Thread: [\[Tut\]Simple Spreading Guide\[Tutorial\]](#)

Flayer - June 26, 2011, 2:19 am

Welcome

Hello, member of HF. Today i will present you with several different spreading methods for either your RAT/Keylogger/Trojan etc...

It will include using Different websites and Social engineering and a Brain of course.

(Please take in notice this is my first Tutorial On Hackforums, so please do not flame)

Youtube

Youtube is a website where millions of users around the world create accounts and share videos which can be instructional or Just a word to get across and can be used for much more.

On youtube, many users like to create fake programs with Visual Basic or Create real programs for the community to use.

How to spread with youtube you are wondering? Well , steal a video.... maybe a video on a program whats real and make sure it works and has lots of likes etc and then steal the video, i'm not going to give you the links because you can use the 'Search Bar' To find the appropriate program for your usage.

Once you have stolen your chosen video, Upload it with a Classy and catchy name , or just steal the one of the original one, and then replace the link for the download with your RAT/Keylogger/Trojan Link, or you can use a binder to bind it to the actual program so theirs not any Suspicious Activity going on.

Omegle

Omegle is an online chatting room, but its just you and a random Stranger. Just like chat roulette but without the video, but their is an option for video if you want to go into detail.

We can use this to spread our RATS/Trojan/Keylogger , but first Strike up a conversation and say That your 16 years old and wants to exchange pics, and then re-name your Trojan etc... to something like 'Collection of dirty pics' or 'Sexy slideshow' or just 'Slideshow'.

Upload it to fileave.com or just a simple website like mediafire.com , make sure your server is FUD or, UD and then wait for them to pop up on Your RAT etc..

After that, make an excuse saying " Gotta go have my tea now " or such. Any excuse will do.

Facebook

Facebook , full of social and interacting people. A great place to spread of course!

this is one of my favourites , firstly Create a fake account and get some Plastic whore etc.. picture

(Blonde Girl always works, Dont flame not saying all Blondes are whores/Plastic) and add masses of people, and remember dont just add one picture, make an album called randoms and add some their.

Now target your group or random people etc and mass add them, wait a couple of minutes or try another spreading method while people accept.

Once you have a good amount of people on your friends list, send them your Java drive by link or your direct link and say its some dirty/Horny/Sexy pictures or use the last example 'SexySlideshow'. (Remember make sure its , FUD or UD, else you wont get as many slaves)

Wait for them to pour in your RAT, and bam a nice load of Slaves ready to be sold , or make money of etc..

ChatRooms

Ahh, my favourite THE CHATROOMS! this is a classic and will easily get you some slaves, maybe even Some Girls at last!

Very simple really, you can use these for example for this next method :

www.321teenchat.com

www.teenchat.net

www.teenchat.com

www.kidschat.net

www.chatfamily.com

Get your server ready and rename it to something Dirty and funky what all the girls/Boys will be wanting, and then make up a Line like " Hey guys/girls just took some sexy Pictures and wondering if any of you would like to check them out here > (your virus link) < xxx let me know what you think x "

Surely you will get more than 2 slaves by doing this if your Server is FUD, UD.

Thank you for, taking notice of my guide , remember this is my first EVER tutorial and i know its short but just wanted to see if i could write one.

Thanks :)

Leg?nd - June 26, 2011, 5:02 am

Thanks for the tutorial, helped me alot!

-Marizu

Ayden™ - September 14, 2011, 5:01 am

Wow, no comments? Bump mate nice work!

SIM-888979 - September 14, 2011, 5:04 am

Nice work but there's already tons of similiar threads like this. These methods are probably the most common and almost everyone know these. Sorry but this is pretty common so no biggie.

s41mm3r - September 14, 2011, 5:56 am

nice share mate, i used these myself and they work really well last night was my first time spreading my server and with the chat room one i made atleast 30+ slaves ?

5bytes - September 14, 2011, 6:25 am

thanks man, i'll spam my fud server on the livechat ;)

masterzeus - September 17, 2011, 3:15 am

www.zozo-chat.com this is awesome chat than 321

oltenvisp - September 17, 2011, 3:21 am

good tut i am sure it will help to alot of members here :)

B3cnoc - September 17, 2011, 4:02 am

Useful guide for beginners. You should add torrents to your spreading methods. You will get a lot of slaves in that way.

yandoc - September 17, 2011, 1:06 pm

You should add torrents to your spreading methods. You will get a lot of slaves in that way.
