Thread: [\[GIMP/Photoshop\] Metallic Text Tutorial](#)

Decim - June 30, 2011, 1:24 am

I've seen many people at HackForums asking for this, so I thought I might as well make a tutorial.

Your result would be something like:

Tutorial:

Spoiler [\(Click to View\)](#)

Thank me if you found this useful,
Arcane

Shut up , if you cant appreciate but dont criticize.

splashy - June 30, 2011, 1:58 am

What text are you using in this tutorial?

The font used is Harbara.

Decim - July 9, 2011, 11:14 pm

No more replies?

Ah, I have to stop making tutorials.

Wolves - July 10, 2011, 8:22 pm

I found this to be quite interesting and helpful. ^_^

I prefer GIMP over PS, but since I had started on PS, there are certain things that I miss such as hotkeys that gimp doesn't have.

Alside - August 17, 2011, 5:04 pm

THANK YOU VARY MUCH FOR THIS TUTORIAL :0 VARY GOOD FOR NOOBS LIKE ME

Pirillo - August 17, 2011, 8:51 pm

Very nice tutorial, easy for beginners and starters. Even though I don't use GIMP. :)

Decim - August 18, 2011, 2:31 am

Thank you all, for the wonderful replies.

Fascinate - August 19, 2011, 1:41 am

Gimp/Photoshop you showed the gimp part now were is the Photoshop? I can't seem to do this in Photoshop very good, with the shrinking etc.

All the features mentioned in this tutorial is available in Photoshop as well. You just need to find it ?

Mirakuru - August 19, 2011, 9:06 am

Thanks buddy, it's a great tutorial.

I need to be better than now at ps, it will help me.

Riku9182 - August 19, 2011, 7:49 pm

Pretty nice tutorial Goodjob mate!

If you have any other tuts on how to make text look cool pm me xD

Maggi - August 20, 2011, 3:59 am

Thanks for this tut.

It is very easy to learn for begginers.

Nice good work.

Maggi - August 20, 2011, 4:01 am

Thanks for this tut.

It is very easy to learn for begginers.

Nice good work.
