Thread: [Make A TIME Trial version SOFTWARE to full version {EASILY}](#)

thehackerboy - June 30, 2011, 6:35 pm

I SEEN MANY TUT'S AND AND THEN I HAD AN URGE TO WRITE MY OWN TUT
this is my first TUT and i am not leeching from anywhere..... my brother told me this and now i am writing this in HF . sorry for my bad English i am not American .

this trick will be more useful for skiddies and small boys not for pro-hackers?

this trick does not work on all kind of games and software's but its 90% reliable
this trick doesn't work on big games either?

have you ever had an experience when you download a game from the net and if you install it you get to know that it a demo and is only for 60 minutes or 30 days(maximum)..... well i had this kind of situation several times . i got a new Cd's of games but i only find it to be 30 days of gaming. but i found this trick and get to know how to use the game who have all files with it but a temporary lock is there to use it for just 30 days .

OK NOW HERE"S THE TRICK

*first change your PC date back to 40 years or so . Like if my PC date is 1/7/2011 then i will change it to 1/7/1971 or 1/7/1950 etc.

* then install the game,software,application etc.

*please don't use any second of the game yet

*change your PC date back to original (means if you changed your PC date from 1/7/2011to 1/7/1950 in first step you just change it back to 1/7/2011)

*run the game it will give some error but it will work fine

?

i have tested this trick hundreds of times it works absolutely fine.

have fun guys

it took me 30 min. to write this TUT and this is my first TUT so please don't leech. ??

ken2003445 - June 30, 2011, 6:50 pm

Work with WOW 7 day trail :)? lol guess not

iDDoS - June 30, 2011, 7:08 pm

lol it works! Vouched! THANK YOUUUU!

PRTK - June 30, 2011, 7:13 pm

?thanks buddy..?

KernelCrasher - June 30, 2011, 7:15 pm

I DID THAT FOR CS4 WHEN THE CRACK FUCKED UP NOW I RUN CS5/CS3 I DONT LIKE CS4

thehackerboy - June 30, 2011, 7:23 pm

@xxhacker313xx

does cs stands for counter strike

@prtk

you posted your first post in my forum . thanks

KernelCrasher - June 30, 2011, 7:27 pm

@thehackerboy

no its PhotoShop CS4

darnec - June 30, 2011, 7:28 pm

wow i didnt think it would work but i guess im proved wrong. nice tut

thehackerboy - June 30, 2011, 7:34 pm

@XXHACKERXX

oh that means it also works on some big softwares

darnec - July 1, 2011, 6:13 am

shit wow my computer only lets me go back to 1980. Help??

thehackerboy - July 1, 2011, 9:07 am

1980 will not work i guess . Coz 40 years back is the minimum i use.. U can try 1980 for a change and see if it works fine.. What window you use .

darnec - July 1, 2011, 9:11 am

Windows XP Proffesional 2003 Service Pack 3

thehackerboy - July 1, 2011, 9:36 am

strange.... I also use this window but i am able to change my pc date back.... Anyway i will find a way so that you can change your date.... But tomorrow my parents are shouting and telling me to sleep... Lol

darnec - July 1, 2011, 9:57 am

H@KER - July 1, 2011, 10:07 am

nice.. works for me.. thanks a lot for sharing..

padampadam - July 4, 2011, 1:52 am

hey it works thank you boy

cyclone9276 - July 4, 2011, 10:23 am

? it's work, thanks dude

thehackerboy - July 5, 2011, 5:37 pm

its no way to go back then 1980 in window xp sp3. what you can try is.. using 2031 as your date.. to play a game or anything you want to

Rick maahea - July 6, 2011, 3:24 am

Very handy trick to remember! Thanks a million!

deadlee - July 6, 2011, 5:03 am

do you think iconpackager will work? :L

avanda1121 - July 6, 2011, 7:11 am

works nice...thanx alot...

CaLLMeHZoMM - July 6, 2011, 7:25 am

LOL This is great thanks for the share. :)

autorunman22 - July 6, 2011, 9:14 am

really, i thought coming back in the past will only bypass deepfreeze. Hahaha nice

'Snorlax - July 6, 2011, 9:30 am

(Jun 30, 2011 06:50 PM)ken2003445 Wrote: [\[CITE\]](#) Work with WOW 7 day trail :)? lol guess not
Nope, doesn't work. It's serverside ;)

@Topic: Will test it out asap ;)

thehackerboy - July 8, 2011, 7:57 am

@deadlee- what is iconpackager

@snorlax- yaa it will work i guess

gooddevil - July 8, 2011, 8:16 am

Work for some like Eset smart security...but if u change it back to the present time.. it will stop working... u need to work on that previous date only....sad!!!

Stenography - July 8, 2011, 8:18 am

You can easily do it with regedit.

Sho?kwave - July 8, 2011, 8:23 am

Works with offline games for me but not multiplayer games but w/e nice tut :)

thehackerboy - July 8, 2011, 8:24 am

polarx- you are right. but i made it easy for beginners who don't know registry editing

thehackerboy - July 12, 2011, 10:10 am

in xp sp3 you have to hack the registry or download timestopper

A++++ - March 31, 2012, 8:21 am

It's all nice, but you forgot to mention that it works only if the program's timer is client side. If time starts from server side it won't work - like many games and some srs software.

Zarko - *April 1, 2012, 4:34 pm*

lol xD Nice tut ... Back to the 80's xD

xAlice - *March 17, 2013, 10:16 am*

Thanxx, most definitely keep this in mind, can wait to try it..
