Thread: [Return Money From E-Whoring](#)

urkowow - June 26, 2011, 10:17 am

Okay Guys, Got £15 from this guy who owns a business, I was gonna black mail him but i Didnt. He said somet about telling Pay.Pal. So should i return it, Im just asking because IM new to E-Whoring and im not on a VPS or Proxy.

Just asking since I did not blackmail him i dont think i would get in trouble, and he was watching a 17 yo on cam(looks 17)... So should I spend it or return?

Cheers

Tell him if he calls paypal to get his money back, you're gonna report him to the feds for watching a 17yo on cam. tell him you have all proofs including his IP address, which will lead the feds straight to him.

Yeah, if that was a "17 year old" he will be the one in trouble

Keep it and start using a VPN or proxy. If they see that your ip hasn't connected anymore they will likely assume that it was just a proxy... and that's if they even cared about \$15 and if the guy was stupid enough to tell paypal he was paying to see a 17 year old strip. :p

Do not return the money and just say him that you will tell paypal everything if he do so.
