Raaz - June 30, 2011, 7:15 am

Nice compilation at the top and good tut at the end, quite helpful and time conserving thread.

TreeHugger - June 30, 2011, 7:16 am

Thank you so much will give this a read later on in the plane:)

Sonic - June 30, 2011, 7:16 am

Hey, what if the URL is something like Code

/index.php?-action=browse&-table=files&file_mimetype=video&-cursor=12&-skip=0&-limit=30&-mode=browse?

Falconw0w - June 30, 2011, 7:18 am

5 star thread. Very nice work mate. Good one

Stenography - July 3, 2011, 2:42 pm

I am very intrested in something called "blind injection"

Could you give us tutorial for that ?

The Unknown - July 3, 2011, 2:48 pm

(Jul 3, 2011 02:42 PM)PolarX Wrote: [\[CITE\]](#) I am very intrested in something called "blind injection"

Blind Injection is actually Blind Sql Injection and am pretty sure it doesn't differ a lot from the normal Sql Injection (Sqli)...

First Blade - July 3, 2011, 6:06 pm

Blind injection is pretty hard to memorize, i have union based down from memory but blinds are just difficult to memorize.

Anyways, i cant find a site that doesnt gimme this error:

Method Not Implemented

GET to /movie.php not supported.

I got that from this: <http://movieposters.2038.net/movie.php?id=../../../../etc/passwd>

What do i do?

malo1992 - July 4, 2011, 7:48 am

That's everything a hackernewbie needs to read.

Great work, thanks a lot!

conan_1 - July 4, 2011, 8:39 am

Thanks man for the tut, really helpful !

LulzSecFTW - July 4, 2011, 2:35 pm

so the only way to hack is to find a vulnerability in a website? :(meaning facebook can't be hacked etc :-\ aww hacking has limits :(

The Unknown - July 12, 2011, 2:35 am

Great you liked it bro.. Enjoy !

darkman.dz - July 15, 2011, 8:58 am

nice work friend keep moving but there is just some wrong points in some exploits' types should editing your topic :)

Tainted Star - July 15, 2011, 9:07 am

what if the strings in DB are filtered ?

firstly i used the normal 'union select' command...it had no effect on the website.
then "hehe511" told me to use "UNunionION SeLselectEcT" command ... and god blessed me it worked.

i got to know the version of the DB the site is using too by using the normal '@@version' string and after this it all messed up.

next step dint workout for me :(

need help..here's my help request thread:<https://hackforums.net/showthread.php?tid=1485244>

ill be thankful if someone replies and helps me out.

Tenshirocks - July 15, 2011, 9:19 am
