Thread: [FUD CyberGate Official Tutorial + Open Port Tutorial \[Worded + Video\]](#)

Sneaky™ - June 27, 2011, 11:04 pm

Here is my Tutorial, This took a long time to make & to make Video so please Rate this post and comment below

Step 1:

-Disable any Virus Protection you have.

Step 2:

-Open up CyberGate (Wait 20 Seconds then hit "Accept")

Image: Spoiler [\(Click to View\)](#)

Step 3:

-When CyberGate is open, Click "Control Center" then hit "Start" (You will get a pop up saying "Listening ports list")

Image: Spoiler [\(Click to View\)](#)

Step 4:

-Go to Start Menu, then go to "Run" (or search box at the very bottom) and type in cmd

Image: Spoiler [\(Click to View\)](#)

Step 5:

-In cmd, type in IPCONFIG

Image: Spoiler [\(Click to View\)](#)

Step 6:

-After you typed IPCONFIG, hit Enter on your keyboard, then find where it says "Default Gateway" and write that number down.

Image: Spoiler [\(Click to View\)](#)

Step 7:

-Type the Default Gateway into your web browser and sign into your Router.

Step 8:

-Go to Application & Gaming (Could be Different for You) Then in Single Port Forwarding (Could be Different for You) Type in any port you want (I used 3099), and make sure your ip address matches. Then Save Changes

Image: Spoiler [\(Click to View\)](#)

Step 9:

-Go back to CyberGate & Enter the port you used in the box, then hit the blue arrow, and make the password 123456 then hit "Save"

Image: Spoiler [\(Click to View\)](#)

Step 10:

-Go to www.no-ip.com and make an account. Once you made an account click "Add Host"

Image: Spoiler [\(Click to View\)](#)

Step 11:

-Make your domain anything you want. Then hit the drop down menu, and put it to .no-ip.info When done, Hit "Create Host"

Image: Spoiler ([Click to View](#))

Step 12:

-Open up DUC 3.0 and sign in using your No-Ip.com Account.

Step 13:

-In DUC 3.0, Go to "Select Hosts" Then check the domain you just made, then hit "Save"

Image: Spoiler ([Click to View](#))

Step 14:

-Click "Control Center" then go down and click "Builder" then hit "Create Server"

Step 15:

-Make a New User, Name it anything you want. Then click your new user, then hit "Forward" in the bottom right corner.

Image: Spoiler ([Click to View](#))

Step 16:

-After you hit "Forward", you will be in "Connection" Tab. The first thing you do here is click the numbers in the DNS/Port then Click "Delete"

Step 17:

-Now Click "Add" and in the pop-up box, type in the domain you made in step 11 then :3099 (Or whatever port you used) Then hit "Ok"

Image: Spoiler ([Click to View](#))

Step 18:

-Have your Identification anything you want, but make sure your password is 123456

Step 19:

-Now click the "Installation" Tab, and have your setting Exactly like mine, Also click both of the Random Buttons 5 times each.

Image: Spoiler ([Click to View](#))

Step 20:

-Under the "Message" Tab, it is all optional. If you want to add a message you can.

Step 21:

-DO NOT TOUCH ANYTHING IN THE "Keylogger" or "Anti-Debug" TAB (Make sure in Anti-Debug that all options are Checked.

Step 22:

-Go to the "Create Server" Tab, All options are up to you. If you want an Icon or not. Click "Create Server" and save it as Anything you want.

Step 23:

-When you get the "Information" Pop-Up, just click "Yes"

How to make it Undetectable:

Step 1:

-Open Up Zmini+Crypter

Step 2:

-Click ok the three dots next to "Select Your File", then choose your RAT

Step 3:

-Choose Icon, If you want one, it is all up to you

Step 4:

-Check "Use StartuP"

Step 5:

-Click "Protect File"

Now we are Done! You Now have a working RAT & its Fully Undetectable

Test:

Image: Spoiler ([Click to View](#))

Here is My Video Tutorial

[Video: <http://www.youtube.com/watch?v=6MUAay2zBGQ>]

DOWNLOADS:

CyberGate: <http://www.#!/?d=C0N1LEKS>

DUC 3.0: <http://www.no-ip.com/downloads.php?page=win>

Crypter: <http://www.#!/?d=6YQWNMN3>

Thanks For Reading My Post! Please Rate this Post! If you have any Questions feel Free to PM me, or Post Below!!!

Lex - June 27, 2011, 11:05 pm

Seems like a nice tutorial.

You should share the crypter with us. ^^

Thanks for the share though. :) Keep up the good work.

Dizzy Wright - June 27, 2011, 11:06 pm

Great tutorial, to bad i don't have the crypter! xD

Majora - June 27, 2011, 11:08 pm

Looks like a nice tutorial but like the guy above me I also don't have the crypter.

