Hello Lovely Members!

This is an ebook I wrote to remove tracks of internet use and data from a computer. This is handy for removing internet tracks for annoying girlfriends but also for storing your private data.

This is the first part of my e-book, the basic. In 1/2 month I will give out the second part, I suggest to first read this one.

This is the first part, there more ways to delete tracks but that ebook will come in a month. Please don't be to hard on my grammar. I saw I said 'no' instead of 'now' please if you're not retarded I think you get what I mean.

This E-book includes:

- *Incognito browsing
- *How to remove your history the best way
- *TrueCrypt, encrypting your data
- *Remove 'last used' files
- *Explain why to remove cookies

HOW TO GET THIS:

Thanks, great book. And what's even better, it's even for linux, yay! Now I'll hopefully finally get myself to set up Truecrypt. Another thing I really like about it - it has nice unobtrusive design. Someone would say what's so great bout it? But after I saw on this forum so many books with 'fancy' graphics and colours which make your eyes bleed if ya read it longer than 30 seconds, I can really appreciate it.
