Thread: [\[Release\] Dark Screen Stealer V2.0 \[Release\]](#)

mana5olia - September 10, 2009, 8:22 am

Sup HF ?,

Here is the second release of my screen stealer, i added some new features and it become more stable.

[IMG]http://i32.[censored].com/t021px.png[/IMG]

- New GUI.
- Server.exe is now self started (it will copy itself to the startup path, and will run next time the machine started on)
- Server.exe is totally hidden.
- More stability will uploading pictures.
- .PNG picture format with high quality.
- Memory usage goes between (30-35)KB.

How to use:

- Put your FTP name in these formats
<ftp.drivehq.com> (if you want to upload the pictures to the root drive).
<ftp.drivehq.com/test> (if you want to upload them to sub folder called test).
- Then fill out your username.
- Put your password.
- Determine the time interval between uploading each picture (Value must be 1,2,3,4,5,... minutes only as integer).

BUMP BUMP !!!! ?

ayalew - September 10, 2009, 1:38 pm

Could you explain what it does? And what do you mean by "minutes by integer"?

Omerta - September 10, 2009, 1:41 pm

Very nice share man.

(Sep 10, 2009 01:38 PM)ayalew Wrote: [\[CITE\]](#) Could you explain what it does? And what do you mean by "minutes by integer"?

it takes screenshots of victim's desktop and will upload in your host.

imposter johnson - September 10, 2009, 1:43 pm

is that all? not that that's not good enough or anything.

wow good job thnx for this

wow this is mad good job you make some awesome free programs

OmniCode - September 22, 2009, 2:32 am

Oh shit man, Original and FUD.

I love this. <3

Man i'm like your fanboy now.

How is it removed?

Delete it and it stops sending?

stop the process first, then go to ur startup path and delete it from there, cause it copy it self to startup path.

OmniCode - September 22, 2009, 2:54 am

Very nice man.

This is so original too.

It's not a random keylogger or anything.

Just a FUD Screen capturer.

5/star.

This will be part of my Spy Tools. =]

zpinto - September 22, 2009, 8:13 am

Hey! great one ;)

It does work! it sent me screenshots every minute. The only problem is that it doesnt startup with

the system if i restart it.

Im using Windows 7 64 bits.

reichoman3 - September 22, 2009, 8:19 am

thanks dude it works and its fud :P

lercio - September 22, 2009, 8:36 am

Thanks thanks thanks, but if the firewall blocks it, then what's the use?

Also it is written in .Net, and if my "victim" did not have it installed?

victim PC must have .net framework, most of them have it recently...

and till now i have faced no issues with me or with other users with FW stuff.

lercio - September 23, 2009, 2:48 am

The firewall of Eset Smart Security, detect this on port 21

Sorry...

Clown™ - November 18, 2009, 9:05 pm

is this exe can do keylogger too ?

Infam0u\$ - November 19, 2009, 2:26 am

mana5olia just WoW.. great idea dude... Prog is clean... work pretty well and so easy to use...

thanks again and cant wait to find another great idea like that.

JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.