Sneaky™ - June 27, 2011, 11:20 pm

i will make downloads for everything! one second

Majora - June 27, 2011, 11:34 pm

(Jun 27, 2011 11:20 PM)Sneaky™ Wrote: [\[CITE\]](#) i will make downloads for everything! one second
Awesome. But the crypter won't be FUD for too long if you post it and it's free :)

Spowted - June 28, 2011, 2:43 am

thanx, but when I click on my server, im not in the list of victims ??

iMM GoD - June 28, 2011, 2:49 am

(Jun 28, 2011 02:43 AM)Spowted Wrote: [\[CITE\]](#) thanx, but when I click on my server, im not in the list of victims ??

that means your port isn't open or your cg passes don't match(in server and in client)

AuKurHack. - June 28, 2011, 4:44 am

Very nice tutorial,

And i agree you should share the crypter ;)

Ui Hirasawa - June 28, 2011, 6:19 am

Nice, ^_^. I have that same guy on my RAT.

Sneaky™ - June 28, 2011, 9:33 am

(Jun 28, 2011 06:19 AM)?ScripT Wrote: [\[CITE\]](#) Nice, ^_^. I have that same guy on my RAT.

Who do you have on your rat? lol

sh4rkbyt3 - June 28, 2011, 9:36 am

Put a protection on that crypter , n00bs will scan at virustotal and detect it.

iGazzy - June 28, 2011, 9:40 am

Wow, thanks for the crypter. Is there any way to re-FUD a UD crypter?

Sneaky™ - June 28, 2011, 9:42 am

(Jun 28, 2011 09:40 AM)iGazzy Wrote: [\[CITE\]](#) Wow, thanks for the crypter. Is there any way to re-FUD a UD crypter?

I honestly dont know on that one lol, sorry

sh4rkbyt3 - June 28, 2011, 9:43 am

(Jun 28, 2011 09:42 AM)Sneaky™ Wrote: [\[CITE\]](#) I honestly dont know on that one lol, sorry

I think it's possible when you have the source.

Sneaky™ - June 28, 2011, 9:51 am

that could be true lol, I will look into it for you

Ui Hirasawa - June 28, 2011, 10:04 am

(Jun 28, 2011 09:33 AM)Sneaky™ Wrote: [\[CITE\]](#) Who do you have on your rat? lol

The same guy in your picture, dusty-pc. I'm kind of guessing that is you, ^_^. I'd go to the HJT section if I were you. I got them from installs.

Sneaky™ - June 28, 2011, 10:14 am

(Jun 28, 2011 10:04 AM)?ScripT Wrote: [\[CITE\]](#) The same guy in your picture, dusty-pc. I'm kind of guessing that is you, ^_^. I'd go to the HJT section if I were you. I got them from installs.

You rated me? Im confused lol

Ui Hirasawa - June 28, 2011, 10:29 am

Apparently I have you RAT'd, but I havn't seen you in a few days and I don't even use CyberGate anymore(blackshades). Anyways, I got it from installs which obv means its spreading. Go to the HJT section bro

Sneaky™ - June 28, 2011, 10:32 am

(Jun 28, 2011 10:29 AM)?ScripT Wrote: [\[CITE\]](#) Apparently I have you RAT'd, but I haven't seen you in a few days and I don't even use CyberGate anymore(blackshades). Anyways, I got it from installs which obv means its spreading. Go to the HJT section bro
HJT? Whaaat? lol im sooo confused right now

Ui Hirasawa - June 28, 2011, 10:33 am

You're infected, not from me I only get bots from installs. Go to that link and get clean.I didnt open anything so I am not infected

Ui Hirasawa - June 28, 2011, 10:37 am

Okay, but I know for a fact I saw you in there O.o. I'd post one just in case though.

Sneaky™ - June 28, 2011, 12:10 pm

Ok, will do man :) thanks

Skipp - June 29, 2011, 2:51 am

Thanks from the tutorial, it was very usefull ! :)

Vendicative21 - June 29, 2011, 6:46 am

Hey man i've got problems with portforwarding :(
i have a Cisco Router and i cant portforward it :<

tankist147 - June 29, 2011, 7:09 am

Fucking awesome guide ! Thank you very much bro.

I have only one question, how does keylog work there, idk how or where to see logs what my slave has typed or visited.

EDIT: Does it also work when slave uses screen keyboard :)?

Sneaky™ - June 29, 2011, 10:05 am

(Jun 29, 2011 06:46 AM)Vendicative21 Wrote: [\[CITE\]](#) Hey man i've got problems with portforwarding :(

I have only one question, how does keylog work there, idk how or where to see logs what my slave has typed or visited.

