blue arrow, and make the password 123456 then hit "Save"

Image: Spoiler [\(Click to View\)](#)

Step 10:

-Go to www.no-ip.com and make an account. Once you made an account click "Add Host"

Image: Spoiler [\(Click to View\)](#)

Step 11:

-Make your domain anything you want. Then hit the drop down menu, and put it to .no-ip.info When done, Hit "Create Host"

Image: Spoiler ([Click to View](#))

Step 12:

-Open up DUC 3.0 and sign in using your No-Ip.com Account.

Step 13:

-In DUC 3.0, Go to "Select Hosts" Then check the domain you just made, then hit "Save"

Image: Spoiler ([Click to View](#))

Step 14:

-Click "Control Center" then go down and click "Builder" then hit "Create Server"

Step 15:

-Make a New User, Name it anything you want. Then click your new user, then hit "Forward" in the bottom right corner.

Image: Spoiler ([Click to View](#))

Step 16:

-After you hit "Forward", you will be in "Connection" Tab. The first thing you do here is click the numbers in the DNS/Port then Click "Delete"

Step 17:

-Now Click "Add" and in the pop-up box, type in the domain you made in step 11 then :3099 (Or whatever port you used) Then hit "Ok"

Image: Spoiler ([Click to View](#))

Step 18:

-Have your Identification anything you want, but make sure your password is 123456

Step 19:

-Now click the "Installation" Tab, and have your setting Exactly like mine, Also click both of the Random Buttons 5 times each.

Image: Spoiler ([Click to View](#))

Step 20:

-Under the "Message" Tab, it is all optional. If you want to add a message you can.

Step 21:

-DO NOT TOUCH ANYTHING IN THE "Keylogger" or "Anti-Debug" TAB (Make sure in Anti-Debug that all options are Checked.

Step 22:

-Go to the "Create Server" Tab, All options are up to you. If you want an Icon or not. Click "Create Server" and save it as Anything you want.

Step 23:

-When you get the "Information" Pop-Up, just click "Yes"

Now we are Done!

Test:

Thanks For Reading My Post! Please Rate this Post! If you have any Questions feel Free to PM me, or Post Below!!!

BlackxWaterUSA - June 25, 2011, 9:38 pm

Good TuT man very good.

^-^

BloodFire - June 25, 2011, 9:41 pm

I think you should've post this in the cybergate section >__< and you forgot to include to tell them to completely disable their firewall because many out there that I helped have that problem, their AV is off but the firewall is blocking it. but other than that this guide is good^__^ I can see you've work hard here. Thanks for this guide.

[img]http://www.laymark.com/i/m/m077.gif[/img]Very nice informative tutorial. Keep up great work.

McFlurry - June 25, 2011, 9:44 pm

Very nice tutorial. Its easy to follow, Great Job!

Storm Shadow - June 25, 2011, 9:46 pm

Great Post....

Keep up the good work & post much more...

>Rated<

Take Care

Sneaky™ - June 25, 2011, 10:23 pm

Thank you guys so much! took me awhile

I did man, no need to be rude like that. I posted it in the General RAT Area too

Jinu - June 26, 2011, 12:43 am

Nice TUT dude !!

:) .

Muneeb001 - *June 26, 2011, 2:38 am*

NICE Tutorial...:)
too shoorrt
