Thanks! I tried to get this stickied, but I guess it didn't.

For those wondering, I'll update this tonight or tomorrow to include information about the recent jailbreakme.com release.

J?stin - July 6, 2011, 3:12 pm

This is a great contribution for all the new members out there wanting to jailbreak. I skimmed through and you covered all the basics. Great job!

Thanks a lot man! If you think of anything that should be added just let me know. We tried to include pretty much all that we could, but may have missed something little. I'll probably update it for Jailbreakme tomorrow.

Liban aka Finale - July 7, 2011, 5:42 am

The ebook itself, is reached of high quality content. You should make a better visual for it.

Although is just my opinion (:

Cheers

You should add a note for the users that the jailbreak for iOS 5.0 is tethered. What this means, how to enter tethered mode, any limitations, etc.

Tacnayn - July 16, 2011, 12:18 am

You should update the Jailbreakme.com because it's now 3.0 and there's no 'Slide To Unlock' anymore!!

This looks great, although to be honest I just try Blackra1n, Greenp0ison and Redsn0w, and if they don't work I'll Google it and find a tutorial on RedmondPie :)

Great work in the name of the Informers :)

What donboy said and it touches unlocking and why you should jailbreak.

alexander_ru - July 23, 2011, 10:15 am

Okay, many thanks to both of you.

AnthonyWasH3r3 - September 1, 2011, 9:40 pm

If anyone would like me to update this a bit, just ask. Not quite sure if it's worth the time. Also, if anyone wants to see anything else put into this, just ask.

Døn - September 1, 2011, 10:36 pm

You should update it and include a section also for the CDMA models. Also, a section that answers the everyday questions we get like "what is jailbreaking" and all that stuff

AnthonyWasH3r3 - September 2, 2011, 6:31 am

I thought I covered the CDMA versions. And I did have a what is it section.

D3xus - September 2, 2011, 6:47 am

Also, you should remove the part about the Informers as they don't exist anymore :/