EDIT: Does it also work when slave uses screen keyboard :)?Well they say not to enable the keylogger, but if you have a slave, click on them go to keylogger and hit download, and everyting they type appears

tankist147 - June 29, 2011, 10:55 am

I had myself as slave, but now i dont have anymore. Hmm, even when i click on server i wont come back there, whats the problem? I still have my other slave.

Sneaky™ - June 29, 2011, 11:08 am

(Jun 29, 2011 10:55 AM)tankist147 Wrote: [\[CITE\]](#) I had myself as slave, but now i dont have anymore. Hmm, even when i click on server i wont come back there, whats the problem? I still have my other slave.

this could be that they turned off there computer, or there AV picked it up and deleted it. This has happened to me before. Just re infect them

tankist147 - June 29, 2011, 11:18 am

Im talking about myself? I have AV off and im online? But i still wont appear in the list anymore somehow.

Sneaky™ - June 29, 2011, 12:02 pm

maybe your ipv4 changed and you need to update ur port

ronbof - June 29, 2011, 12:08 pm

Will you be updating the link to zmini? :D

hackit12 - June 29, 2011, 3:25 pm

thanks man nice tutorial :)

Shane1521 - June 29, 2011, 3:42 pm

Download link isnt working for me

Sneaky™ - June 29, 2011, 4:15 pm

One second, I will update the link.

Actually this link to the crypter seems to still work fine

Keep the posts alive guys!!!

iamsopissedoff - June 30, 2011, 5:43 am

bit of a nuub question but does it matter which port i forward?

(Jun 29, 2011 11:18 AM)tankist147 Wrote: [\[CITE\]](#) Im talking about myself? I have AV off and im online? But i still wont appear in the list anymore somehow.

Yeah i have the same problem but as the server file is persistant i always appear eventually.

Sneaky™ - June 30, 2011, 10:20 am

Well you should set a new port if you are going to re make a server

zeken - June 30, 2011, 1:15 pm

Ok one question, when i go to my port forwarding what would my selection be if i do not have application and gaming?

Sneaky™ - June 30, 2011, 7:29 pm

Well Im not for sure because I dont know what your router is

pbock - July 1, 2011, 1:09 pm

Great tutorial !

with your help i finally found a way to get FUD on my server (at least for the 5 AV's on novirusthanks)

Sneaky™ - July 1, 2011, 1:24 pm

Well, Im glad to know that i helped :)

Technine21? - July 1, 2011, 2:10 pm

Great tut bro did a scan on my-avscan and these were the results that one that was detected was probably a false positive or something. Keep up the good work!

When i test it on myself the server doesnt seem to work after the crypt. Any help on this?

Sneaky™ - July 1, 2011, 2:18 pm

PM me on it... Also its good to know crypter is still good

Technine21? - July 1, 2011, 2:28 pm

pm'd u with my aim please add me

Sneaky™ - July 12, 2011, 8:12 pm

Come on Guys! Keep this post Alive!

apoel1986 - July 13, 2011, 2:19 pm

HUGE VOUCH FOR THIS!!

great!!

Sneaky™ - July 19, 2011, 1:57 pm

Thanks man, i appreciate all your guys comments

[KiLLeR]Hany - July 20, 2011, 5:01 am

Nice TUT dude BTW... can u give us the Crypter Download pleasee i loved your hard work

Sneaky™ - July 20, 2011, 2:13 pm

I have the crypter download there already... is it down now or what?

ninjapenguin23 - July 20, 2011, 3:03 pm

TYVM! finally a crypter that atleast SORT OF works lol.

Sneaky™ - July 20, 2011, 5:57 pm

Haha, yaaa, hope you enjoy :)

ninjapenguin23 - July 20, 2011, 8:10 pm

hey, i think i got it to work, then i was stupid and didnt name the file that i crypted (a dark-comet server) well and lost it, so i tried to do it again with all the same settings and stuff, and i get an error while crypting:

error: function without an as clause; return type of object assumed.

then it says it worked, but a file doesnt show up where i told it to save... :|

edit: oh, and then it says "error: compilation failed: '0x80131198'

then it says it protected successfully.

ericko - July 20, 2011, 8:46 pm

looks like it is no longer FUD :(

Sarioookas - July 21, 2011, 12:48 am

don't working for me :S Anybody can help ?

Jolly - July 21, 2011, 8:32 am

Nice Tutorial, i followed it, and everything went as described, except that my pc, doesn't pop up after i run the server.exe file.

I double checked that my ports have been forwarded and my no-ip is running. What might i have done wrong?

