hav0c1995 - June 29, 2011, 1:21 am

Hey, guys. I have made a theme which I call it as "The Twitter Theme" because it resembles to the famous social networking site "Twitter".

Below is a screenshot of the theme.

If you want the theme, just PM me and I will give it to you.

And guys, I also need your feedback. So, what do you think about this theme?

EDIT:

I forgot the credits. Credits goes to AeonHack & marvinn.

I don't see why you wouldn't just post it, but I guess that is your choice.

I didn't post the theme because people will leech it and I don't like leeching.

Then why should be care about your theme when we can't use it? Also you just took aeon hacks theme and changed colors.

I haven't leeched his themes. I only used AeonHack's Theme Base.

You added credits after i posted, but you just changed colors, so its nothing special.

Sent the theme to you.

Don't forget to thank me.

Endeavour - June 29, 2011, 2:21 am

I don't like it. Sorry. Also, why would you not post your source when there are professional themes here on HF which are posted for everyone to use?

Not positive, but constructive feedback.

I'm just not really digging it, the buttons could use some work, and maybe some sort of a striped effect on the progress bar would help it.

Kind of cool, however pretty ironic how you forget to post the credits, then you dont post the download link because "you hate leeching".
