(Jul 8, 2011 06:03 AM)Wizzay Wrote: [\[CITE\]](#) So basically if I run this on the slave, all of his IE /FF/Chrome saved passwords will be sent to me via FTP or email, also it will send logs everyday of what they type?

This thing will capture everything your slave types, including passwords from any of those browsers - NOT the saved ones. Just the ones they type. So if you check the box that says "clear cookies", you are good to go because it makes them have to login to everything again. It also tells you all their activity, whether they are accessing some file on their computer to what they are watching on youtube. It logs EVERYTHING they are doing and typing such as emails and IM conversations.

Also, I used loggers that were supposed to be FUD, but after one log report was sent it stopped. This one hasn't failed to send me a single log. And the slave has no idea about THIS one. I suggest this for sure. I am so happy because I had been looking so hard for so long to find one that ACTUALLY works. I wasted money on three before this and was sorely dissappointed. AND to top it off, nice hepful guy.

Last thing. I just had to say, considering what others here charge on their loggers and what I got in the end, this is definately worth it. It is actually the least expensive one I have purchased. I'd buy it Wiggay. You won't be dissappointed.

Good luck with sales, Promind! ?

BlackxWaterUSA - July 9, 2011, 2:56 am

Looks really good, I might buy :D

promind - July 9, 2011, 8:54 am

@generaljoint ,joser38 i really proud of your great comments ?

Thanks to all .

decompiler - July 9, 2011, 5:22 pm

promind offers great support.

Avira? - July 9, 2011, 9:22 pm

Nice Keylogger ! Great Fucntion ! Vouches From Me ! :)

Kornflex - July 10, 2011, 7:06 am

Purchased yesterday and delivered after hour or so.

I wanted to wait a little bit with review because I have very bad experience with keyloggers and "remain fud" period.

First log I received after installing my server was after few minutes containing cd.txt file.

Second log was juicy stuff I need and it's passwords and ALL THE SAVED PASSWORDS was in that log.

Logs are coming with every single word typed by my slave.

Someone said pricey, expensive? Well, with all due respect to all the sellers I already paid for some loggers and never had a chance to use them because those sellers just vanished like the fart on the wind. I pm'ed promind ten times and believe it or not, I got replied within 20 minutes with all the info I needed.

At the end, I really don't care for the price as long as I have what I paid for and as long as it's working. So far, I'm satisfied costumer.

If this service become useless I'll post here and you'll be first to know cause I'm sick of paying for worthless "products".

But at this moment, It's working so take advantage of it.

Promind, good luck with your sales.

Consider all the above as a vouch from me.

And the most important thing...

GUYS, PLEASE DO NOT SCAN YOUR SERVERS ON VIRUSTOTAL!!!

promind - July 10, 2011, 10:12 am

Thanks to everyone for great vouches ?

mikeregister - July 10, 2011, 10:14 am

Hi I've asked this last time, but wanna confirm again:

- (1)Can we turn off keylogger and simply use stealer mode?
- (2)Do we have to decrypt firefox logs?

PM me your replies together with your PP id :)

Thx

bloodom - July 19, 2011, 6:48 am

kohki the keylogger is diff what you think..

You dont use it to your own comp normally
"YOU CAN"

its always steal

you dont need to decrypt the logs

Pilatus - July 19, 2011, 11:06 am

Looks really Good. So I make the server and just send it to people via email???

promind - July 20, 2011, 6:17 am

thx ,you just send server download link to your slave .when he/she double clicks the serve it silently
intall background and then it sends the stealed pass and logs to your email or ftp.