Sneaky™ - July 21, 2011, 11:48 am

If you restart your cybergate server, u will need to make a whole new .no-ip.info domain, and open a new port

ZeKiiTo - July 21, 2011, 11:50 am

The best tuto on HF FOR CyberGate thanks bro keep HQ (:

Sneaky™ - July 21, 2011, 11:51 am

Thanks sooo much man, took a long time to make this

Tehking - July 21, 2011, 12:00 pm

Very nice guide mate helped me a lots but if u can upload that crypter to uppit cuz my internet detect it as virus :L

Sneaky™ - July 21, 2011, 2:18 pm

(Jul 21, 2011 12:00 PM)basel12 Wrote: [\[CITE\]](#) Very nice guide mate helped me a lots but if u can upload that crypter to uppit cuz my internet detect it as virus :L
Disable your Virus Protection then lol

cidershire - July 22, 2011, 1:45 pm

It works! Thanks for the guide. Just a question, is there a good reason for not melting the file?

Huskyhond - July 23, 2011, 5:39 am

People will suspect if their file suddenly melts away :p

pureowned360 - July 23, 2011, 9:34 am

wtf i have check to see which ports are open, chose a open port, port forwarded it, did the exact setup you did, checked the passwords were correct and still, when i run, nothing. please help

Fop - July 23, 2011, 9:57 am

(Jul 23, 2011 09:34 AM)pureowned360 Wrote: [\[CITE\]](#) wtf i have check to see which ports are open, chose a open port, port forwarded it, did the exact setup you did, checked the passwords were correct and still, when i run, nothing. please help
try to update modem firmware.

or

turn off firewall (or dont forget to add exception port to firewall.)

o

check maybe u wrote everything succesful in port forwading section, but u didnt select tcp&udp .

if u wrote everything good, first thing what u should check is a firewall.

Vinny_the_pooh - July 23, 2011, 2:57 pm

I'm not sure if i did it right. but when i try to open my .exe file that i made. It says mosqliteisnotfound. Or something along the lines of that. Is that normal or have i done something wrong?

Fop - July 23, 2011, 3:00 pm

(Jul 23, 2011 02:57 PM)Vinny_the_pooh Wrote: [\[CITE\]](#) I'm not sure if i did it right. but when i try to open my .exe file that i made. It says mosqliteisnotfound. Or something along the lines of that. Is that normal or have i done something wrong?

can u put a screenshot, because i did not get u!

Sneaky™ - July 23, 2011, 8:51 pm

Melting the file is pointless, like the guy said it is more suspicious

vial - August 3, 2011, 3:33 pm

very nice Tut. Nice work man this clears up alot of stuff. Figured id check these forums out and see some of the newer techniques being done these days.

Sneaky™ - August 3, 2011, 3:41 pm

Glad it helped u out man :)

-Stickle- - August 3, 2011, 10:42 pm

Very nice Tut Sneaky mate... Keep up all the hard work..

Sneaky™ - August 3, 2011, 10:43 pm

Thanks bro! very appreciated

ShaDw.Fi3nD - August 4, 2011, 12:16 am

Everything Fine I followed all steps but i cant c my own Server :(i also followed Tut ViD BUt STill cant c My Server come u come On Teamviewer and Plz fix this problem Please.

Sneaky™ - August 4, 2011, 8:40 am

Yes, send me a private message with ur Teamviewer ID & Pass

dkbug - August 4, 2011, 10:07 pm

I seem to be having the same problem as a few other. VERY good guide, just having troubles "selecting" my file in the crypter.

I'll drop you a pm with my email in it and I will send you teamviewer details through that once I get a response.

neif - August 5, 2011, 8:14 am

is cybergate download link working??

/because for me no

elijah254 - August 5, 2011, 1:40 pm

weird. download dos not work for me

Artiex - August 5, 2011, 6:33 pm

Wow great tutorial man mines up and running and FUD!

matrix00 - August 6, 2011, 9:48 am

why crypter is not FUD any more ...

Sneaky™ - August 6, 2011, 10:02 am

The crypter might been over used and now dud.

RufioStill - August 6, 2011, 10:49 pm

that sucks :C man.. how can i get another free FUD crypter???

PatrickGonzaga - August 10, 2011, 9:55 pm

it is a very nice tutorial, thatt's why i am planning to us this.

LiamLovesHax - August 11, 2011, 2:20 am

Ima try this :P

no doubt

Are you trolol lol omfg 50 characters is soo hard to meet the quota

Click Me - August 12, 2011, 5:15 am

Great TUT, Thanks for download links :)

-New char limit annoys me

jimmys1821 - January 3, 2012, 1:17 am

is the crypter FUD? and the victims wont show :(

ExiLeD4EverR - November 22, 2014, 1:39 am

Can u send me the R.A.T. pls because download link doesn't work pls i really appreciate this!Thnx in advance

?Genocide(X) - November 22, 2014, 1:43 am
